Message from the President

A lot of things are happening at Blue Ridge. Our new facility will open this fall, we have a new website in the works, and our enrollment is at a record high. The 55,000 square foot structure which will become our new headquarters and classroom building is slated to open for fall classes. It will be state of the art and hold classrooms, science labs, computer labs, office space for faculty and staff, and a new internet café for students. Our website is being revamped and upgraded so that students will find a user-friendly site that is easy to navigate and full of great information. We are excited by the progress the college has made in past few years and, by the looks of it, our enrollment reflects that same excitement in our students.

Every student who attends Blue Ridge is important to us. We have produced this orientation booklet in order to make your experience with us a meaningful and positive one. In this publication you will find an abundance of useful information that will help you to locate services and people who can answer many of the questions that you may have with regard to student life. Thank you for making Blue Ridge your choice to further your education.

Welcome to Blue Ridge Community and Technical College!

Sincerely,

Dr. Peter G. Checkovich

General Information

Mission Statement

Blue Ridge Community and Technical College is dedicated to providing a diverse student population with collaborative programs and support services to improve the quality of life and promote economic development in its service area. Its quality academic programs are learner centered and focus on career entry, university transfer, developmental education, and workforce development.

Vision Statement

Blue Ridge Community and Technical College curriculum is integrated directly with the economic and workforce needs of the region. Programs of study are designed to meet the needs expressed by community members, advisory boards, employers, and workforce as reflected in on-going needs analysis of the region. Blue Ridge Community and Technical College faculty and staff continuously analyze and modify the curricula and programs to meet the educational needs of an increasingly complex and technological society. Blue Ridge Community and Technical College intends to meet the educational challenges of the 21st century and to provide quality educational experiences for the population of the Eastern Panhandle.

Policy of Nondiscrimination

Blue Ridge Community and Technical College provides opportunity to all prospective and current members of the student body, faculty, and staff on the basis of individual qualifications and merit without regard to race, sex, sexual preference, religion, age, national origin, or disability. The College neither affiliates knowingly with nor grants recognition to any individual, group, or organization having policies that discriminate on the basis of race, color, age, religion, sex, sexual preference, national origin, sexual orientation, marital or parental status, financial status, veteran status, or disability, as defined by applicable laws and regulations.
Blue Ridge Community and Technical College is required by Section 904, Title IX, Education Amendments of 1972, not to deny admission on the ground of blindness or severely impaired vision; by 45 CFR 84, Subpart E, Section 84.42, and by Section 504 Rehabilitation Act of 1973, nor to deny admission on basis of handicap; by 45 CFR 90, 91 not to discriminate on basis of age; and by 45 CFR 86, Subpart C, Section 86.21, not to deny admission on basis of sex. By Title VI of the Civil Rights Act of 1964, no person shall be subjected to discrimination on the ground of race, color, or national origin. Blue Ridge Community and Technical College is an equal opportunity-affirmative action employer in compliance with Title VII of the Civil Rights Act, West Virginia Human Rights Act, Title IX (Education Amendments of 1972), Section 504, Rehabilitation Act of 1973, American with Disabilities Act, and other applicable laws and regulations.

Accreditation
In March 2005, CTC Shepherd was initially accredited for five years as an independent institution by The Higher Learning Commission (HLC) and is a member of the North Central Association (NCA). On July 1, 2006, CTC Shepherd officially became Blue Ridge Community and Technical College. Additionally, individual programs are accredited by their own respective organizations/accrediting bodies.

Blue Ridge Community and Technical College began an extensive self-study process in 2006 to prepare for the HLC comprehensive evaluation in October 2009. A significant part of the Self-Study effort is the preparation of a Self-Study Report which demonstrates that Blue Ridge CTC should be accredited. Blue Ridge CTC received ten year accreditation in Spring 2010.

The Higher Learning Commission (HLC) is an independent corporation and one of two Commission members of the North Central Association of Colleges and Schools (NCA), which was founded in 1895 as one of six regional institutional accreditors in the United States. The Higher Learning Commission accredits, and thereby grants membership in the Commission and in the North Central Association, to degree-granting educational institutions in the North Central region: Arkansas, Arizona, Colorado, Iowa, Illinois, Indiana, Kansas, Michigan, Minnesota, Missouri, North Dakota, Nebraska, Ohio, Oklahoma, New Mexico, South Dakota, Wisconsin, West Virginia, and Wyoming. NCA contact information is as follows: (www.ncahlc.org, phone (312) 263-0456, or 30 North LaSalle Street, Suite 2400, Chicago, Illinois 60602-2504).

History of Blue Ridge Community and Technical College

Shepherd began offering 2-year programs in disciplines such as business in the 1960s. Officially, Shepherd Community College began in 1974 when the nursing department became the first official two-year program to be adopted by Shepherd. In 1989, the West Virginia State Board of Directors requested Shepherd to re-confirm its point of interest in operating a Community College. Dr. Pete Checkovich was chosen to become Dean of the Community and Technical College, he later was named Provost, and in 2004 became President of Community and Technical College of Shepherd (CTC Shepherd). CTC Shepherd was located on the basement floor of Gardiner Hall in Shepherdstown until August 2001. Meanwhile, the Martinsburg City Council contacted college officials about the possibility of bringing the Community and Technical College to Martinsburg. The City Council offered a grant for the college if it would relocate, and offered to help the college find a suitable location in Martinsburg. The site selected was the former Blue Ridge Outlets. Their offer along with the location of the building was presented to the West Virginia Higher Education Policy Commission in the fall of 2000 and the move to Martinsburg was approved. In June of 2001, renovation of the Berkeley Building of the former Blue Ridge Outlet Complex began. Classes began at the Community and Technical College on August 20, 2001. In early 2002, the Berkeley County Commissioners finalized the purchase of the Blue Ridge Outlets complex; negotiations resulted in the May 2003 relocation of the CTC Shepherd to the newly renovated Dunn Building. In March 2005, CTC Shepherd was accredited as an independent institution by The Higher Learning Commission and is a member of the North Central Association (NCA). On July 1, 2006, CTC Shepherd officially became Blue Ridge Community and Technical College.

The Dunn Building housed Blue Ridge Community and Technical College from 2003 – 2012 and accommodated the rapidly growing population. As enrollment continued to climb, College officials quickly recognized the need for a new headquarters building. In Fall of 2009, the College purchased 46 acres on Route 45 in Martinsburg, which now houses the new main campus. Construction began Fall of 2010 and the beautiful new campus was completed during the Spring of 2012. The 55,000 square foot building offers 18 classrooms, additional parking, and an on campus servery to the student body. The gorgeous new building is a welcomed addition to the scenery and backdrop within Berkeley County West Virginia and will easily serve the thousands of students to come.

Workforce Development

Blue Ridge Community and Technical College is a resource for employers in Berkeley, Morgan, and Jefferson Counties. Its academic educational programs, together with strong business and industry training programs have created a learning organization whose students and graduates are among the best-prepared citizens and workers in the state.

Blue Ridge Community and Technical College provides educational solutions to the emerging and incumbent workforce that includes customized training design and delivery, support industry certification, and improve the workplace performance of our
customers. For additional information, please visit our website (www.blueridgectc.edu) or contact Ann Shipway at (304) 260-4380.

Campus Locations

Headquarters

Blue Ridge Community and Technical College Headquarters is located at 13650 Apple Harvest Drive, Martinsburg, West Virginia 25403, and the phone number is (304) 260-4380. Blue Ridge Community and Technical College administrative and faculty offices are at this location.

Technology Center

Blue Ridge Community and Technical College opened its Technology Center in the Berkeley Business Park, located at 5550 Winchester Avenue, Martinsburg, WV 25405. The Tech Center held its ribbon cutting ceremony on June 18, 2008. Governor Joe Manchin, III gave the keynote address. This building was opened with a partnership of Allegheny Energy. The facility has an indoor and outdoor pole park, classrooms, and many office spaces. This site is approved by The Higher Learning Commission and the Department of Education. Please contact the College for more information.

The Pines Opportunity Center

Blue Ridge Community and Technical College began using the Morgan County Center during the Fall of 2012. The Center is located in the Pines Opportunity Center 109 War Memorial Drive, Berkeley Spring’s former Hospital. Currently there are 5 standard classrooms along with several smaller rooms that can easily accommodate small groups and meetings. A Phlebotomy lab can also be found within the Center, allowing career specific training to occur on site. Please contact the College for more information.

Admissions

Admission Requirements

Students seeking admission to Blue Ridge Community and Technical College as degree-seeking students must have graduated from high school or passed the GED. The following items must be submitted to the EM Office:

1. GED Scores or High School Transcripts
2. ACT/SAT/ACCUPLACER Scores (Accuplacer is given to students without ACT/SAT scores; for cutoff scores to be placed in academic foundation classes, please review the Academic Support Services section of this catalog.)
3. Official transcripts
   a. High School or GED scores
   b. Any other colleges attended

Admission to Limited Enrollment Programs

The following associate of science degree programs have additional requirements for admission into the program.

1. Board of Governors, A.A.S.
2. Emergency Medical Services
3. Nursing
4. PTA
Types of Enrollment

First time Freshmen

Students who have never attended a college or university before are classified as freshmen and must:

1. Complete application
   a. Pay the $25 application fee
   b. Provide official high school transcripts or GED scores
2. Complete separate Financial Aid paperwork (FAFSA) if interested in qualifying for Financial Aid
3. Complete Enrollment Reply Form upon notification of acceptance
4. Sign up for and attend an Orientation/Registration Session (included with acceptance letter)

Readmits

Students who have previously attended Blue Ridge Community and Technical College and would like to re-enroll are classified as readmitted students and must:

1. Complete application
   a. Pay the $25 application fee
   b. Check BRIDGE to make sure you have no holds from previous attendance on your academic record. Holds or suspensions will prevent you from being admitted again.
2. Complete separate Financial Aid paperwork (FAFSA) if interested in applying for Financial Aid
3. Sign up for and attend an Orientation/Registration Session (included with acceptance letter)

   Students who have not been registered for one or two semesters (not including summer), can meet with their academic advisor to obtain their alternate pin number and register for courses without reapplying for admission. NOTE: This policy does not apply to students who have been suspended, attended another institution while not at BRCTC, or who have not been enrolled for longer than two semesters.

Transfers

Students who have previously attended any other college (s) or university (ies) are classified as transfer students. Transfer students must:

1. Complete application
   a. Pay the $25 application fee
   b. Provide previous official college transcripts
   c. Provide official High School Transcripts (if out of high school less than 5 years)
2. Complete separate Financial Aid paperwork (FAFSA) if interested in qualifying for Financial Aid
3. Sign up for and attend an Orientation/Registration Session (included with acceptance letter)

   For an associate’s degree, a student must complete at least 24 credit hours of course work at Blue Ridge Community and Technical College. The last 12 hours of course work for an associate’s degree must be completed at Blue Ridge Community and Technical College. For the Board of Governors Associate of Applied Science degree, a student must complete at least 12 credit hours at a regionally accredited institution and at least 3 credit hours at Blue Ridge Community and Technical College.

Transfer/Readmits

Students who have previously attended Blue Ridge Community and Technical College and then attended any other college(s) or university(ies) during their absence are considered transfer/readmit students. Transfer/Readmits must:

1. Complete application
   a. Pay the $25 application fee
b. Provide official transcripts from schools attended during absence.

2. Complete separate Financial Aid paperwork (FAFSA) if interested in qualifying for Financial Aid

3. Sign up for and attend an Orientation/Registration Session (included with acceptance letter)

For an associate’s degree, a student must complete at least 24 credit hours of course work at Blue Ridge Community and Technical College. The last 12 hours of course work for an associate’s degree must be completed at Blue Ridge Community and Technical College. For the Board of Governors Associate of Applied Science degree, a student must complete at least 12 credit hours at a regionally accredited institution and at least 3 credit hours at Blue Ridge Community and Technical College.

Non-Degree Seeking Students

Non-degree students are those who wish to take courses at Blue Ridge Community and Technical College but do not desire to enroll in any specific program or desire a degree.

- Non-degree students are not eligible for Financial Aid.
- Non-degree students are not assigned an advisor.
- Steps to enroll:
  a. Complete the one page non-degree application (available in the Blue Ridge Community and Technical College Main Administrative Office or online at www.blueridgectc.edu)
  b. Submit ACT/SAT/ACCUPLACER scores for placement in Math, English, or Chemistry courses.
  c. Pay the required tuition fee upon registration.

Note: All of the above paperwork is required for each semester of registration. Non-degree students do not have an assigned academic advisor and do not have priority registration in Bridge.

High School Students

Students who are currently enrolled in high school and wish to take college level courses at Blue Ridge Community and Technical College are classified as high school students.

- Students must have at least a 2.0 high school GPA
- Students must have ACT/SAT/ACCUPLACER scores for placement in Math or English. For specific score requirements, please refer to the Academic Support Services section of this catalog.
- The total number of high school and college instructional hours in one semester is not to exceed 19.
- Steps to enroll:
  a. Complete the one-page non-degree application (available in the Blue Ridge Community and Technical College Main Administrative Office or online at www.blueridgectc.edu)
  b. Submit ACT/SAT/ACCUPLACER scores for placement in Math or English courses.
  c. Submit current transcript of high school courses taken.
  d. Submit letter of recommendation from the guidance counselor or administrator.
  e. Pay the required tuition fee upon registration.

Note: All of the above paperwork is required for each semester of registration. Non-degree students do not have an assigned academic advisor and do not have priority registration in Bridge.

College Credit for Military Service

Students who have completed basic training in military service may be granted a maximum of four-semester hours credit, which may be used to satisfy Liberal Arts physical education and/or elective requirements. It is the student’s responsibility to request this credit and to verify this military experience to the registrar. If the student was not in the Army or other service branch that has basic training then Blue Ridge Community and Technical College will grant the same credit to individuals who present a certified copy of their DD-214 form after completing a minimum of one year of active military service. Correspondence work completed at accredited institutions of higher learning cooperating with the Armed Forces Institute is accepted by colleges in
West Virginia. The amount of credit allowed by the institution where credit was earned, however, must not exceed 28 semester hours.

**Fee Waiver**

Blue Ridge Community and Technical College recognizes the American College Test’s or College Board’s Application Fee Waiver Program for economically-disadvantaged students; the appropriate request for a fee waiver should be submitted by the high school guidance counselor with the admissions application form.

**Advanced Placement Tests**

To receive credit for Advanced Placement Tests, students must have the testing service send the AP results directly to Blue Ridge Community and Technical College.

**Admission of Students with Disabilities**

Some disabilities are considered a barrier to completion of admission into particular programs at Blue Ridge Community and Technical College. College officials desire to provide every possible accommodation to students with disabilities. To do this, however, college officials must have reasonable notice of the special accommodations required. Proper documentation from an established medical professional may be required. The Coordinator of Student Success alone with the student will develop accommodations for those students whom are in need. Inquiries or requests should be directed to the Student Success office.

**Orientation/Registration**

Blue Ridge Community and Technical College Orientation/Registration is required for all incoming degree seeking students.

1. Admitted students will receive an email with their acceptance letter indicating orientation/registration dates.
2. Prospective students who are seeking a degree and do not have ACT or SAT placement scores must contact the Office of Student Success to set up testing (prior to specified date of Orientation/Registration.)
3. Students contact Blue Ridge Community and Technical College (according to the instructions on the letter) and denote which date they will attend an Orientation/Registration Session.
4. Students attend their scheduled Orientation/Registration Session, meet with an Academic Advisor, register for classes for the upcoming semester, and make appropriate payment arrangements.

The purpose of the Blue Ridge Community and Technical College Orientation/Registration Session is to familiarize students with policies, procedures, online classes, campus services, and other academic and campus information to register for classes. Fees and dates will be provided to the student during the acceptance process.

**Classification for Residency for Admissions and Fee Purposes**

**General**

The institutional officer designated by the President shall assign students enrolling in a West Virginia public institution of higher education a residency status for admission, tuition, and fee purposes. In determining residency classification, the issue is essentially one of domicile. In general, the domicile of a person is that person’s true, fixed, permanent home and place of habitation. The decision shall be based upon information furnished by the student and all other relevant information. The designated officer is authorized to require such written documents, affidavits, verifications, or other evidence as is deemed necessary to establish the domicile of a student. The burden of establishing domicile for admission, tuition, and fee purposes is upon the student. If there is a question as to domicile, the matter must be brought to the attention of the designated officer at least two weeks prior to the deadline for the payment of tuition and fees. Any student found to have made a false or misleading statement concerning domicile shall be subject to institutional disciplinary action and will be charged the nonresident fees for
each academic term theretofore attended. The previous determination of a student’s domiciliary status by one institution is not conclusive or binding when subsequently considered by another institution; however, assuming no change of facts, the prior judgment should be given strong consideration in the interest of consistency. Out-of-state students being assessed resident tuition and fees as a result of reciprocity agreement may not transfer said reciprocity status to another public institution in West Virginia.

Residence Determined by Domicile

Domicile within the state means adoption of the state as a fixed permanent home and involves personal presence within the state with no intent on the part of the applicant or, in the case of the dependent student, the applicant’s parent(s) to return to another state or county. Residing with relatives (other than parent(s)/legal guardian) does not, in and of itself, cause the student to attain domicile in this state for admission of fee payment purposes. West Virginia domicile may be established upon the completion of at least 12 months of continued presence within the state prior to the date of registration, provided that such 12 months’ presence is not primarily for the purpose of attendance at any institution of higher education in West Virginia. Establishment of West Virginia domicile with less than 12 months’ presence prior to the date of registration must be supported by evidence of positive and unequivocal action. In determining domicile, institutional officials should give consideration to such factors as the ownership or lease of a permanently-occupied home in West Virginia, full-time employment within the state, paying West Virginia property tax, filing West Virginia income tax returns, registering of motor vehicles in West Virginia, possessing a valid West Virginia driver’s license, and marriage to a person already domiciled in West Virginia. Proof of a number of these actions should be considered only as evidence which may be used in determining whether or not a domicile has been established. Factors militating against the establishment of West Virginia domicile might include such considerations as the student not being self-supporting, being claimed as a dependent on federal or state income tax returns or on the parents’ health insurance policy if the parents reside out of state, receiving financial assistance from state student aid programs in other states, and leaving the state when school is not in session.

Dependency Status

A dependent student is one who is listed as a dependent on the federal state income tax return of his or her parent(s) or legal guardian or who receives major financial support from that person. Such a student maintains the same domicile as that of the parent(s) or legal guardian. In the event the parents are divorced or legally separated, the dependent student takes the domicile of the parent with whom he or she lives or to whom he or she has been assigned by court order. However, a dependent student who enrolls and is properly classified as an in-state student maintains that classification as long as the enrollment is continuous and that student does not attain independence and establish domicile in another state. A nonresident student, who becomes independent while a student at an institution of higher education in West Virginia, does not, by reason of such independence alone, attain domicile in this state for admission or fee payment purposes.

Change of Residence

A person who has been classified as an out-of-state student and who seeks resident status in West Virginia must assume the burden of providing conclusive evidence that he or she has established domicile in West Virginia with the intention of making a permanent home in this state. The intent to remain indefinitely in West Virginia is evidenced not only by a person’s statements, but also by that person’s actions. In making a determination regarding a request for change in residency status, the designated institutional official shall consider those actions referenced in section two above. The change in classification, if deemed to be warranted, shall be effective for the academic term or semester next following the date of the application for reclassification.

Military

An individual who is on full-time active military service in another state or a foreign country, or an employee of the federal government, shall be classified as an in-state student for the purpose of payment of tuition and fees, provided that person established a domicile in West Virginia prior to entrance into federal service, entered the federal service from West Virginia, and has at no time while in federal service claimed or established a domicile in another state. Sworn statements attesting to these conditions may be required. The spouse and dependent children of such individuals also shall be classified as in-state students for
tuition and fee purposes. Persons assigned to full-time active military service in West Virginia and residing in the state shall be classified as in-state students for tuition and fee purposes. The spouse and dependent children of such individuals shall also be classified as in-state students for tuition and fee purposes.

**Aliens**

An alien who is in the United States on a resident visa or who has filed a petition for naturalization in the naturalization court, and who has established a bona fide domicile in West Virginia as defined in section two, may be eligible for in-state residence classification, provided that person is in the state for purposes other than to attempt to qualify for residency status as a student. Political refugees admitted into the United States for an indefinite period of time and without restriction on the maintenance of a foreign domicile may be eligible for an in-state classification as defined in section two. Any person holding a student or other temporary visa cannot be classified as an in-state student. Currently Blue Ridge Community and Technical College is not a SEVIS institution, we cannot accept students on an F-1 VISA.

**Former Domicile**

A person who was formerly domiciled in the state of West Virginia and who would have been eligible for an in-state residency classification at the time of his/her departure from the state may be immediately eligible for classification as a West Virginia resident provided such person returns to West Virginia within a one-year period of time and satisfies the conditions of section two of these rules regarding proof of domicile and intent to remain permanently in West Virginia.

**Appeal Process**

The initial determination of residency classification by the registrar may be appealed to the institutional committee on residency appeals which is established by the President to receive and act on appeals of initial residency decisions. The decision of the institutional committee on residency appeals may be appealed to the president of the institution. The appeal shall end at the institutional level.

**Academic Support Services**

Academic Support Services offers a variety of services to assist students in achieving academic success. Located in room 1400, Academic Support Services provides a support staff of professionals learning resource specialists in the areas of mathematics, writing composition, reading, and critical thinking skills. Services include Peer Tutoring, Peer Mentoring, Early Alert Program and many more.

**Academic Foundation Courses**

Academic Foundation Courses are designed to remediate students who do not meet college admission standards established by the WV Higher Education Policy Commission. The following courses focus on a concentrated developmental curriculum:

- **Developmental Writing Program** – The Academic Foundations Developmental Writing Program, ACFN 010. Composition and mechanical skills are emphasized as students learn to identify their strengths and weaknesses. A peer workshop format is emphasized and tutors are available upon request. Completion of ACFN 010 provides the composition and usage skills necessary for success in subsequent composition courses. ACFN 010 - Introduction to Critical Composition (3) is a non-credited course.

- **Developmental Math Program** – The Academic Foundations Developmental Mathematics Program is designed for students in basic mathematical, algebraic, and logical thinking skills necessary for the successful completion of college-level math courses. The program consists of two courses. ACFN 065 is a pre-algebra course and ACFN 085 is a basic algebra course. Student lab assistants are available to provide support and tutors are available upon request. ACFN 065 - Pre-Algebra (3) and ACFN 085 - Basic Algebra (3) are non-credited courses.
Developmental Reading Program – The Academic Foundations Developmental Reading Program consists of ACFN 095. The focus of this course is to develop college reading skills and vocabulary. Effective comprehension along with an emphasis on the application of these skills in college-level work is the goal. Tutors are available upon request. ACFN 095 - Developing College Reading Skills (3) is a non-credited course.

ACFN Mathematics Assistance Program

An ACFN mathematics assistance program is available to students taking ACFN math courses. Assistance is provided by student lab assistants specializing in usage of MyMath Lab. Student lab assistants attend some class lab sessions to provide support. Sessions outside of class are available by appointment. Students seeking ACFN mathematics assistance are encouraged to talk with the Developmental Mathematics Coordinator located in office 2400.

Attendance Policy for all ACFN Courses

Required Attendance in Academic Foundations (ACFN) courses: Students are expected to attend ALL classes. In the absence of student/instructor communication, all nonattendance is assumed to be unexcused. In the case of courses that are delivered partially or fully online (e.g., 50%-100% online, web hybrid with proctored tests, etc.), submission of completed class assignments weekly is used to document attendance.

During a regular, 16-week term, any student who accumulates two consecutive weeks of unexcused absence (or in the case of an online instruction class [see above], who fails to participate in online class assignments) in a state-mandated course will, without notification, be administratively withdrawn from that course exactly ONE week later unless the student contacts the instructor and provides documentation deeming the absences excused. During terms other than the standard 16-week semester, such as courses offered in the summer or in first or second 8 weeks accelerated formats, five consecutive class hours of unexcused absence (or in the case of an online instruction course [see above], lack of participation in class assignments) will result in an administrative withdrawal exactly TWO DAYS later unless the student contacts the instructor and provides documentation deeming the absences excused.

Should such an event transpire, it may have financial aid, insurance, and college enrollment repercussions. This institutional policy should be taken very seriously. Excused absences include the following:

1. Death in the immediate family;
2. Incapacitating illness or injury (not including any non-emergency doctors’ appointments that could be scheduled at other times);
3. Field trips required for other classes, intercollegiate competitions, or activities entailing official representation of Blue Ridge CTC; or
4. Hazardous, weather-induced driving conditions.

In the case of any absence, it is the student's responsibility to confer with the instructor about the absence and missed coursework. With regard to absences outside of the narrowly defined circumstances above, a student may discuss his or her individual circumstances with the instructor; however, the instructor's decision regarding the excused/unexcused nature of the absence will be final.

Career Services

Students are encouraged to use Career Services early in their college experience to assess their interests and explore career options. Career Services works with area organizations to develop job opportunities. All of the services that are provided by this area are vital to assisting students and providing a springboard into today’s very competitive workforce. Some of the many services that this area can provided to students includes the College Foundation Career Assessments, mock interviews, cover letter and resume assistance, College Central, Federal Work Study, and much more. Every year Career Services hosts a Career Fair, which is a wonderful opportunity for everyone who attends because it gives them an opportunity to market themselves and to practice their professional interviewing skills as well. For more information about Career Services, stop by office 1300 to talk with the Coordinator of Career Services.

Early Alert Program

The Early Alert Program is designed to identify students who are having academic difficulty at any point during their education at BRCTC. By identifying these students, the Student Success Counselor can attempt to address their needs, thereby increasing
the likelihood of their graduation. Students may be identified for Early Alert for a variety of reasons, including frequent absences, accommodations, behavior, tardiness, test scores, language skills, and writing ability. For more information about the Early Alert Program contact the Student Success Counselor located in office 1300.

PASS Mentors

The Peer Advising for Student Success (PASS) Program was implemented in an effort to increase retention, student engagement, and success of first year students which will gear them towards graduation! The program targets new degree-seeking students who are attending part-time or full-time. PASS program mentors are employed to make phone calls, send emails, and conduct face-to-face meetings to all new students throughout their first semester of enrollment. These contact methods provide specific information about the college, academic and student support services, registration procedures, e-mail and BRIDGE, and student engagement activities. During these contact times, PASS mentors continuously encourage students to have contact with instructors, advisors, and SGA members. In addition to providing pertinent and valuable information, the contact methods serve as a personal connection between the students as well as the college. PASS mentors should establish professional relationships with their advisees. PASS mentors are trained and ready to make referrals to the appropriate campus division. By building so many positive relationships, students are able to participate in academic and student support services and be more engaged in the campus community as a whole.

Placement Testing/Assessment

Placement Testing / Assessment is a tool to determine a student’s readiness for college level courses, specifically reading, English, and math. Students entering college for the first time without ACT or SAT scores should take placement testing/assessment in reading, English, and math prior to registering for a reading, English or math course or any course that has a reading, English, or math pre-requisite.

BRCTC students have the option of taking the assessments on computer (Accuplacer) or paper and pencil (Asset). Accuplacer is untimed and does not have a set number of questions. Asset is timed and has a set number of questions.

Students who do not meet any of the exemptions (see below) from placement testing/assessment will take the following four assessments:

1. Reading comprehension - determines if ACFN 095 - Developing College Reading Skills (3) course is needed. A score of 79 or higher on Accuplacer and 36 or higher on Asset will exempt students from taking this course.
2. Sentence Skills (Accuplacer) or Writing Skills (Asset) - determines placement into ACFN 010 - Introduction to Critical Composition (3) or ENGL 101 - Written English (3). A score of 88 or higher on Accuplacer and/or 38 or higher on Asset places students into ENGL 101 - Written English (3). All scores below place students into ACFN 010 - Introduction to Critical Composition (3).
3. Arithmetic (Accuplacer) or Numerical Skills (Asset) Test AND
4. Elementary Algebra- The scores from BOTH assessments determine placement into ACFN 065 - Pre-Algebra (3), ACFN 085 - Basic Algebra (3), or college level math using the following:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Course</th>
<th>Accuplacer</th>
<th>Asset</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH</td>
<td>ACFN 065 - Pre-Algebra (3)</td>
<td>78 on Arithmetic AND 79 on Elementary Algebra</td>
<td>38 on Numerical AND 36 on Elementary Algebra</td>
</tr>
<tr>
<td></td>
<td>ACFN 085 - Basic Algebra (3)</td>
<td>79-84 on Arithmetic AND 80-83 on Elementary Algebra</td>
<td>39 on Numerical AND 38 on Elementary Algebra</td>
</tr>
<tr>
<td></td>
<td>College Level Math</td>
<td>85 on Arithmetic AND 84 on Elementary Algebra</td>
<td>40 on Numerical AND 40 on Elementary Algebra</td>
</tr>
</tbody>
</table>
Higher College Math Test (Accuplacer) – Students who place into college level math have the additional option of taking the Accuplacer College Math Test in an attempt to place into a higher college level math course. The score from this assessment determines placement into MATH 106 - Trigonometry (3), MATH 108 - Pre-Calculus (4), or Calculus (Math 207).

Exemptions from Placement testing/assessment:

1. Students who already have a degree from an accredited college are exempt from placement assessment. (Official transcripts must be submitted to the Office of Admissions).
2. Students who have previously taken and received a passing grade in a college level English and math course from an accredited college are exempt from placement assessment. (Official transcripts must be submitted to the Office of Admissions).
3. Students who have SAT or ACT scores (official score report must be submitted to the Office of Admissions) may use them for placement into courses using the following:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Course</th>
<th>ACT</th>
<th>SAT</th>
</tr>
</thead>
<tbody>
<tr>
<td>READING</td>
<td>ACFN 095 - Developing College Reading Skills (3)</td>
<td>16 or Below</td>
<td>410 or Below</td>
</tr>
<tr>
<td></td>
<td>Exempt From Reading Course</td>
<td>17 or Above</td>
<td>420 or Above</td>
</tr>
<tr>
<td>ENGLISH</td>
<td>ACFN 010 - Introduction to Critical Composition (3)</td>
<td>17 or Below</td>
<td>440 or Below</td>
</tr>
<tr>
<td></td>
<td>ENGL 101 - Written English (3)</td>
<td>18 or Above</td>
<td>450 or Above</td>
</tr>
<tr>
<td>MATH</td>
<td>ACFN 065 - Pre-Algebra (3)</td>
<td>17 or Below</td>
<td>420 or Below</td>
</tr>
<tr>
<td></td>
<td>ACFN 085 - Basic Algebra (3)</td>
<td>18</td>
<td>430 or Above</td>
</tr>
<tr>
<td></td>
<td>College Level Math</td>
<td>19 or Above</td>
<td>460 or Above</td>
</tr>
<tr>
<td></td>
<td>MATH 106 - Trigonometry (3)</td>
<td>24 or Above</td>
<td>550 or Above</td>
</tr>
<tr>
<td></td>
<td>MATH 108 - Pre-Calculus (4)</td>
<td>28 or Above</td>
<td>600 or Above</td>
</tr>
<tr>
<td></td>
<td>MATH 207 - Calculus</td>
<td>28 or Above</td>
<td>600 or Above</td>
</tr>
</tbody>
</table>

4. Students who do not place into college level courses in any or only some subject areas have the option of taking the placement tests/assessments in only that subject area in an attempt to place into college level courses.
5. Students may choose not to take placement tests/assessments with the understanding that they must take all ACFN or foundation courses. Students also have the option to take only one or two subject areas of the placement tests/assessments with the understanding that they must take ACFN foundation courses for the subjects which they did not test.

Skills 101
SKILLS 101 is a free, week-long test prep boot camp for students who have taken the placement test/assessment but did not place into college level English and/or math courses and want the option of intensive study and re-testing.

Students may choose to attend for one subject area (English or math) or both subject areas.

Students are given an intensive test prep workshop and are re-tested at the end of the week.

Although success rates are high for students who attend SKILLS101, attendance is not a guarantee of placing into college level English and/or math when re-testing.

SKILLS101 is most recommended for, but not limited to students:

- who had placement scores close, but not quite at college level
- who may have taken ACFN course(s) and did not complete it and/or failed it

SKILLS101 is based on enhancing skills for successful placement into college level English and math courses based on the placement test/assessment. It is not equivalent to any ACFN course. SKILLS101 does not grant credits or appear on students transcripts.

SKILLS101 is offered a couple of weeks prior to the start of each semester in August, January, and May. Sessions are three hours in length with both morning and evening sessions offered. Students are welcome to attend as many sessions as desired for their success in placing into college level English and math courses.

Tutor Program

The Peer Tutor Program is a free service to all students of Blue Ridge Community and Technical College. A self-serve program, the student submits a request for tutorial assistance by either sending the form electronically (see Peer Tutor Program on website) or completing a tutor request form in the Success Center, room 1400. Once the form is received, a tutor will contact the student via their Blue Ridge CTC e-mail address within two school days.

To become a peer tutor, the following is required: currently enrolled at Blue Ridge CTC (six hours minimum during the fall/spring semesters); have at least a 2.4 cumulative GPA; have earned a 3.0 in the course(s) in which the student wishes to tutor; and attending an in-service workshop with the tutor coordinator once the student has received approval from the Office of Human Resources.

Students who wish to become tutors may also be referred by faculty from a specific field of study. Students who have a background/education in a specialized course are urged to contact the tutor coordinator.

Note: Tutor sessions can only be held on campus during business hours. There is no tutoring on Sundays or holiday breaks.

Scholarships and Financial Aid

Financial aid for Blue Ridge Community and Technical College students is part of Enrollment Management Services in the offices at 13650 Apple Harvest Drive in Martinsburg. To reach the office by phone, call (304) 260-4380 ext 2106 or visit the website at www.blueridgedctc.edu/financial_aid. Current students can view and update financial aid status using BRIDGE.

Financial assistance is available based on scholastic achievement, special talents and abilities, and/or financial need. Awards are given for a period of one academic year, which begins in August, and students must apply for financial aid and/or scholarships each year. The following sections describe guidelines for application, financial aid programs, responsibilities of students and/or parents, and deadlines. More detailed information is available from the Financial Aid Office.

Application Process

Any student who wishes to apply for federal and/or state financial assistance must submit the Free Application for Federal Student Aid (FAFSA) and be admitted to the College in an eligible program. Some certificate programs are eligible for federal
aid and the WV HEAPS (Higher Education Assistance for Part-time Students) Grant. All applicants are required to submit the FAFSA and are urged to begin the application process as early as possible after January 1, each year that they will be enrolled. If the student will be enrolled for the Fall, he/she is strongly encouraged to fill out a FAFSA by March 1.

Once the FAFSA is filed with the Department of Education, the application may be selected for a process called verification. The Department of Education randomly selects 30 percent or more of all applicants for verification. Students selected will be notified in writing of required documentation, which includes the verification form, signed copies of student and parent tax return transcripts (for dependent students) and W-2s. Any student with special circumstances, such as loss of employment, extraordinary medical/dental expenses, divorce/separation, or other situations, which could not be reported on the FAFSA, may write a letter to the Financial Aid Office asking for review of his/her circumstances.

**Federal and State Grant Programs**

**Federal Pell Grant**

A federal grant, which is based on income, family size, and other factors as determined by filing the FAFSA, is for first time undergraduate students only. The maximum award for 2012–2013 is $5,550. Pell Grants do not have to be paid back and are available for full and part-time attendance.

**Federal SEOG**

The Federal Education Opportunity grant may be available to students demonstrating exceptional need. Awards are available for full and part-time attendance. Standard awards typically range up to $750 per year, but can vary based on financial need.

**West Virginia Grant Program**

This is a need-based state grant program administered by the Higher Education Policy Commission. Awards are to West Virginia residents and amounts vary by institution. For 2012-2013, the grant amount will range up to $2,400, based on the Expected Family Contribution and students must be enrolled full-time (12 credit hours or more) each semester. Since it is a need-based program, a FAFSA must be filed by April 16 each year.

**PROMISE Scholarship**

West Virginia PROMISE (Providing Real Opportunities for Maximizing In-state Excellence) is a merit-based scholarship program designed to keep qualified students in West Virginia by making college affordable. It pays 100% of mandatory tuition and fees at Blue Ridge Community and Technical College. It is the full responsibility of the student to ensure adherence to the PROMISE guidelines. For full program details, please refer to the College Foundation of WV website: www.cfwv.com www.promisescholarships.org. The FAFSA must be completed by March 1.

**Higher Education Assistance for Part-time Student Grant (HEAPS)**

This is a need-based state grant for part-time students in degree, or eligible certificate programs. The award amount is based on tuition charges and is determined by individual schools. The usual semester award is equal to six hours of mandatory tuition and fees, which for 2012-2013 will be $780. A FAFSA is required.

**Federal Work Study**

Federal work study jobs help students earn money while attending Blue Ridge. Undergraduate students with work study jobs may work part time on or off campus while enrolled. Federal work study provides part time jobs for undergraduates with
financial need, which allows students to earn money to assist with living expenses. The program encourages community service work and work related to a student’s course of study.

If you are interested in obtaining a Federal Work Study job while you are enrolled at Blue Ridge, make sure you apply for aid early. It is encouraged that you complete the FAFSA by March 1 each year. The Financial Aid Office awards funds on a first come, first served basis. Please check your award on your BRIDGE account to verify that you are Federal Work Study eligible. If you feel you may be eligible and have not been awarded, please contact the Financial Aid Office.

You will earn at least the current federal minimum wage. However, you may earn more depending on the type of work you do and the skills required for the position. Students must also meet Satisfactory Academic Progress.

Your total work study award will depend on:

- when you apply,
- your level of financial need, and
- Blue Ridge’s funding level.

For a list of Federal Work Study positions, please check our bulletin board located next to the Human Resources Office as well as on the Career Services Website, www.collegecentral.com/blueridgectc.

**Student and Parent Loans**

The Financial Aid Office processes student and parent loans through the William D. Ford Direct Loan Program funded by the Department of Education. Students must be enrolled in a minimum of six credit hours in an eligible program to qualify for a Direct Loan. Federal regulations require that a 1.0 percent origination fee, based on the loan amount, be deducted from every Direct Subsidized and Direct Unsubsidized Loan processed. The percentage is four percent for parent loans.

**Federal Direct Loans**

Any student indicating his/her interest in loans on the FAFSA is processed for the maximum student loans for which he/she is eligible. Any student who wants a lower amount need only indicate that amount when the loan is accepted. The amount any student may borrow each academic year is based on:

1. Grade level
2. Length of academic program
3. Dependent or independent status

Listed below are the maximum amounts per year a student may borrow under the Direct Loan Program as an undergraduate seeking a two-year degree:

<table>
<thead>
<tr>
<th></th>
<th>Annual Loan Limits for Dependent Students</th>
<th>Annual Loan Limits for Independent Students</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(effective July 1, 2009)</td>
<td>(and dependent students whose parents can not borrow PLUS)</td>
</tr>
<tr>
<td>Base Amount</td>
<td>Additional Unsubsidized Loan</td>
<td>Base Amount</td>
</tr>
<tr>
<td>First Year Students</td>
<td>$3,500</td>
<td>First Year Students</td>
</tr>
<tr>
<td></td>
<td>$2,000</td>
<td></td>
</tr>
<tr>
<td>Second Year Students</td>
<td>$4,500</td>
<td>Second Year Students</td>
</tr>
<tr>
<td></td>
<td>$2,000</td>
<td></td>
</tr>
</tbody>
</table>

No student seeking an associate’s degree may borrow above $10,500 each academic year. The amount and type of loan a student may receive varies by his/her total cost of education and the amount of other financial aid received. Any student borrowing under the Direct Loan Program for the first time is required to complete Entrance Counseling on-line at www.studentloans.gov.
level for transfer students for loan processing is based on the total number of hours accepted by Blue Ridge Community and Technical College.

When the loan is being processed, a first-time borrower must sign a Master Promissory Note (MPN). The promissory note should be signed electronically at www.studentloans.gov. The electronic confirmation of entrance counseling and completion of an MPN are sent directly to the Financial Aid Office. All loans are disbursed in two payments, usually three weeks after the beginning of each term, and are applied to any outstanding obligations to the College before the student receives a refund.

**Direct Parent Loan for Undergraduate Students (PLUS)**

Applications for the Parent Loan for Undergraduate Students (PLUS) are available on the Blue Ridge Community and Technical College website. Parent loans are processed based on amount requested, on the student’s cost of attendance, and on the amount of other financial aid received. A credit check by the Federal Loan Servicer is required for processing. If a parent’s credit is denied, a student can apply for an unsubsidized loan in his/her name.

**Alternative Loans**

Other loans may be available to students with demonstrated need or special situations. These require credit checks and are made by outside lenders such as SallieMae and Campusdoor. Outside loan applications are available online at the lenders’ websites.

**Loan Repayment Information**

William D. Ford Direct Loans do not have to be repaid until six months after the student graduates or ceases attending on at least a half-time basis. Any student who drops below six hours of enrollment must begin repaying his/her loan six months from that time. Only one six-month grace period is granted to each student. The repayment process for parent loans begins within 60 days after the last disbursement for the year, usually in March if the loan is for two semesters. Current minimum repayment amounts are $50, depending on the repayment plan. Several repayment plans exist for all loan programs. www.nslds.ed.gov. Exit Counseling must be completed at the time of graduation or when the student goes below half-time enrollment.

Exit Counseling is done online at www.nslds.ed.gov. Academic transcripts will not be released until exit counseling is completed and results electronically received by the Financial Aid Office.

**Other Types of Assistance**

**Veteran’s Re-Education Act**

Eligibility for funding by the Veteran’s Re-Education Act is determined by the Department of Veterans Affairs, and awards are given to West Virginia residents who have exhausted all other veteran’s benefits and must meet other criteria related to need. Applications may be obtained from the Financial Aid Office.

**Military and Veterans Administration Education Assistance**

The Veterans Administration provides a number of programs for veterans and service personnel seeking funding for education and/or training. Please contact the Veterans certifying official at Blue Ridge Community and Technical College to inquire about available assistance. Apply for Veteran Education Benefits at www.va.gov or for questions regarding benefits call 1-888-442-4551.

**Vocational Rehabilitation**
Students with physical or learning disabilities may be eligible for assistance with education expenses through their state department of vocational rehabilitation. Students should contact the local Division of Rehabilitation Services to inquire about programs available.

**Disbursements/Refunds**

**Disbursement of Funds**

Financial aid is awarded for the full academic year; with half available for the fall semester and half for the spring semester. Student payment for tuition and fees is due prior to the start of each semester. Students receiving financial aid to assist with these expenses will have that aid applied first to institutional charges. Purchase of books and supplies through Blue Ridge Community and Technical College’s bookstore official vendor, may be billed directly to the student account if the student has a credit balance.

**Refund of Excess Financial Aid**

All financial aid, including loans, is applied to the student account to cover institutional costs. No refund is given to the student until all obligations to the College are met. All Title IV funds awarded (Federal Pell Grant, Federal SEOG and Direct Loans) are refundable according to program regulations. Refund checks for excess financial aid are normally available shortly after classes begin and on a weekly basis thereafter.

**Refunds/Returns Due to Withdrawal**

The Financial Aid Office is required by of federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or term. Federal Title IV financial aid program eligibility must be recalculated in these situations.

If a student leaves the institution prior to completing 60% of a payment period or term, the Financial Aid Office recalculates eligibility for Title IV funds. Recalculation is based on the percentage of aid earned using the following Federal Return of Title IV funds formula:

\[
\text{Percentage of payment period or term completed} = \frac{\text{number of days completed up to the withdrawal date}}{\text{total days in the payment period or term}}\times 100\%
\]

This percentage is also the percentage of earned aid.

Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula:

\[
\text{Aid to be returned} = 100\% \times \text{the amount of aid that could have been disbursed during the payment period or term} - \text{the percentage of earned aid} \times \text{the total amount of aid that could have been disbursed during the payment period or term}
\]

If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student would be required to return a portion of funds. Keep in mind that when Title IV funds are returned, the student borrower may owe a balance to the institution.

If a student earned more aid than was disbursed to him or her, the institution would owe the student a post-withdrawal disbursement which must be paid within 30 days of the student’s withdraw.

Refunds are allocated in the following order:

1. Unsubsidized Federal Stafford Loan
2. Subsidized Federal Stafford Loan
3. Federal Parent (PLUS) Loan
4. Federal Pell Grant
5. Federal Supplemental Opportunity Grant
6. Other Title IV assistance
7. Other State of West Virginia
8. Private and Institutional aid
9. The student

Satisfactory Academic Progress Policy

The policy for Satisfactory Academic Progress is effective as of July 1, 2011 and supersedes any previous policy. Federal regulations require Blue Ridge CTC to establish Satisfactory Academic Progress (SAP) standards for all students in eligible degree or certificate programs who wish to receive financial aid. Any student receiving Title IV Financial Aid is required to maintain Satisfactory Academic Progress according to The Compiled Financial Aid Regulations (34 CFR, through 12/31/95 as published by the Department of Education, section 668.34). Every student is required to complete a certain number of hours attempted to show that he/she is progressing towards a degree in his/her program of study. Each student must also maintain a grade point average consistent with the regulations governing Satisfactory Academic Progress. Satisfactory Academic Progress is required for students to receive financial aid in any of the following programs: Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Work-Study, Federal Direct Loans, or Parent Loan for Undergraduate Students (PLUS) and State Grant Programs including the West Virginia Higher Education Grant and Part-time Programs.

Students must satisfy both grade point average and attempted hours standards for progress toward a degree.

Standards Measured by Grade Point Average

1. All Associate Degree and eligible certificate program students must maintain a minimum of a 2.0 grade point average (GPA). This includes transfers and re-admitted students.
2. Any student admitted or readmitted on academic probation who does not meet grade point average standards may appeal to the Financial Aid Scholarship and Appeals Committee at Blue Ridge Community and Technical College. Please refer to www.blueridgectc.edu/financial_aid for more information.

Standards Measured by Hours Attempted

As a student progresses through his/her program, he/she must pass at least 70% of credit hours attempted, including transfer and pass/fail hours and the following:

- F Failure
- I Incomplete
- IF Incomplete/Failure
- W Withdrawals
- R Repeat

The above types of attempted hours are combined with all passing grades in determining progress. Transfer credits accepted by Blue Ridge CTC will be added to institutional hours to determine total hours attempted.

Example 1

Attempt 20
Pass 15

Example 2

Attempt 25
Pass 15
Standards Measured by Maximum Hours

Any student in a program leading to an Associates Degree must complete their degree or certificate program in 96 credit hours or 150% of usual hours required by the program. Students who will be at maximum hours within 24 credits are also checked at the end of each semester for continued eligibility.

Students working on a second degree or certificate will receive financial aid ONLY for the coursework needed to complete the degree, even though they have passed less than 96 hours.

Satisfactory Academic Progress will be evaluated at the end of each semester, including summer term(s). Students must meet all Satisfactory Academic Progress standards. The GPA and percentage standards will be checked at the end of each semester and become effective immediately. Students not in compliance with grade point average and/or percentage standards for the first time will automatically be given a warning period of one semester, during which they will have eligibility for financial aid. Those who are given a warning period will be notified in writing. Each student is offered only one warning period. Students failing academic progress after the warning period are suspended from financial aid eligibility and will be notified in writing. Students may appeal suspension of financial aid based on special circumstances which include, but are not limited to, death of a close relative or injury or illness of the student. The student must provide documentation of the appeal circumstances. All appeals are considered on a case by case basis and a letter of appeal must be submitted, with documentation, to the Financial Aid Office at least one week prior to the appeal date listed in the suspension letter. Students are only permitted one appeal. A student can only regain eligibility by meeting the institutions current Satisfactory Academic Progress Standards.

Blue Ridge Community and Technical College Scholarships

There are various scholarships available to Blue Ridge Community and Technical College Students. Please visit the website at www.blueridgctc.edu/financial_aid

Registration and BRIDGE

BRIDGE is a secure online program that provides web-based services for students. BRIDGE can be used to:

- Register for classes
- Add/Drop classes
- Review Charges
- Review & Print Class Schedules
- Review & Print Unofficial Transcripts
- Apply & Review Financial Aid
- Email Instructors

To access BRIDGE, go to the Blue Ridge Community and Technical College Home Page and click the “BRIDGE” link. The User Log-on screen requires a “User ID” and “PIN”. The User ID is the 9-digit Student Identification Number. If a student does not know his or her Student ID, he or she can click on “look up my SID” on the BRIDGE Homepage. The PIN number is originally set as the student’s birthday (MMDDYY) entered with no dashes. Immediately after entering BRIDGE for the first time, the student is prompted to create a new PIN; this pin number is a 6-digit number of the student’s choice and cannot be retrieved by the faculty or staff at Blue Ridge Community and Technical College. This new PIN will be used with the User ID to access BRIDGE. From that point forward BRIDGE provides students’ access to “Student Services”, “Financial Aid” and “Personal Information” screens.
Class Schedule

Semester class schedules are available at www.blueridgectc.edu. Students are encouraged to refer to the website for the most-up-to-date version of the schedule.

Registration Information

General Information

To register for classes on BRIDGE, the student must log-on using his or her User ID and PIN number. After selecting the Student Services screen, the student will click on Registration and enter the CRN’s for the classes for which he or she wishes to register.

Alternate PIN

To register for classes a student must enter an “Alternate PIN” number. This Alternate PIN number must be obtained from the student’s Academic Advisor and is not to be confused with the PIN number used by the student to log-on to BRIDGE. The Alternate PIN is entered on the Registration screen of BRIDGE. This number changes from semester to semester and should be kept through the add/drop period.

Course Request Number (CRN)

Class registration on BRIDGE is conducted by entering the Course Request Number (CRN) for each class. The CRN for each class is listed in the Class Schedule. If special permission or approval is required to register for a course, students must see the appropriate person listed in the Schedule of Classes, prior to registering.

Registration Holds

BRIDGE will inform the student of any holds on their account. A student with outstanding financial or other obligations will not be permitted to register until all obligations are cleared up by the appropriate office(s).

Online Classes

Technology allows some classes to be taught online. Class formats vary as follows:

- Web-assisted or hybrid courses enable portions of the class and some materials to be available online
- Asynchronous classes meet primarily online allowing the student to perform the coursework at any time during the assignment period. The student may be required to meet face-to-face with the instructor or class. Face-to-face meetings will be clearly described in the course syllabus.
- Synchronous classes meet primarily online requiring the student to log onto the online program at a specified time. The student may be required to meet face-to-face with the instructor or class. Online and face-to-face meetings will be clearly described in the course syllabus.

Online classes are enumerated in both the printed schedule and at www.blueridgectc.edu. The specific format of an online class is defined by the instructor and is available during registration.

Special Topics Courses

The college offers courses which fulfill short-term needs not justifying permanent listing in the Catalog or which respond to requests received on short notice. Credit given will be from one to four hours, and the course may be repeated as needed by the
department. Topics for these courses will be created as needed by each department. Special Topics courses vary in content with each offering. When offered, a Special Topics course title includes a subtitle describing that course’s specific content.

Variable Credit Courses

Variable credit courses are listed in the Schedule of Classes with a range of hours the course may be taken for. To enter variable credit click on the underlined credit hours for each variable credit course or click on Change Class Options at the bottom of the screen. Enter desired hours (noting allowed range) and click on Submit Changes. Scroll down, check hours, or click Return to Menu, click on Student Detail Schedule and check hours.

Maximum of 19 Credits

Students may register for a maximum of 19 credit hours per semester. A student who wishes to enroll for more than 19 hours must have an overall grade point average of 3.0 or better and secure the written approval of the Academic Advisor and Program Coordinator. If the overall grade point average is less than 3.0, students must first petition the Admissions and Credits Committee for permission before proceeding to get required signatures. Approval forms to enroll for more than 19 hours and petition forms are available in the Enrollment Management Office. Admissions and Credits Petitions are available at the Enrollment Management Office or online under Student Forms.

Closed Class

BRIDGE will indicate if a course is closed by giving a registration error message on the screen. The student can then check other sections of the same course for available openings by scrolling down and clicking on class search. If a class is closed a student may add themselves to the waitlist (if it is not already at capacity).

Waitlisting

If a class is full or closed a student has the option to waitlist themselves in the registration screen in their Bridge account. Once they are notified the class in full or closed, choose waitlist from the drop down menu. A maximum of 10 students can be waitlisted for a class. At such a time when a seat becomes available in a course, the first student on the waitlist will be notified via their BRCTC email and they will then have 24 hours to register for the class in their Bridge account. Of the 24 hour time expires and the student has taken no action in Bridge they will forfeit their place on the waitlist and seat becomes available to the next student on the waitlist.

Time Conflicts

If a student requests two courses whose start and/or end time overlap, a time conflict is created. The student can then check other sections of the same course for available openings by scrolling down and clicking on class search. An override may also be obtained from a division dean or program coordinator. If the division dean or program coordinator placed the approval in the computer, the student will then be available to register on BRIDGE, if not the student should report to the Enrollment Management Office for processing. Time conflicts require written permission from the instructor of both courses.

Other Conflicts

Students cannot register by BRIDGE for two sections of the same course. This includes special topics courses with the same number, such as 199 or 299. Students should report to their advisor for approval.

Confirm Schedule
After all CRN numbers have been entered and if there are no registration errors, the student must click Submit Changes. Click on Menu then click on Student Detail Schedule to check accuracy.

**Registration Process**

**Currently Enrolled, Degree-Seeking Students**

Students who are degree seeking and currently enrolled at Blue Ridge Community and Technical College are the first to register for future semester classes. Early registration takes place in October and March. Students must meet with their Academic Advisor to discuss their class schedule and receive their “Alternate PIN” and assigned registration time. At the assigned registration time, currently enrolled students can log-on to BRIDGE, select Student Services and then select Registration to register for classes.

**Special Non-Degree Seeking Students**

Registration for Special Non-Degree Seeking Students is ongoing. This means that registration forms will be taken and held until a set processing date for each semester. There is no application fee, and the student is not eligible for financial aid. Students who have applied for admission and who have been admitted into a degree seeking program must register for classes during a scheduled advisement and registration session. Students who have not applied for admission and who have not been admitted will be required to complete a Special Non-Degree Seeking Student Application (this form may be picked up at the Enrollment Management Office or online at www.blueridgectc.edu) and return this form to the Enrollment Management Office along with payment.

**Late Registration**

Students who begin registering for classes on or after the Friday before the first day of classes of the semester will be charged a $25 late registration fee. The student may still register via BRIDGE through the first week of classes. The late registration fee will be charged to the student’s account.

**Payment**

Students participating in early registration will receive a tuition e-bill. Student registering in person or registering late must pay tuition at the time of registration.

**Add/Drop Period**

The first five class days of the fall and spring semester, and the first four days of summer are known as the Add/Drop period. During this period, classes may be added or dropped from the student’s schedule via BRIDGE. A course dropped during this period will not appear on the student’s transcript. The student is not required to gain the Academic Advisor’s approval for any classes added or dropped from his or her class schedule. (More information on withdrawing from classes is located in the Academic Information section in this catalog).

**Expenses**

**Payment**

The West Virginia Higher Education Policy Commission regulations require the College to operate strictly on a cash basis with all payments and obligations being collected in advance.
If payment is made by check, registration will be considered incomplete until the check covering the required fees has cleared the bank on which it is written. The cashier’s office will accept cash, credit cards, money orders, or approved personal checks written for the exact amount of the obligation. All checks must be payable to Blue Ridge Community and Technical College and third party checks will not be accepted. A student’s registration may be cancelled when payment is made by a check which is dishonored by the bank. If the returned check is in payment of tuition and fees, the business office is required to declare the fees unpaid and registration cancelled. The return of a check for any reason constitutes late registration, and the applicable late-registration fee shall be assessed. In such case, the student may re-register upon redemption of the unpaid check, payment of the $10 returned check handling charge, and payment of the applicable late fee of $25. The returned check fee of $10 will be collected for each check returned unpaid by the bank upon which it is drawn, unless the drawer obtains an admission of error from the bank.

All student charges are payable at the time of registration for each semester. Students in debt to the College from a previous semester or term will not be permitted to enroll until all obligations are paid. Any outstanding and unpaid financial obligation to the College can result in withholding the student’s grades, transcript of credits, diploma, and official reports. Students will not be permitted to attend classes until registration has been completed.

Student employees will be required to pay tuition and fees at the same time as other students. The student employee will receive paychecks from the State of West Virginia for work performed during the previous month. All fees and expenses are subject to change without prior notice.

**Refund Policy**

Students who withdraw in accordance with College procedures may receive a refund of tuition and fees in accordance with the schedules outlined below. The refund calculation is based on the amount paid toward tuition and fees. *(No refunds on partial withdrawals)* Refunds are determined from the first day of the school term, which officially begins with orientation and registration days. The official withdrawal date is certified by the registrar. Refund checks are issued through the State Treasury, and receipt of a refund may take up to six weeks depending upon the date of withdrawal.

To get a 100% refund you must drop ALL classes by the end of add/drop.

Additional fees may be assessed for individual courses. These fees are listed in the comments section in the schedule of classes.

Audit Fees Per Semester

Enrollment fees for students enrolled in courses for audit (without credit) are the same as if credit were given. (The only exception applies to students requesting the senior citizen discount and who are over age 65.)

Reduced Tuition and Fee Program
WV Residents who are at Least 65 Years of Age

1. To be eligible for this program the applicant must fill out the application/registration form completely and choose one of two options:
   a. Register under this program for all classes for credit.
   b. Register under this program for all classes for noncredit.
   (A student cannot mix these two options or mix this program with regular tuition course registration.)
2. A student eligible for this plan may only register in person, following the same guidelines as other non-degree seeking students.
3. The total tuition and standard fees for the credit option will be 50 percent of the normal rates charged to state residents.
4. The total tuition and standard fees for the noncredit option will be $12.50 per credit hour.
5. Students under this plan will be expected to pay full charges for special fees, including laboratory fees, which are required of all other students.
6. Students must pay at time of registration to avoid being dropped for nonpayment.
7. In lieu of a grade, an AU will be entered for courses in the noncredit option.
8. Students may withdraw according to established dates.
9. The standard refund policy applies, as do all other college policies not specifically addressed herein.
10. All College academic policies apply.
11. Students registered under this program cannot pre-register for the next term.

Currently enrolled high school students

Students currently enrolled in high school are eligible for reduced tuition rates. Contact Enrollment Management at (304) 260-4380 for the current rates.

Academic Information

Academic Advisement

Academic advising is a developmental process, which assists students in the clarification of their educational and professional goals and in the development of plans for the realization of those goals. It is an ongoing and multifaceted process by which students are assisted in realizing their maximum educational potential through communication and information exchanges with an advisor. An academic advisor is initially assigned based on academic interest expressed by the student. It is the responsibility of both the student and his/her academic advisor to participate in the advising process equally. The academic advisor serves as a resource for course/career planning and academic progress review and as an agent of referral to other campus services as necessary. The academic advisor is not authorized to change established policy of the College. After consultation with an academic advisor, it is ultimately the student’s responsibility to choose and implement his/her academic program and to see that all specific requirements for that program and all general requirements for graduation from the College have been met in an acceptable and timely manner.

Academic Integrity/Dishonesty

Cheating in all its forms, including plagiarism and cheating on visual work, is considered an academic matter to be controlled and acted upon by the individual faculty member. Students guilty of academic dishonesty on examinations in any course shall receive, as a minimum penalty, a grade of F in that course. Such action shall be taken by the instructor, with written notification to the VP of the division. Repeated offenses shall subject the student to suspension or dismissal from the College. Students involved in facilitating academic dishonesty among others, such as by the unauthorized dissemination of examination materials, will be subject to disciplinary action beyond that called for by their own cheating in a course. Plagiarism is “the act of stealing and using, as one’s own, the ideas, or the expression of the ideas of another.” Whether that other is another student or a published author, plagiarism is cheating. Detailed instructions on avoiding plagiarism will be provided in required English courses, and
comments may be made by instructors in other courses for which papers are written. Guidelines and policies affecting dishonesty and most other aspects of student life may be found in the *Blue Ridge Community and Technical College Student Handbook.*

**Academic Recognition**

**Dean’s List**

Blue Ridge Community and Technical College students eligible to be named to the Blue Ridge Community and Technical College Dean’s List include both Associate Degree seeking and Non-Degree Special Students. To be named to the Blue Ridge Community and Technical College Dean’s List, a student must earn at least 7 credit hours, maintain a 3.5 average for the semester, and have no Incomplete grades for the semester. ACFN courses do not count in the 7 earned credit hours.

**President’s List**

Blue Ridge Community and Technical College students eligible to be named to the Blue Ridge Community and Technical College President’s List include both Associate Degree seeking and Non-Degree Special Students. To be named to the President’s List, a student must earn at least 7 credit hours, maintain a 4.0 average for the semester, and have no Incomplete grades for the semester. ACFN courses do not count in the 7 earned credit hours.

**Admissions & Credits Petition Process**

Students who need exception to College policies or procedures, due to extraordinary circumstances, may petition for special consideration. The petition packet is reviewed by a committee to determine if special consideration should apply.

**Directions for Submission (incomplete submissions cannot be reviewed):**

1. Pick-up copy of the Petition to the Admissions & Credits Committee from Blue Ridge Community and Technical College Enrollment Management Office or print from www.blueridgectc.edu.
2. Complete the form (a separate form must be submitted for each course that may be affected by the petition).
3. Attach a typed letter to the committee explaining the circumstances of your petition and why you are asking for special consideration to challenge college policy.
4. Secure proper signatures.
5. If payment is required, attach payment or proof of financial aid.
6. Submit petition form and supporting documentation to Enrollment Management. Students are notified of results via Blue Ridge email only. Although petitions are reviewed regularly, it may take up to two weeks for completion.

A Petition is considered incomplete if any of the required information requested on the form is missing. Incomplete petitions will not be reviewed.

**Assessment**

Blue Ridge Community and Technical College has an ongoing assessment program that is firmly rooted in its mission. The assessment initiative grew from both faculty and administration concerns for institutional quality and accountability. The assessment process provides the college and its programs with information regarding institutional effectiveness; all segments of the institution including faculty, staff, students, and the community are actively involved in this process. Blue Ridge Community and Technical College is constantly evaluating our effectiveness by assessing student learning and the environment in which it occurs. As a student, this implies that you are an important aspect in evaluating the institution as a whole and will be periodically asked to participate in assessments of various aspects of the environment.

While grades are one measure of student performance, grades do not provide the institution with the necessary data to assess areas of the curriculum that are strong and areas that need improvement. To assess student academic achievement, each program
conducted its own assessments of student learning. At the conclusion of every course, students have the opportunity to assess the class and their instructor by completing the Course and Instructor Evaluation; this evaluation is used to make courses more effective for future students. Other assessments are conducted as needed and will capture such data as demographics and students’ career goals.

Assessment is an important part of continually growing and improving our college. Full participation in the assessment process by faculty, staff, students, and the community will most effectively lead the institution toward more effective teaching and learning. The information gathered is used to shape and guide Blue Ridge Community and Technical College, moving it in the direction that best suits the needs of our population.

**Attendance**

Students are expected to attend class and to know and understand the specific attendance policies established by each of their instructors. An attendance policy for a given class is established by the instructor or by the program and stated in the course syllabus. Instructors will make reasonable accommodations for occasional, unavoidable absences based on highly legitimate grounds. Instructors will determine the most appropriate means of compensating for work unavoidably and legitimately missed in their classes. To be eligible for such substitute evaluation, students are responsible for discussing any absences with their instructors: such discussions must occur in advance of foreseeable absences and as soon as possible following unpredictable ones. Students are expected to plan their class, work, and personal schedules to avoid potential conflicts. Legitimate reasons for class absences include documented and/or verifiable instances of the following:

1. death in the immediate family;
2. incapacitating illness or injury (not including any non-emergency doctors’ appointments that could be scheduled at other times);
3. field trips required for other classes, intercollegiate competitions, or activities entailing official representation of Blue Ridge Community and Technical College;
4. seriously hazardous, weather-induced driving conditions.

A student’s evaluation in a course is the instructor’s responsibility. A grade decision in a course must be made by the instructor prior to the initiation of a grade appeal. A student who believes his or her grade has been adversely affected by an instructor’s inappropriate implementation of the attendance policy may pursue a grade appeal at the close of the semester.

1. A student who has a documented medical disability or chronic illness that may affect his/her ability to attend class regularly and/or to complete scheduled in-class, graded activities (e.g., exams, oral reports, lab assignments) should confer with the student affairs counselor as soon as possible after the semester begins. In consultation with the student, the counselor can develop a contingency plan to accommodate any absences that may occur because of the disability or illness: the counselor, with the instructor may create alternative assignments or otherwise determine the best means of assuring that the student’s semester grade will not suffer should the student have to miss classes as a direct result of his/her disability or medical condition. To the greatest extent consistent with the particular disability involved, a chronically ill or disabled student will not only be treated equally with other students, but will also be equally expected to adhere to course policies and assignments established for all students.

2. In rare instances, a student may suffer an unanticipated medical problem or must meet a military-service obligation requiring complete absence from school over an extended period (i.e., weeks rather than days). Such a situation will create the need to confer with instructors as soon as is feasible—possibly through a relative or other responsible surrogate. An instructor may be able to design alternative assignments that can be done independently. However, some courses by their nature do not lend themselves to compensation for prolonged periods of missed classes and assignments: for such classes, the alternatives may be limited to either a Withdrawal or an Incomplete specifically mandating that the student actually take some or all of the relevant course when it is next offered. In such circumstances, the Blue Ridge Community and Technical College Admissions and Credits Committee will review any necessary requests for waivers regarding institutional deadlines regarding Withdrawals or Incompletes when:
   a. the student’s petition clearly and fully explains the situation calling for the waiver,
   b. appropriate documentation is presented,
   c. the request is supported in writing by both the instructor and the student’s advisor, and
   d. the student’s request is made in a timely manner, but no later than the tenth class day of the following spring or fall semester.
Attendance is mandatory in ALL Academic Foundations Courses (ACFN), refer to the Academic Support Services section of this catalog for more information. Non-compliance with this regulation will result in an automatic withdrawal from the course.

Credits From Other Sources

CLEP Tests

Credit may be awarded by Blue Ridge Community and Technical College for successful completion of many of the CLEP Subject Examinations. Information about CLEP Exams can be found at www.collegeboard.com/clep.

Courses Taken at Other Institutions

A Blue Ridge Community and Technical College student must apply for transfer approval to take a non-Blue Ridge Community and Technical College course prior to enrollment at another institution. To apply for transfer approval, the student must be in good academic standing (institutional and overall GPA of 2.0 or above). No course that a student has attempted at another institution while on suspension shall be accepted by Blue Ridge Community and Technical College as part of the credit hours necessary for graduation. A student who previously enrolled in a Blue Ridge Community and Technical College course may not petition to retake that course at another institution.

To receive credit for a non-Blue Ridge Community and Technical College course, the student must complete a transfer form making the request. The student will follow all procedures enumerated on that form including signatures of approval. After obtaining the appropriate signatures, the student must submit the completed form to the Registrar’s Office.

Should any of the signatures not be secured, the student may file a petition with the Blue Ridge Community and Technical College Admissions & Credits Committee. The completed petition along with the completed the transfer form and the student’s written justification for seeking the course elsewhere may be submitted Blue Ridge Community and Technical College Admissions and Credits Committee for final action. Articulation course agreements do not apply to any repeated Blue Ridge Community and Technical College course in which a student has received a grade of D or F. No D or F grade can be replaced by an equivalent transfer course.

EDGE Credit

EDGE is an acronym for Earn A Degree—Graduate Early. This program was created to address classes in high school that meet curriculum requirements for community college credit. There is no charge for these credits. Upon acceptance and enrollment at Blue Ridge Community and Technical College, the student must request that the EDGE credits earned in high school be posted to his or her transcript. This may be done by contacting the high school Tech Prep counselor or the local Tech Prep Coordinator.

Special Examination for Course Credit

For certain courses a student may have the opportunity to take a special examination for course credit.

- Course credit may not be granted through special examination for courses previously attempted or resulted in a failing grade or withdraw.
- Course credit through special examination is only available to currently enrolled, degree-seeking students in good academic standing.
- Course credit through special examination may be attempted only once per course.
- Course credit through special examination is posted to the transcript as CR and will not affect GPA.
- The Special Examination for Course Credit assesses a fee of $25 per credit hour. Periodically the college will hold workshops designed to prepare the student for Special Examination for Course Credit. Participation in these workshops requires an additional fee. Participation in these workshops is not required to take a Special Examination for Course Credit.
• Payment of the fee for Special Examination of Course Credit must be made prior to the administration of the exam.
• No money will be refunded if any examination is failed.
• For more information about Special Examinations for Course Credit see the Program Coordinator.

Enrollment

Absence from College/Readmission

Degree-seeking students in good academic standing who must discontinue their studies for a brief time will be considered eligible to re-enroll in future semesters, as long as they return after no more than two consecutive regular semesters (not including summer sessions), and do not take courses at another institution during that time without prior approval from the College. (For procedures to take courses with permission during a time of absence, see Courses Taken at Other Institutions.)

Students who are non-degree-seeking (special students), who are on suspension, who take courses at another institution without prior approval, or who are absent from studies for more than three consecutive regular semesters (not including summer sessions), must re-apply for admission to the College.

Students wishing to return after an absence of no more than two consecutive regular semesters should check the Semester Schedule of Classes for advisement dates, and make an appointment with their advisor.

Academic Load

A semester hour consists of one hour of recitation with two preparation hours per week. Twelve semester hours per semester constitute a minimum full-time academic load. The normal load is 16 hours per semester thus making 64 credit hours in four semesters (two years). The normal summer load is six semester hours of credit for each term with 12 semester hours for the summer session.

A student wishing to register for more than 19 during the fall or spring semester or 14 hours during the summer semester, including non-Blue Ridge Community and Technical College courses, must complete the Request to Register For More Than 19/14 Hours form and gain the signature of his or her Academic Advisor and Program Coordinator. The student must currently be carrying a 3.0 or higher overall grade point average and demonstrate evidence that current and previously enrolled courses have been successfully completed. In no case may a student enroll for over 23 hours per semester. Any exceptions to this rule must be appealed to the Blue Ridge Community and Technical College Admissions and Credits Committee with documentation and support from the Academic Advisor and the student who desires this exception.

Academic Probation

At the end of each grading period, each student’s Blue Ridge Community and Technical College and cumulative grade point average are calculated. The calculation is determined by dividing the number of earned quality points by the number of quality hours. In the computation of the Blue Ridge Community and Technical College and cumulative grade point average, a grade of Incomplete will not be included in the quality hours. When the grade of ‘I’ is replaced by a passing or failing grade, the student’s grade point average will be revised by Enrollment Management.

A student whose institutional GPA or cumulative GPA falls below a 2.0 in any semester will be placed on probation. If the student fails to raise their institutional and cumulative GPA’s above 2.0 the student will be continued on probation. To be removed from probation, a student must attain BOTH a 2.0 Blue Ridge Community and Technical College GPA and a cumulative GPA (includes course work attempted from other institutions).

Once a student is continued on probation, they are required to maintain an institutional semester GPA of above 2.0. If during any semester, their semester GPA drops below a 2.0 the student will be suspended for one semester (two semesters for second suspension). During a period of academic suspension, no credits earned at another institution will be accepted at Blue Ridge Community and Technical College. If students are suspended at the end of the spring semester, they are eligible to take summer
courses to attempt to raise their GPA. The student will continue on probation for the summer term but will need to bring their institutional and cumulative GPA’s above a 2.0 to be eligible to register for fall.

The student who has been suspended from the College for the first time must re-apply for admission after one semester by completing an application for admission. The student who has been suspended from the College for the second time must apply for readmission after one academic year by completing an application for admission. Students receiving federal financial aid must also adhere to a satisfactory academic process requirement set forth by Financial Aid.

**Enrollment Verification**

Students requiring verification of enrollment for insurance or other purposes can use the enrollment verification form and submit to the Enrollment Management Office.

**Grading**

**Academic Forgiveness Policy**

The academic forgiveness policy does not alter, change, or amend any other existing policies at Blue Ridge Community and Technical College and is formulated to be consistent with Series 22 of the West Virginia Council for Community & Technical Education and supersedes all previous academic forgiveness policies at Blue Ridge Community and Technical College.

Academic forgiveness is intended for the student who is returning to college with a grade point deficiency. A student readmitted after July 1995 may be eligible for academic forgiveness unless the student has been placed on final academic suspension A student who has incurred three academic suspensions from any institution of higher education is on final academic suspension and does not qualify for academic forgiveness. However, a student on final suspension may appeal this decision to the Blue Ridge Community and Technical College Admissions and Credits Committee, according to procedures in the section on “Academic Suspension” in this Catalog. If the third suspension is repealed, the student may apply for forgiveness by submitting a written request to the registrar, as established in this policy.

This policy covers only those students who have not been enrolled as a full-time student (12 or more semester credit hours) at any institution of higher learning during the four consecutive academic years immediately preceding the readmission semester. This policy is limited to students who have not yet been awarded their first academic degree. Academic forgiveness will be granted only once for any student. To be eligible for academic forgiveness, a student who does not qualify for readmission because of a low GPA may be admitted to the College and placed on academic probation. The academic forgiveness policy may be applied after a readmitted student has earned twelve credit hours that apply toward graduation with a minimum GPA of 2.0. These twelve hours must be earned at Blue Ridge Community and Technical College. A student desiring academic forgiveness must complete an Academic Forgiveness Form and file it in the Registrar’s Office. This request must certify that the applicant has not been enrolled as a full-time student (twelve or more credit hours) in any institution of higher learning during the four consecutive academic years immediately preceding the readmission semester. If the student has attended any institution of higher education on a part-time basis during the specified four-year period, the student must have earned at least a 2.0 GPA in all course work attempted.

The Academic Forgiveness Request form requires the student to indicate whether he or she wishes to exclude from the GPA calculation (1) all F and IF grades; or (2) all F, IF, and D grades earned prior to the four consecutive academic years immediately preceding the beginning of the readmission semester. This includes those grades appearing as transferred grades on the official transcript. If a student chooses to have all D grades excluded from the GPA calculation, it is with the understanding that the courses for which the D grades were earned cannot be used to satisfy any requirements for graduation. When and if all prerequisite conditions have been met, academic forgiveness will be granted upon the successful completion of twelve credit hours of courses numbered 100 or above with a minimum GPA of 2.0. The Registrar will then officially calculate the student’s current GPA. However, no grade will be removed from the permanent record. The College is not bound by the decision of any other institution to disregard grades earned in college courses. Similarly, students should be aware that other institutions may not recognize academic forgiveness extended by Blue Ridge Community and Technical College.
Final Examination

The policy of the College is to require that final examinations be given at the end of each semester. Final exams are to be given during finals week during the regularly scheduled meeting time.

Grade Point Average

A student’s grade-point average is computed on all work that a student has attempted for college credit (including Blue Ridge Community and Technical College credits and transfer credits). Courses with a grade of W, courses taken on a pass/fail or audit basis, and Academic Foundations courses are not considered courses attempted for college credit in the computation of a student’s grade point average. Quality points are based on the point value per semester hour multiplied by the number of hours of course work attempted. A student taking a three-hour course and receiving a grade of C would earn 6 quality points. (C = 2 quality points times 3 hours.) To compute a grade point average, divide the total quality points accumulated by the total credit hours attempted for which college credit is given toward graduation (e.g., 220 quality points accumulated divided by 88 credit hours attempted for college credit = (220/88) = 2.50 GPA.

Grade Reports

Midterm and final grade reports follow the normal grading system. Midterm and final grades are available on BRIDGE.

*Not used in computation of grade point average.
Auditing Courses (AU grade)

A student may initially register for a course as an auditor. Declaration of a change in a course from credit status to audit status must be processed within the first 15 class days (Monday–Friday) of a fall or spring academic session or within the first three class days (Monday–Friday) of a summer session. Any later change must be appealed to the Blue Ridge Community and Technical College Admissions and Credits Committee. An auditor is expected to comply with the instructor’s attendance policy. Regular College fees are charged for persons auditing a course. No credit is awarded for an audited class.

Incomplete Grades (I grade)

A grade of incomplete may be given to a student who has satisfactorily completed most of the requirements for a course, but because of illness or other extenuating circumstances, has not completed all of the requirements. Students receiving an incomplete must confer with the instructor, prior to the end of the semester, to determine the exact deficiencies that are to be made up within the next semester. If the student is not available to meet with the professor prior to the end of the semester for which the incomplete grade is sought, the student must consult with the instructor early in the following semester to determine the requirements and the timetable for completing the work for the course. When the work has been completed, the instructor must complete and return a Grade Change form to Enrollment Management with the new grade. Incomplete grades issued during the fall semester must be submitted no later than the day final grades are due for the following spring semester. Incomplete grades issued during the spring semester must be submitted no later than the day final grades are due for the following fall semester. Incomplete grades issued during any summer session must be submitted no later than the day final grades are due for the following fall semester. If the incomplete is not made up in accordance with this time schedule, the grade automatically becomes an IF. When an incomplete grade is changed, the student’s grade point average is recomputed. Any exceptions to these procedures must be submitted to the Blue Ridge Community and Technical College Admissions and Credits Committee.

Pass/Fail (P/F grade)

Students may choose to take elective courses on a pass/fail basis instead of the regular grading system, in accordance with the following:

1. Electives shall be defined as courses not directly required for a degree. Thus, required electives within the major field of concentration would be excluded from the pass/fail option. In the event of change in major fields, the course previously taken on a pass/fail option if applicable to the new major field shall be substituted by approved courses. Required general study courses also will be excluded from the pass/fail option. The ultimate responsibility for correct scheduling rests with the student.
2. A passing grade in the pass/fail option will be equivalent to the normal passing range of A through D in the conventional system.
3. All students are eligible for the pass/fail option with the exception of those currently on academic probation.
4. Students will be limited to 24 hours of pass/fail options, with not more than one course to a maximum of four credit hours being taken during one session.
5. A student must make a declaration for the pass/fail option by the tenth class day of the semester. This decision will be final.

Withdrawal

Add/Drop Period
The first five class days of the fall and spring semester, and the first four days of summer are known as the Add/Drop period. During this period, classes may be added or dropped from the student’s schedule via BRIDGE. A course dropped during this period will not appear on the student’s transcript. The student is not required to gain the Academic Advisor’s approval for any classes added or dropped from his or her class schedule.

**Withdrawal from a Course**

A student may withdraw from a class during the dates posted on the Academic Calendar for each term or part of term. A grade of W will appear on the student’s transcript. A W grade does not affect the grade point average (see Grading System in this section). Too many W grades may affect a student’s eligibility for future financial aid (see Satisfactory Academic Progress Policy in the Scholarships and Financial Aid section).

**Procedure to Withdraw from a Course**

1. A student wishing to withdraw from a course after the Add/Drop period must submit a completed Withdrawal Form to Blue Ridge Community and Technical College Enrollment Management Office.
2. A completed Withdrawal Form includes the signature of the instructor of the course being dropped, Student Affairs, and Financial Aid.
3. Failure to submit the completed Withdrawal Form by the deadline will result in the grade of IF or F (see Grading System in this Section).
4. There is no refund available for a partial (one or more, but not all classes) withdrawal.

**Complete Withdrawal**

A student wishing to completely withdraw from the College for all enrolled classes may do so until 4 p.m. on the last class day of each semester.

**Procedure to Completely Withdraw**

1. A Withdrawal Form requires the signature of various campuses offices verifying that the student does not have any outstanding debt or obligation.
2. The completed Withdrawal Form must be returned to the Blue Ridge Community and Technical College Enrollment Management Office. Students who discontinue attending class without following the proper withdrawal procedures will receive a grade of F or IF in the course(s) (see Grading System in this Section).
3. A refund of tuition may be available if the Withdrawal Form is processed during the designated refund period for each semester (see Refund Policy in the Expenses Section of the Catalog).

**Summary of Withdrawal Dates**

*Withdrawal from a Course during the Add/Drop Period*

<tr>
<td>REFUND</td>
<td>Potentially, depending on the total registered credit hours (full versus part-time tuition)</td>
</tr>
</tbody>
</table>

*Withdrawal from a Course after the Add/Drop Period*
**ACTION** Withdraw from a course(s)

**DATE** Sixth class day through Friday of the twelfth class week of the fall and spring semesters

**GRADE** W

**REFUND** No refund

*Complete Withdrawal*

**ACTION** Completely withdraw from the College for all enrolled classes

**DATE** Sixth class day through the last class day of each semester

**GRADE** W

**REFUND** Potentially, depending on the effective date of the Request for Withdrawal From College form

The withdrawal procedure is incomplete until all necessary signatures have been secured and the appropriate forms returned to Enrollment Management by the specified time stated in the current academic calendar. Any counseling provided to a student from any employee of the College, which is at a variance with established College policies, must be confirmed by the Director of Enrollment Management. Although a student may receive advice from any agent of the College, the final responsibility for a decision concerning withdrawal rests with the student, in consultation with the course instructor and Academic Advisor, in accordance with College policies. Prior to withdrawing from a course, those students receiving financial aid should refer to the *Satisfactory Academic Progress Policy in the Scholarships and Financial Aid Section of this Catalog.*

**Appealing a Grade**

In order to successfully appeal a grade, a student must offer convincing arguments that good cause exists for mandating a change of grade. A grade may be appealed exclusively for the following reasons: discrimination, error in calculation, or that the grade was awarded in an arbitrary or capricious manner. A copy of the Blue Ridge Community and Technical College Grade Appeal Policy and procedures to follow in order to appeal a grade may be obtained from the Blue Ridge Community and Technical College Student Handbook available online at www.blueridgectc.edu.

**Repeating Courses**

A student may not repeat a course or courses for credit where the original grade was a C or better. Variable credit courses may be repeated until the maximum hours have been earned.

**60 Hour Repeat Rule**

A student who earns a D, F, or IF grade in any course completed no later than the semester or summer term that the 60th semester hour is attempted (including transfer hours) may repeat the course prior to receiving an associate degree. The course(s) must be repeated at Blue Ridge Community and Technical College. For each course, the original grade of D, F, or IF shall be disregarded from the GPA, and the subsequent grade shall be used for determining the student’s GPA. The original grade shall not be deleted from the student’s record. If the D, F, or IF is completed after the 61st semester hour is attempted (including transfer hours) both grades will be calculated into the student’s GPA.

**Transcripts**

Transcripts are released only upon written request from the student with the student’s signature and printed name plainly shown. E-mail requests cannot be accepted. A transcript may be requested from the:
The request must include your name, ALL previous names, address, phone number, social security number, dates of attendance, and graduation date (if applicable). Include the COMPLETE address to which the transcript should be sent. The first transcript EVER requested is free. The FEE for each additional transcript is $5.00. A check should be made out to Blue Ridge CTC. Please do not send cash. Regular transcripts require a minimum of 3 working days for processing.

Emergency Transcripts

Emergency transcripts are $15.00 each for 24 hour processing in our office: if we receive your $15 payment no later than noon on a business day, we will have your transcript in the mail to its recipient on the very next business day.

Please note that the 24-hour time frame does NOT mean that the recipient will have it in 24 hours—we have no control over the U.S. Mail or other delivery systems. Transcripts are sent 1st class mail. For Fed Ex, UPS, etc., you must include a pre-paid, preaddressed mailing envelope.

24-Hour Faxed Transcripts

There must be a signed request by the student. Faxed transcripts are unofficial. Faxed transcripts are $15.00 each. Payment must be received before the transcript is faxed. In addition to providing the fax number the transcript is to be sent to, provide a phone number for contact in case of problems!

Financial Obligations

All financial obligations must be reconciled before a transcript will be released.

Attention

Transcripts picked up by students will be stamped ISSUED TO STUDENT. Such a transcript may not be acceptable to the person or institution receiving it.

Graduation

Application for Graduation for Associate Degrees

Students MUST apply for graduation. For associate degrees, students within two semesters of graduation should check with their academic advisor to begin the graduation application process. Generally, students wishing to graduate in May MUST apply for graduation by early October of the previous year. Students wishing to graduate in August or December MUST apply for graduation by early March of that same year. Specific deadlines for graduation application are listed in the Academic Calendar located in the Blue Ridge Community and Technical College Catalog or online at www.blueridgectc.edu.

Application for Graduation for Certificate Degree Programs

Students must apply for graduation. For certificate programs, students within one semester of graduation should check with their academic advisor to begin the graduation application process.
Ultimately, it is the student’s responsibility to initiate the graduation application and evaluation process. Failure to apply for graduation in a timely manner could result in the postponement of graduation for the student.

**Minimum Grade Point Average**

A minimum 2.0 grade point average (or a C average) is required for both: 1) all collegiate level course work attempted (overall GPA) and 2) all Blue Ridge Community and Technical College course work attempted (institutional GPA).

**Minimum Semester Hours**

The minimum number of semester hours for an associate’s degree is 60 semester credit hours of courses numbered 100 and above. The required number of semester hours for each individual associate degree is listed in the Associate Degree Programs section of this catalog. The minimum number of semester hours for a certificate degree program is 30 semester credit hours of courses numbered 100 and above.

**Residence (College) Credit Hours Required**

For an associate’s degree, a student must complete at least 24 credit hours of course work institutionally, with the last 12 hours of course work being completed at Blue Ridge Community and Technical College. For the Board of Governors, Occupational Development, and Technical Studies degrees, a student must complete at least 12 credit hours at a regionally accredited institution and at least 3 credit hours at Blue Ridge Community and Technical College. For a certificate degree, a student must complete at least 12 credit hours of course work at any regionally accredited institution of higher education.

**Student Support Services**

**Bookstore**

Blue Ridge Community and Technical College has a dedicated bookstore located on the main campus. Students can purchase textbooks in the bookstore and can also order online through the website at www.blueridgectc.edu. Other items are also sold within the bookstore including Blue Ridge Apparel, software, study aids, etc. The current bookstore hours are Monday – Thursday from 10 am – 6 pm Friday 10 am – 4 pm. Extended hours may be available throughout the semester for book buy back and sales.

Barnes and Noble Blue Ridge CTC Book Order Website

**Clubs and Organizations**

Blue Ridge Community and Technical College has several clubs and special interest groups which meet the needs of a diverse student body. Getting involved with student clubs, organizations, and activities is a great way to make a network of friends. Making a connection to the College community is one factor that may increase the success of students in their college career as well as in future endeavors. All clubs and organizations are managed by the Student Government Association (SGA) and the Office of Student Success. If you are interested in forming a new club or organization you may do so by contacting the Office of Student Success or an SGA executive board member.

*Listing may include inactive clubs and organizations*
Computer Accounts

All registered students are assigned a computer account upon registration. Students are required to obtain their account information over BRIDGE. Computers accounts allow students access and use of the Internet, email and various software in computer labs. College computers cannot be accessed without a username and password. For more information, visit the Information Technology Services Web site at www.blueridgectc.edu.

Disability Support Services

Blue Ridge Community and Technical College is committed to “nondiscrimination” on the basis of disability in the areas of employment, program accessibility, admissions, treatment of students, academic adjustments, financial aid, employment assistance to students, and in nonacademic services. The Office of Student Success works with faculty and staff, as well as a number of community agencies, to arrange for assistance in obtaining appropriate accommodation. The College is committed to providing reasonable accommodations within local, state, and federal regulations to ensure that qualified students with disabilities are able to enjoy the same rights and assume the same responsibilities as any other student. Students with disabilities will need to provide the Student Success Counselor with one of the following documentation in order to receive accommodations:

- 504 plan
- Individual Education Plan (IEP)
- Psychological Evaluation

Questions about Disability Support Services should be directed to the Office of Student Success.

BRIDGE Student ID

Card Blue Ridge Community and Technical College students, upon enrollment, are provided a BRIDGE Student ID Card. This card must be presented upon request by administrators or faculty of Blue Ridge Community and Technical College for identification purposes. A $5.00 fee is charged for the replacement of this card. Students are required to carry this card at all
times. The BRIDGE card is property of Blue Ridge Community and Technical College and is nontransferable. Use of this card constitutes acceptance of the terms and conditions in effect at the time of use. Report lost, stolen, or found cards immediately to the Office of Student Success at 304-260-4380.

**Martinsburg-Berkeley County Public Library**

Blue Ridge Community and Technical College and the Martinsburg-Berkeley County Public Library have formed a partnership to provide library services for our students. Students must request a library card and create a PIN to use materials and databases.

**Phi Theta Kappa**

Established by Missouri two-year college presidents in 1918, Phi Theta Kappa International Honor Society serves to recognize and encourage the academic achievement of two-year college students and provide opportunities for individual growth and development through honors, leadership and service programming. Today, Phi Theta Kappa is the largest honor society in American higher education with more than 1.3 million members and 1,200 chapters located in 50 United States, U.S. territories, Canada and Germany. In 1929, the American Association of Community Colleges recognized Phi Theta Kappa as the official honor society for two-year colleges.

The Beta Omicron Delta Chapter of Phi Theta Kappa at Blue Ridge Community & Technical College initiated its first members in the spring of 2006. To be eligible to join, a student must have a 3.5 GPA. The student must maintain a 3.25 GPA to remain in good standing in the society.

**Student Government Association**

Blue Ridge Community and Technical College Student Government Association (SGA) provides students with the opportunity of participation in the direction and government of the College. SGA also works to protect the rights of students, and to initiate, direct and promote student activities designed to enhance the welfare of the entire student body. This organization is advised by the Office of Student Success and a faculty advisor. Every student is considered a member of SGA; however, only students who sign up for the 1 hour class credit are given voting privileges on SGA agenda items, with the exception to election of officers. Student elections are held each April and are open to the entire student body to vote or to run for an officer position. In order to be an officer, students must maintain the appropriate GPA set forth in the SGA Constitution, be in good standing and be registered for at least 6 hours of class credit at Blue Ridge Community and Technical College. Various chairs are appointed by the officers and regularly scheduled meetings are held. The SGA oversees all clubs and organizations at Blue Ridge Community and Technical College.

**Career Services**

Blue Ridge Community and Technical College operates Career Services as a division of the Office of Student Success. Career Services is available to all students who are interested in career counseling or are in need of assistance with their job search. Career Services provides various methods to prepare students that are entering the workforce. Services offered include: cover letter and resume assistance, resume-building techniques and workshops, mock interviews, job placement in the form of on
campus/off campus interviews and holding an annual career fair that is open to students, alumni, and the general public. To encourage and assist students with finding placement in today’s very competitive job market, Career Services offers College Central, which is a free service for students to search for job opportunities and post resumes for employers to review. Career Services also offers the Kuder Assessment test, which enables students to explore other fields of study/job markets. In addition, Career Services is involved with the Federal Work Study Program and places students at various non-profit organizations throughout the surrounding community. To find out more about what Blue Ridge Community and Technical College’s Career Services can do for you, please contact the Career Services Counselor.

**Emergency Situations/Student Messages**

Blue Ridge Community and Technical College will only contact students in class in emergency situation. Should a situation occur that you are not able to attend class for a long period of time; students are encouraged to contact the Office of Student Success to document the situation. The Director of Student Success will work closely with instructors to ensure student success during the time of the emergency.

**E2 Campus – Emergency Alert System**

BE IN THE KNOW! Blue Ridge Community and Technical College offers the E2 Campus Alert System to notify students of emergency situations (emergency closings, etc). This system will not be used to notify students of campus events or the academic calendar. Students have the choice whether or not to participate in this system. Blue Ridge Community and Technical College highly encourages students to sign up for text messaging and/or email notifications. Visit our website for more information and to sign up for notifications (www.BlueRidgeCTC.edu).

**Certification**

**Cisco CCDA**

**Vendor Certification Tracks**

Several course offerings in our Information Technology, Office Technology, and Computer Applications Specialist program curricula are directly aligned to industry-level certification exams. These courses not only allow you to earn credit toward your degree or certificate, they also prepare you to take a targeted vendor exam, and earn certification to validate your knowledge and skills to a potential or current employer. For detailed information on specific exams or certifications visit the CompTIA®, Microsoft®, Pearson Vue or Certiport websites for objectives, skill sets, and sample questions. Below is a list of courses that corresponds to a professional exam.

**Program Requirements**

These six courses individually lead to specific Cisco Network certifications. Combined, they encompass all of the material needed to obtain the Cisco Certified Design Associate certification.
Vendor Certification Tracks

Several course offerings in our Information Technology, Office Technology, and Computer Applications Specialist program curricula are directly aligned to industry-level certification exams. These courses not only allow you to earn credit toward your degree or certificate, they also prepare you to take a targeted vendor exam, and earn certification to validate your knowledge and skills to a potential or current employer. For detailed information on specific exams or certifications visit the CompTIA®, Microsoft®, Pearson Vue or Certiport websites for objectives, skill sets, and sample questions. Below is a list of courses that corresponds to a professional exam.

Program Requirements

These five courses lead to the Cisco Certified network Associate (CCNA) certification. Topics covered in these courses include; the ability to install, configure, operate, and troubleshoot medium-size routed and switched networks, including implementation and verification of connections to remote sites in a WAN.

- CNET 101 - Intro to Networking & Telecomm (3)
- CNET 131 - Network Fundamentals (4)
- CNET 141 - Routing Protocols and Concepts (4)
- CNET 231 - LAN Switching and Wireless (4)
- CNET 241 - Accessing the WAN (4)

Program Requirements

This single course maps to the CompTIA Security+ certification exam.

- IT 276 - Security+ (3)

**Dental Assisting Program**

This 60 hour Dental Assisting Program prepares students for entry level positions in a variety of health care settings including dentist offices, hospitals and other similar facilities, familiarizing the student with all areas of pre-clinical dental assisting and training in the professional skills required to function as an assistant in the dental practice. It covers the history of dentistry and dental assisting; introduction to the dental office; the legal aspects of dentistry and dental assisting; policies and guidelines. Clinical aspects of oral anatomy, dental equipment, tooth structure, primary and permanent teeth, oral cavity and related structures, proper patient positioning, dental hand-pieces, dental anesthesia, sterilization and asepsis. This program does not include a national or state certification objective which in most states requires 1 to 2 years of training or education.

This course is eligible for college credit after successful completion of the program.
Fee: $1,199 (Textbooks included)

Course Contact Hours - 60 hrs.

**EKG Technician Certification Program**

This comprehensive 60 hour EKG Technician Certification Program prepares students to function as EKG Technicians and to take the American Society of Phlebotomy Technician (ASPT) - Electrocardiograph (EKG) Technician exam and other National Certification Exams. This course will include important practice and background information on anatomy of the heart and physiology, medical disease processes, medical terminology, medical ethics, legal aspects of patient contact, laboratory assisting, electrocardiography and echocardiography. Additionally, students will practice with equipment and perform hands on labs including introduction to the function and proper use of the EKG machine, the normal anatomy of the chest wall for proper lead placement, 12-lead placement and other clinical practices.

This course is eligible for college credit after the successful completion of the program.

Fee: $999 (Textbooks included)

Course Contact Hours - 60 hrs.

**IC3 (Internet and Computer Core Certification®)**

Vendor Certification Tracks

Several course offerings in our Information Technology, Office Technology, and Computer Applications Specialist program curricula are directly aligned to industry-level certification exams. These courses not only allow you to earn credit toward your degree or certificate, they also prepare you to take a targeted vendor exam, and earn certification to validate your knowledge and skills to a potential or current employer. For detailed information on specific exams or certifications visit the CompTIA®, Microsoft®, Pearson Vue or Certiport websites for objectives, skill sets, and sample questions. Below is a list of courses that corresponds to a professional exam.

**Program Requirements**

This single course maps to the IC3 certification exam.

- CAS 111 - Information Literacy (3)

**MCAS (Microsoft® Certified Application Specialist)**

MCSA (Microsoft® Certified Systems Administrator)

Vendor Certification Tracks

Several course offerings in our Information Technology, Office Technology, and Computer Applications Specialist program curricula are directly aligned to industry-level certification exams. These courses not only allow you to earn credit toward your degree or certificate, they also prepare you to take a targeted vendor exam, and earn certification to validate your knowledge and skills to a potential or current employer. For detailed information on specific exams or certifications visit the CompTIA®, Microsoft®, Pearson Vue or Certiport websites for objectives, skill sets, and sample questions. Below is a list of courses that corresponds to a professional exam.

Program Requirements

These five courses individually lead to specific Microsoft certifications. Combined, they encompass all of the material needed to obtain the Microsoft Certified Systems Administrator Security certification.

- IT 204 - Windows Fundamentals (3)
- IT 270 - Installing, Configuring, & Administering Windows Desktop Operating Systems (3)
- IT 289 - Planning and Maintaining a MS Windows Server Infrastructure (3)
- IT 290 - Managing & Maintaining a Microsoft Windows Server (3)
- IT 291 - Implementing, Managing, and Maintaining a MS Windows Server Network Infrastructure (3)

Medical Billing and Coding Program

This combined 70 hour billing and coding course offers the skills needed to solve insurance billing problems, how to manually file claims (using the CPT and ICD-9 manual), complete common insurance forms, trace delinquent claims, appeal denied claims and use generic forms to streamline billing procedures. The course covers the following areas: CPT (Introduction, Guidelines, Evaluation and Management), specialty fields (such as surgery, radiology and laboratory), ICD-9 (introduction and guidelines) and basic claims processes for medical insurance and third party reimbursements. Students will learn how to find the service and codes using manuals, (CPT, ICD-9 and HCPCS). After obtaining the suggested practical work experience (6 months to 2 years), students who complete this course could be qualified to sit for the American Academy of Professional Coders (AAPC) - Certified Professional Coder Exam (CPC or CPC-H Apprentice); the American Health Information Management Association (AHIMA) Certified Coding Associate (CCA) exam; and/or other National Certification Exams.
This course is eligible for college credit after the successful completion of the program.

Fee: $1,299 (Textbooks included)

Course Contact Hours - 70 hrs.

**Pharmacy Technician Program**

This comprehensive 60 hour course will prepare students to enter the pharmacy field and to take the Pharmacy Technician Certification Board's PTCB exam. Technicians work in hospitals, home infusion pharmacies, community pharmacies and other health care settings - working under the supervision of a registered pharmacist. Course content includes medical terminology specific to the pharmacy, reading and interpreting prescriptions and defining drugs by generic and brand names. Students will learn dosage calculations, I.V. flow rates, drug compounding, dose conversions, dispensing of prescriptions, inventory control and billing and reimbursement.

This course is eligible for college credit after the successful completion of the program.

Fee: $999 (Textbooks included)

Course Contact Hours - 60 hrs.

**Phlebotomy Technician Program**

This 90 hour Phlebotomy Technician Program prepares professionals to collect blood specimens from clients for the purpose of laboratory analysis. Students will become familiar with all aspects related to blood collection and develop comprehensive skills to perform venipunctures completely and safely. Classroom and lab work includes terminology, anatomy and physiology; blood collection procedures; specimen hands-on practice; and training in skills and techniques to perform puncture methods. Note: There is no outside externship rotation included with this program.

This course is eligible for college credit after the successful completion of the program.

Fee: $1,599 (Textbooks included)

Course Contact Hours - 90 hrs.

**Associate of Arts**

**Liberal Arts, A.A.**

The Associate of Arts in Liberal Arts is ideal for students, who seek a broad-based education, plan to continue their education at four-year institutions, want to increase their opportunities for career advancement, and/or desire some flexibility in course selection to suit their specific needs and interests. The skills and competencies mastered in the liberal arts degree are applicable to a variety of careers. The Associate of Arts in Liberal Arts sets students on a path to gain the skills most valued by employers. According to a wide variety of sources - including the US Departments of Labor and Education, the American Association of Colleges and Universities, and major corporations - to be successful in the world of work, potential employees must be able to communicate clearly, work with others, think critically, and appreciate diversity. All these skills can be attained through the Liberal Arts degree’s coursework.

- Choose ANY CREDITED courses from the College Catalog (22)

Subtotal Credit Hours Required 22

Note(s):

Each course can only be used to fulfill one requirement.

Students who intend to transfer out-of-state should work with their academic advisor to determine the appropriate course selections based on their intended major and potential transfer institutions.

Associate of Applied Science

Accounting, A.A.S.

An Accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include performing such activities as recording receipts and disbursements and preparing state and federal reports. The accountant may prepare reports and statements on a computer or manually. Accounting paraprofessionals are the organizations financial record keepers. Responsibilities include updating and maintaining accounting records, processing expenditures, receipts, payables, receivables, and payroll. They may also analyze, verify, prepare and communicate financial information. An accounting paraprofessional monitors and controls various types of electronic data processing equipment used to process accounting data.

## Business Core
The Associate of Applied Science Degree in Applied Technology is a broad-spectrum technical studies degree program designed to accommodate the transfer of credit for students from a variety of technical, trade, and skills-based backgrounds. It is a useful option for individuals who wish to earn an applied degree, and who have been trained in areas such as carpentry, automotive, masonry, agriculture, information technology, or other technical trades.

Students complete 12 hours of required general education courses, as well as 15 hours of coursework from restricted content areas. Technical electives used to complete the program of study can be a combination of credits earned from previous college coursework, trade-based training, or vocational studies, and will be evaluated on a case-by-case basis. Additional technical electives can be selected by the student under the guidance of his or her academic advisor.

Student may not complete a Board of Governors AAS and this degree.

Baking and Pastry, A.A.S.

Blue Ridge CTC Culinary Academy’s Programs are designed to provide students with the practical knowledge and skills necessary to ensure successful employment in an entry to mid-level position within the food service and hospitality and tourism industry through a certificate or degree program.

Students will learn baking essentials which include a wide variety of classical and modern dessert techniques and presentations along with baking fundamentals from scaling ingredients to designing and constructing elaborate centerpieces, along with courses that build on immersing the student into all aspects of culinary foundations such as nutrition, safety and sanitation, origins of food, food history, food cost, product efficiency, molecular gastronomy, speed, attention to detail and culinary artistry. Practical lab experiences will help to complete the well rounded student for entry into the workforce. Students will be able to experience the flow of their product from creation to service in this degree program.

Students in the Culinary Art Programs are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.
NOTE: Blue Ridge CTC Culinary Academy’s (Food Service Retail Management and Baking and Pastry) concentrations require students to apply for admission at Blue Ridge CTC. Credits from the Culinary Arts Program at James Rumsey certificate program may be transferred to Blue Ridge’s CTC Culinary Academy for those who wish to pursue an associate of applied science degree pathway in Food Service Retail Management and or Baking and Pastry.

Board of Governors, A.A.S.

The Board of Governors A.A.S. requires 60 credit hours, which includes a general education core of 21 credit hours and 39 credit hours of general electives. The structure of the degree assures flexibility in program design to meet the individual needs of adult students. The required general education courses assure the development of essential skills and competencies necessary for an associate level graduate. The general electives category allows students to demonstrate and document a defined occupational proficiency.

Students are encouraged to explore various options for obtaining credit for prior learning experiences including standardized exams, challenge exams, credential validation, and portfolio credit. Students who choose to earn credit for college-level learning acquired through professional work experience or other life experiences must complete CGEN 110 - Portfolio Development I (2) and CGEN 111 - Portfolio Development II (1), ENGL 101 - Written English (3), must be completed with grade of C or better before registering for CGEN 110. There is a $300 fee to submit a portfolio. There is a $10 per credit fee for posting credits to the transcript. The portfolio provides the opportunity for equating documented, college level, experiential learning to college credit. College courses successfully completed at regionally accredited institutions may be transferred into the program and applied toward the 60-credit requirement.

Students in the Board of Governors A.A.S. Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated remedial courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

• SOCI 203 - General Sociology (3)
• ART 103 - Introduction to Visual Arts (3)
• MUSC 111 - Introduction to Music (3)

Mathematics/Science 6 Credit Hours

• MATH 101 - Introduction to Mathematics (3)
• MATH 105 - Algebra (3)
• MATH 106 - Trigonometry (3)
• MATH 107 - Applied Algebra and Trigonometry (3)
• MATH 154 - Finite Mathematics (3)
• CAHS 100 - The Human Body (3)
• CAHS 101 - General Biological Science I (4)
• CAHS 102 - General Biological Science II (4)
• CAHS 120 - Anatomy and Physiology for Health Care Professionals I (3)
• CAHS 121 - Anatomy and Physiology for Health Care Professionals Lab I (1)
• CAHS 122 - Anatomy and Physiology for Health Care Professionals II (3)
• CAHS 123 - Anatomy and Physiology for Health Care Professionals Lab II (1)
• CAHS 200 - Nutrition (3)
- CAHS 220 - Microbiology (3)
- CAHS 210 - Human Growth & Development (3)
- EDET 201 - Fundamentals of Electricity I (2)
- EDET 202 - Fundamentals of Electricity II (2)

Computer Literacy 3 Credit Hours

**Typical Courses:** Information Literacy, Understanding Computers

- CAS 110 - Understanding Computers (3)
- CAS 111 - Information Literacy (3)

**Business, A.A.S.**

The Associate of Applied Science in Business introduces students to foundational business theories and practices related to planning, communication, marketing, finance, human relations, and management. Students are exposed to the legal and ethical considerations impacting business today and develop effective communication, critical thinking and technical skills needed to succeed. The program allows students to focus on the track areas that best meet their personal and career goals while preparing for employment opportunities in administration, retail, finance, management, and entrepreneurship.

The goals of the degree program are to prepare graduates to:

- Apply business concepts to real work experiences
- Understand the legal, ethical, and regulatory environments of business
- Recognize the global impact on local business
- Perform the basic business accounting and personal finance functions
- Develop data driven problem-solving and decision-making skills
- Effectively communicate verbally and in writing
- Work as part of a team
- Understand the responsibilities of management
- Present a professional business image

Computer Application Specialist, A.A.S.

A student pursuing an Associate of Applied Science degree in Computer Application Specialist must complete the requirements for the general education core and the technology core. The student must then complete the requirements for the special track they have chosen. With the exceptional growth being experienced in the Eastern Panhandle, well-trained computer specialist support personnel are essential for business and industry. The Computer Application Specialist AAS degree provides students with the training needed for employment upon graduation.

The Executive Office track prepares students for careers in management support such as administrative assistants and office managers with an emphasis on computer skills, office technology and various computer applications. In addition to the core set of computer application courses, these students investigate Publication Design, Office Administration and Local Area Networking, as well as Business Law and Accounting courses. Students will also have the opportunity to complete additional courses in the Computer Application Specialist program as well as the Information Technology program.

The Internet Webmaster track will include the three courses that prepare students for the CIW: Certified Internet Webmaster certification which includes web page design, Internet foundations and site designer. Students will also have the opportunity to complete additional courses in the Computer Application Specialist program as well as the Information Technology program.

Students completing the Associate of Applied Science degree in Computer Application Specialist will understand and be able to demonstrate basic skills in writing, reading, math, and decision-making, basic desktop support skills, web page design skills, possess skills in business ethics, office management, and basic accounting procedures, possess skills in communication, word processing, spreadsheets, database management, presentations, publication design, and computerized accounting and successfully obtain employment within the ever-changing information technology field.

Computer Network Engineering Technologies, A.A.S.

The Computer Network Engineering program offers an associate of applied science degree, incorporating vendor certification training, for students preparing for entry-level employment or advancement in a variety of occupations, courses, and professional certificate programs within the networking field. The program will offer students a solid background in networking technology complemented by an array of certification training choices. All courses leading toward certification are taught by certified instructors.

The program offers a flexible environment where students can develop the background necessary to enter a rapidly changing and growing networking workforce and/or transfer to a four-year institution for further undergraduate education. Students in the Computer Network Engineering Technologies Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Students in this program will complete hands-on activities that will help to develop network fluency and troubleshooting skills. They complete project-based activities which will incorporate Internet research skills and electronic presentation skills to prepare for the work environment.

An internship in a networking or information technology related area is required for graduation. Students are expected to locate their internship site. Detailed information of the internship requirements and expectations is available from the student’s advisor.

Curriculum for an Associate of Applied Science in Computer Network Engineering Technologies
General Education Core

- CAHS 103 - General Physical Science (4)
- CAS 111 - Information Literacy (3)
- COMM 202 - Fundamentals of Speech (3)
- ENGL 101 - Written English (3) OR

- IT 291 - Implementing, Managing, and Maintaining a MS Windows Server Network Infrastructure (3)

Subtotal Credit Hours Required 15

Criminal Justice, A.A.S.

As the Criminal Justice field has experienced strong and rapid growth in the past decade, it is anticipated that the need for skilled workers will continue to increase. Students completing the Associate of Applied Science Degree in Criminal Justice will:

- Understand and be able to function within federal and state legal systems.
- Possess the basic skills of writing, reading for information, critical thinking, and applied mathematics necessary to be successful in the Criminal Justice field.
- Successfully complete entry level or pre-employment examinations for law enforcement agencies and correctional institutions.
- Successfully obtain employment or promotion within the criminal justice field including but not limited to:
Students in the Criminal Justice Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated remedial courses, which are not counted toward completion of the program. Blue Ridge Community and Technical College requirements regarding academic standards, student conduct, and graduation procedures also apply.

Culinary Arts, A.A.S.

Blue Ridge CTC Culinary Programs are designed to provide students with the practical knowledge and skills necessary to ensure successful employment in an entry to mid-level position within the food service and hospitality and tourism industry through a certificate or degree program.

Students will learn classical culinary techniques which include a wide variety of regional cuisines, baking fundamentals from scaling ingredients to designing and constructing elaborate centerpieces, along with courses that build on immersing the student into all aspects of culinary foundations such as nutrition, safety and sanitation, origins of food, food history, food cost, product efficiency, molecular gastronomy, speed, attention to detail and culinary artistry. Practical lab experiences will help to complete the well rounded student for entry into the workforce. Students will be able to experience the flow of their product from creation to service in this degree program.

Students in the Culinary Art Programs are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

**Culinary Arts Core**
Modern technology has made business use of computer technology essential. As technology continues to evolve and progress, there is an emphasis placed on safeguarding an organization's or a company's information. The Cyber Security program has been created to address the needs of government agencies, organizations, and the private sector within the local West Virginia community and DC Metro area. The Cyber Security program offers an Associate of Applied Science Degree, incorporating vendor certification training, for students preparing for entry-level employment or advancement in a variety of occupations and courses in Cyber Security.

The program offers students the opportunity to select one of two tracks: Network Security Hardware or Network Security Application. These two tracks will provide the student with the knowledge to enter the Cyber Security workforce and/or transfer to a four-year institution for further undergraduate education. Students will complete hands-on activities that will provide an overview of basic principles and security concepts related to active mitigation of known common threats. The curriculum discusses risk, threat, and security assessments and utilizing them to develop security policy, business continuity, disaster recovery, and incident response planning. The program also covers security methods, controls and procedures, ethics, laws, and computer forensics. In addition, the program describes the use of cryptography as a tool, software development processes, and protection. Students will develop an understanding of the information assurance progression and how they can apply this knowledge to support their organization.

Students in the Cyber Security Program are subject to the Community and Technical College's requirements for admissions, basic skills testing, and appropriate course placement, including mandated remedial courses, which are not counted toward completion of the program. Blue Ridge Community and Technical College Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Electric Distribution Engineering Technology, A.A.S.

The Electric Distribution Engineering Technology program was created through a partnership between Blue Ridge Community and Technical College and Allegheny Energy, providing educational opportunities for a field which has typically been limited to internal apprenticeship opportunities. Through this program, endorsed by the Utility Workers Union of American (UWUA) Local 102, students will learn the skills necessary to become linemen.

The Electric Line Worker program is designed to provide the technical skills required for new utility workers. Traditional academic instruction gives students an understanding of the technology fueling today’s electrical utilities, while hands-on laboratories, such as pole training areas and equipment labs, ensure that students are prepared for the job on day one.

Students seeking a fast-track to employment may enroll in the Electric Line Worker Certificate Program, which provides the fundamental skills required for employment in the electric utility field. Those seeking specific technical knowledge with a broader understanding of the electrical utility environment can pursue an Associate of Applied Science Degree. Both programs are taught by highly trained and credentialed faculty and include technical modules, hands-on laboratories, equipment training and paid internships.

Students in the Electric Distribution Engineering Technology program are subject to Blue Ridge Community and Technical College’s requirements for admission, informed consent form, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC requirements regarding academic standards, student conduct, and graduation procedures also apply.

Emergency Medical Services, A.A.S.

The Emergency Medical Services Program is a 60 credit hours Associate of Applied Science Degree Program that is designed for students who are interested in pursuing jobs in the pre-hospital setting.

Prior to application to the EMS program, all students are required to have taken the EMT-Basic course, which meets the U.S. Department of Transportation’s National Standard Curriculum for Emergency Medical Technician-Basic (EMT-B) and possess a current card. The clinical concentration within the EMS degree meets the U.S. Department of Transportation’s National Standard Curriculum for Emergency Medical Technician-Paramedic (EMT-P) training programs. Successful completion of the program qualifies the graduate to take the National Registry Examination for EMT-Paramedic. The clinical concentration of the EMS Program is designed to prepare the graduate for a volunteer or paid career as a certified EMT-Paramedic.

Admission to the Emergency Medical Services AS Program is made after admission to the College and prior to enrollment in any of the advanced clinical EMS courses in the Paramedic Program (200-level EMSP courses), and the student must complete the following and submit to the EMS Program Coordinator:

- An application to the EMS Paramedic Program,
- A photocopy of current CPR (Healthcare Provider Course) certification,
- Current EMT-Basic card from either: National Registry, West Virginia, Maryland, or Virginia,
- A photocopy of student’s birth certificate,
- Submission to the EMS Coordinator of a completed immunization record prior to participation in any EMS Practicum course,
- Submission of yearly PPD results (or chest X-ray, if appropriate),
- Successfully completed a urine drug screen and national criminal background check.

Students in the EMS Program are subject to Blue Ridge Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Entrepreneurship, A.A.S.

The Culinary Arts Entrepreneurship Associate of Applied Science degree program provides students training from an integrated mix of entrepreneurial coursework and the traditional culinary arts training necessary for business ownership in the food service industry. Students have the option to focus primarily on Baking & Pastry or Food Service Retail Management.

During the coursework, work skills developed include entrepreneurial thinking and opportunity recognition, developing a business plan, obtaining resources, managing finances, organizing and designing a food service business, successfully dealing with managerial challenges and decision making. Graduates of this program are better prepared to both operate their own food service business, and act as a manager within existing food service organizations.

**Food Service Retail Management, A.A.S.**

Blue Ridge CTC Culinary Academy’s Programs are designed to provide students with the practical knowledge and skills necessary to ensure successful employment in an entry to mid-level position within the food service and hospitality and tourism industry through a certificate or degree program.

Students will learn classical culinary techniques which include a wide variety of regional cuisines, baking fundamentals from scaling ingredients to designing and constructing elaborate centerpieces, along with courses that build on immersing the student into all aspects of culinary foundations such as nutrition, safety and sanitation, origins of food, food history, food cost, product efficiency, molecular gastronomy, speed, attention to detail and culinary artistry. Practical lab experiences will help to complete the well-rounded student for entry into the workforce. Students will be able to experience the flow of their product from creation to service in this degree program.

Food Service Retail Management students will assist in the maintenance of a functional retail operation and become exposed to front and back of the house leadership activities, critical thinking, customer service and human relations management and finally an entrepreneurial business plan exercise to launch their own food service conception.

Students in the Culinary Art Programs are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.
NOTE: Blue Ridge CTC Culinary Academy’s (Food Service Retail Management and Baking and Pastry) concentrations require students to apply for admission at Blue Ridge CTC. Credits from the Culinary Arts Program at James Rumsey certificate program may be transferred to Blue Ridge’s CTC Culinary Academy for those who wish to pursue an associate of applied science degree pathway in Food Service Retail Management and or Baking and Pastry.

Information Technology, A.A.S.

The Information Technology program offers an associate of applied science degree, incorporating vendor certification training, for students preparing for entry-level employment or advancement in a variety of occupations, courses, and professional certificate programs in information technology. The program will offer students a solid background in computer technology
complemented by a full array of vendor certification training choices. All courses leading toward certification are taught by certified instructors.

The program offers a flexible environment where students can develop the background necessary to enter the rapidly changing information technology workforce and/or transfer to a four-year institution for further undergraduate education. Students in the Information Technology Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Students in this program will complete hands-on activities that will help to develop computer fluency and transferable computer troubleshooting skills. They complete project-based activities which will incorporate Internet research skills and electronic presentation skills to prepare for the work environment. By completing these activities students will also develop a conceptual understanding of and obtain functional skills in computer hardware, networking, web development and basic programming.

An internship in an office technology related area is required for graduation. Students are expected to locate their internship site. Detailed information of the internship requirements and expectations is available from the student’s advisor.

**Mechatronics, A.A.S.**

The Mechatronics program supplies local industries with maintenance technicians, who can install, service, repair and maintain a variety of industrial automation equipment. The program is designed to prepare those who may have experience or training in a related field of study, and want to enhance their knowledge base in preparation for a mechatronics career.

Students will gain understanding of the technology utilized in modern distribution and processing industries. Hands-on laboratories, in areas such as electricity and electronics, mechanics, fluid power, motor controls, and quality controls will ensure that students are prepared for the job on day one. Computer Aided Design and Networking are included. Internships are available. The AAS program also includes advanced courses in mechanics, fluid power, programmable logic controllers and flexible manufacturing systems.

Medical Assisting, A.A.S.

The Medical Assisting program is a career-oriented program that prepares students to work primarily in ambulatory care settings under the direction of a physician. The program is comprised of clinical and non-clinical components, with lecture as well as competency based experiences in performing administrative and clinical procedures.

General education and program requirements for the Associate of Applied Science degree in Medical Assisting are for students interested in pursuing management positions in medical offices. The Certificate program for Medical Assisting is designed for
students interested in entry level positions as a medical assistant in a medical office. Both programs include a non-compensated externship experience in which students work in an actual ambulatory care setting. Externship sites may have their own requirements that students must meet prior to their externship experience.

Students in the Medical Assisting program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including necessary developmental courses, which are not counted toward completion of the program. Blue Ridge CTC requirements regarding academic standards, student conduct, and graduation procedures also apply. In addition, students in the Medical Assisting program must provide appropriate health records that include a history and physical, required immunizations, and a negative TB test prior to externship. Students must also have current American Heart Association “Healthcare Provider” CPR certification as well as First Aid certification and meet the program's technical standards.

* Students who successfully complete the program are eligible to sit for the American Medical Technologists’ national certification exam in medical assisting. In order to sit for the American Medical Technologists’ national certification exam in medical assisting, graduate must have proof of High School diploma or G.E.D.

Occupational Development, A.A.S.

The Associate of Applied Science degree in Occupational Development—Child Care Specialist is designed to provide special career training for those individuals who have completed a Registered Apprenticeship Program (RAP) in Child Development through the U.S. Department of Labor’s Office of Apprenticeship.

There is a growing need in the United States for childcare at daycare centers. Some employers are making a collaborative effort to provide dependent care for their employees by establishing centers or expanding existing ones. The demand for child care career will increase in the future as more young mothers pursue employment outside the home. Job opportunities for this degree include employment in community childcare facilities, and in individual homes.

Students in the Occupational Development Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Paralegal Studies, A.A.S.
The Associate of Applied Science Degree in Paralegal Studies is a program designed to provide students with a balance between theory and practice, enabling graduates to step immediately into opportunities in this growing area of the legal community. The program is designed to prepare individuals for employment at all levels of the law-administration, trial, appellate, and government.

Students completing the Associate of Applied Science Degree in Paralegal Studies will:

- Understand and be able to function within federal and state legal systems.
- Possess the basic skills of writing, reading for information, Critical Thinking & Learning, and applied mathematics necessary to be successful in the Paralegal field.
- Successfully complete entry level or pre-employment examinations for state institutions
- Successfully obtain employment or promotion within the paralegal field including but not limited to: law offices, investigator, claims analyst compliance officer, and legal advocate

Students in the Paralegal Program are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Physical Therapy Assisting, A.A.S.

The Physical Therapist Assisting (PTA) program is a 1 + 1 program. One year of prerequisites must be completed prior to applying for this competitive entry program. Once in the technical phase of this PTA program, it can be completed in one year plus one 5 week summer session.

This program will prepare students to sit for the national PTA licensure examination, which is required to practice in most states. In addition, this program prepares students to work in a variety of physical therapy settings including but not limited to: acute care, outpatient orthopedics, skilled nursing, rehabilitation center, and nursing home.

Currently the PTA program is operated in conjunction with Pierpont CTC and is transitioning to Blue Ridge CTC effective the Fall 2012 term.

Fall 2011/Spring 2012 students will enroll in the PTA courses at Pierpont CTC.

Fall 2012/Spring 2013 students will enroll as Blue Ridge CTC students.

Printing Technology, A.A.S.

Blue Ridge Community and Technical College (Blue Ridge CTC) and The Community and Technical College at West Virginia University Institute of Technology (CTC Tech) formed an Access Through Partnership agreement to offer courses for the Printing Technology degree.

For purposes of this agreement, the following definitions are provided:

• Degree-granting institution: The institution that has the authority to grant the specific certificate or associate degree outlined in the partnership agreement.
• Home Institution: The institution in which the student initially enrolls for general education or transfer specialization courses.
• Access through Partnership Program (ATP): The agreed-upon certificate or associate degree transfer program.
• Specialization courses: Discipline-specific courses designed for the certificate or associate degree.
• Transfer Credit: Grades of "C" or better in agreed-upon courses.

Students enrolled in the Access Through Partnership program will: Meet prerequisite requirements for courses as specified in each course, register for general education and specialization courses offered at their respective home institutions as outlined in the partnership agreement, complete a transfer to the degree-granting institution within 15 hours of anticipated graduation from the program, and conduct a graduation check with the registrar upon transfer to the degree granting institution.

**Program Description**

The associate of science degree in Printing Technology is designed to provide quality technical education to prepare technicians for the rapidly changing printing industry. The student will receive training in all of the basic skills required of the printing industry, and upon completion of the two-year program, should be qualified to enter the industry in a junior supervisory capacity directly responsible to the plant manager or supervisor. For the student wishing to pursue the plus-two baccalaureate Printing Management degree program, offered by WVU Tech, the associate program offers a well-rounded basis for advanced study.

**Program Objectives**

In addition to the learning outcomes set forth in the general education core curriculum for the associate degree, specific outcomes for this program have been established.

Upon completion of the Associate of Science degree in Printing Technology the student will be able to: design and prepare copy for publication, utilize desktop publishing software common to the printing industry, apply appropriate color theory to design and copy, appropriately bind and finish a printed document, and apply appropriate management skills for technical workers.

**Access Through Partnership Agreement Printing Technology**

Degree-Granting Institution: Community and Technical College at WVU Tech
Degree: Associate of Science, Printing Technology

Technical Studies, A.A.S.

The Blue Ridge Community and Technical College can customize this Associate of Applied Science degree for employers. Certificate programs requiring 32 credits for completion are also available.

Goals of the Technical Studies Program include:

- To increase the abilities of employees to use technology effectively and responsibly.
- To increase abilities of employees to communicate information effectively through reading, writing, speaking, and listening.
- To develop employee’s abilities to solve problems through understanding, reasoning, research, and productive teamwork.
- To assist those employed in the workforce to understand that education is a life-long process.

Degree programs implemented under this degree designation will include instruction consistent with the following components and categories.

This program is only for individuals whose employer is working with Blue Ridge Community and Technical College to ensure completion of this degree.

Subtotal Credit Hours Required 15

Note:

Electives must be taken from the General Education core competency.

Component II – Technical Core

Each program of study must include a general technical core that meets the goal of developing skills that may be applied to a variety of occupations or that may be specific to an occupation. (12)

Subtotal Credit Hours Required 12

Component III – Occupational Specialty

The component consists of technical specialty courses specific to an occupational area. Industry based education and training programs are to be converted to college credit at the ratio of 15:1 and at a rate consistent with the lab hour/credit ratio of the degree granting institution for laboratory credit. (18)

Subtotal Credit Hours Required 18

Component IV – On-the-Job Training

The component consists of a paid or unpaid OJT, internship, or practicum performed in a business or industry setting in the occupational area. The on-the-job training component is to be converted to credit hours at a ratio of 150:1 with the maximum of 2,080 contact hours allowable. A statement of the total number of contact hours experience through on-the-job training will be placed on the college record. (15)

Subtotal Credit Hours Required 15

Associate of Science in Nursing
Nursing, A.S.N.

The Associate of Science Degree in Nursing (ASN) is designed to prepare the graduate to take the National Council Licensure Examination (NCLEX-RN) for registered nurses and to enter a career as a beginning practitioner of nursing. It is intended that the courses in nursing will provide the students with an awareness of the value and dignity of people and a view of the patient as an integrated, unique individual requiring nursing knowledge and skill.

Mission Statement

The mission of the Blue Ridge Community and Technical College Associate of Science in Nursing Program is to enhance the health status of the region by educating professional nurses for entry into practice as caring and competent nurse generalists.

Student Learning Outcomes

Upon completing the Associate of Science in Nursing Program, the graduate will:

Caring

1. Provide compassionate nursing care to patients regardless of different values, beliefs, culture, and lifestyles.

Communication

2. Demonstrate appropriate verbal, non-verbal, therapeutic, professional, and technological communication skills.
3. Facilitate collaboration among all health care team members and the patient(s).

Critical Thinking

4. Use knowledge of nursing science and disease process; critical thinking skills; and evidence based findings to demonstrate proficiency in planning safe and effective patient care.

Professionalism

5. Provide nursing care according to legal, ethical and professional standards while considering the impact of economical, political, social and demographic forces.
6. Demonstrate accountability for professional growth and lifelong learning.

Therapeutic Nursing Interventions

7. Demonstrate competency in the nursing process
8. Develop an individualized teaching plan based on assessed needs.
9. Manage the care of individual patient(s) across healthcare settings.

Accreditation

West Virginia Board of Examiners for Registered Professional Nurses
101 Dee Drive • Charleston, WV 25311 • (304) 558-3596

National Accreditation

National League for Nursing Accreditation Commission, Inc.
3343 Peachtree Rd NE • Suite 500 • Atlanta, GA 30326 • (404) 975-5000
Admission to the ASN Program

Students must be enrolled at Blue Ridge CTC and make a separate application to the nursing program, once pre-requisites are completed, or will be completed by the regular semester before admission. The ASN Program is a limited admission program and selection is highly competitive and based on academic achievement. The program admits 24 students in the fall and spring semester.

1. Application to Blue Ridge CTC
   Submit application for admissions to Admissions Counselor; Submit transcripts of previous college work with a GPA of at least 2.0 on a 4-point scale.

2. Prerequisite Courses-beginning Fall 2012
   CAHS 120, CAHS 121, CAHS 122, CAHS 123, ENGL 101, CAHS 125, or CAHS 127, PSYC 203, COMM 202, and MATH 101 or MATH 105 or MATH 154.

Application for Admission to AS in Nursing (ASN) Program

Students must submit to the Nursing Program an application for admission to the ASN program for either fall or spring admission, refer to the Nursing Program website for specific details. The ASN Program is a Limited Admission Program selection is highly competitive and is based on academic achievement. See the section of the CTC Catalog under admissions; refer to the section entitled “Admission to Limited Enrollment Programs”.

Core Performance Standards

Because the Nursing Program seeks to provide a safe environment for nursing students and their patients, students will be required to demonstrate physical and emotional fitness to meet the essential requirements of the nursing program. Such essential requirements include freedom from communicable disease, the ability to perform certain physical tasks, and suitable emotional fitness.

Any appraisal measures used to determine such physical and emotional fitness will be in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, so as not to discriminate against any individual on the basis of handicap.

The essential requirements of the nursing program with examples of activities required of students during their nursing education are listed in the Essential Requirements of Nursing Programs document. This document is based on The Americans with Disabilities Act: Implications for Nursing Education. Southern Regional Education Board (March 1993), www.sreb.org.

Entrance Tests

Applicants must take the Test of Essential Academic Skills (TEAS). The testing fee is $40 and is payable in advance. Study guidelines are available for the test.

Special Requirements for Nursing Majors

Submission of completed health data requirement prior to beginning of first semester following acceptance into the program • Submission of yearly PPD results (or chest x-ray, if appropriate) and evidence of CPR certification • Undergo a criminal background check and urine drug screening • Adhere to the policies and procedures in the Nursing Student Handbook and Policy Manuals • Special fees for standardized testing and clinical courses are required in addition to tuition • Obtain physical examination and proof of immunity to communicable diseases.

Progression
In order to progress and graduate, the student enrolled in the ASN program must:

- Receive a C or better in all courses required for the nursing program;
- Maintain a minimum of 2.0 cumulative grade point average;
- Complete all course work within three years of admission into the program.

**Ratio Clock to Credit Hour**

The ratio of theory clock hour to credit hour is 1:1. For students beginning the nursing program in Fall 2012, the ratio of clinical and lab clock to credit hour is 3:1. A clock hour equals 50 minutes.

**Graduation**

Upon successful completion of the program, graduates are eligible to apply to any state Board of Nursing to take the NCLEX-RN examination. Each state has individual requirements of applicants for licensure for examination.

**Eligibility for Licensure**

The nursing law of West Virginia addresses criteria for application for licensure. The West Virginia Board of Examiners for Registered Professional Nurses has the power to deny opportunity to procure licenses through testing if the applicant has willfully committed a felony under the laws of West Virginia.

Certificate

Baking and Pastry Certificate

Blue Ridge CTC Culinary Academy's Programs are designed to provide students with the practical knowledge and skills necessary to ensure successful employment in an entry to mid-level position within the food service and hospitality and tourism industry through a certificate or degree program.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Business and Technology Certificate

The Business & Technology Certificate combines general education and business courses for the purpose of serving students studying business, office technology, and information technology. This certificate assures employers that the student has an introductory knowledge of the business environment, commonly used office technology programs, and up and coming trends affecting business and society.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Business Communications Certificate

The Business Communications Certificate degree program is designed to develop the skill set employers identify as most desirable – effective communication skills. Students build a foundation of effective written, oral, and presentation skills. Elective options within the program can then be tailored to meet students’ goals in areas ranging from marketing to computer applications.

The goals of the degree program are to prepare graduates to:

- Understand the legal, ethical and regulatory environments of business.
- Develop problem-solving and decision-making skills.
- Effectively communicate verbally and in writing.
- Present a professional business image.

**Cisco Certified Network Associate (CCNA) Certificate**

The Cisco Certified Network Associate program has been created to address the needs of businesses and organizations within the local West Virginia Community. Information Technology is a growing field in this area and the need for certified technicians is growing at a rapid rate. This program will address this need at a local level and allow for resident businesses and organizations to hire from a local pool of talent as opposed to hiring outside of the local community to address their needs. This program will provide the student with the essential knowledge to install, configure, and operate simple routed LANs and WANs and obtain Cisco™ Certified Network Associate (CCNA) certification. The student will gain knowledge of switched LAN Emulation networks made up of Cisco™ equipment. The program is a focused coverage of Cisco™ router configuration procedures, which will be mapped to exam objectives and prepare you for Cisco Exam 640-802 or for Cisco Exam 640-822 and 640-816.

Students seeking a rapid path to employment may enroll in the Cisco Certified Network Associate Certification Program, which will provide the fundamental knowledge and skills required for employment in the Networking portion of the Information Technology field. Those seeking specific technical knowledge and a broader, more marketable understanding of the networking environment can pursue the Cisco Certified Network Associate Certificate option. Both programs are instructed by highly trained and credentialed faculty and incorporate technical modules, hands-on laboratories, and equipment training.

Students in the Cisco Certified Network Associate program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC requirements regarding academic standards and student conduct also apply.

Cisco Certified Network Professional (CCNP) Certificate

The Cisco Certified Network Professional program has been created to address the needs of businesses and organizations; as well as, students within the local West Virginia community. Information Technology is a growing field in this area and the need for certified technicians is growing at a rapid rate. This program will address this need at a local level and allow for resident businesses and organizations to hire from a local pool of talent as opposed to hiring outside of the local community to address their needs.

Blue Ridge Community and Technical College is excited and proud to offer the advanced Cisco networking curriculum leading to the Cisco Certified Network Professional (CCNP) which will work in conjunction with the existing Cisco Certified Network Associate (CCNA) program. This program will provide students with the essential knowledge and experience to install, configure, operate, troubleshoot, and manage; advanced routing protocols, campus-wide enterprise networks, advanced switching technologies, network security, Voice over IP (VOIP), and Quality of Service (QoS). The program is mapped to the exam objectives for the four individual certifications required to obtain the CCNP.

Students seeking a rapid path to employment may enroll in the Cisco Certified Network Professional certification program. Those students seeking specific technical knowledge and a broader, more marketable understanding of networking can pursue the Cisco Networking Certificate option. Additionally, students may enroll in the A.A.S. degree, Computer Network Engineering Technologies in order to further augment their potential profitability. All programs are instructed by highly trained and credentialed faculty and incorporate technical modules, hands-on laboratories, and equipment training.

Students in any of the Cisco programs are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward the completion of the program. Blue Ridge CTC requirements regarding academic standards and student conduct also apply.

Computer Aided Design Certificate

The CAD/BIM program is a 30 hour training program in which students will use computer systems in the creation, modification, analysis, or optimization of a design. Computer Aided Design is the process of creating a technical drawing with the use of computer software. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. Building Information Modeling is the creation of documents necessary for the design and construction of residential and commercial buildings, and all the systems within those buildings. Students will utilize state-of-the-art industry recognized software. 3D modeling is emphasized, and equipment such as 3D printers, CNC machinery, laser engravers, and plasma cutters are included in the program to develop the link between design and production.

The certificate program is designed to be diverse, preparing students to enter a variety of CAD and CAD-related fields. Students trained in CAD/BIM may find jobs in architecture, mechanical design, surveying, civil design or geographic information systems.

**Converged Networking Certificate**

The Converged Networking certificate degree program is designed to address the needs of businesses and organizations within the local community. The field of Information Technology is growing regionally, and the need for certified technicians is advancing at a rapid rate. This course of study will provide the training required to install, configure, and operate simple routed LANs and WANs, and to obtain the Cisco™ Certified Network Associate (CCNA) certification. The program also provides the essential knowledge and skills required for employment in the Networking portion of the Information Technology field.
The student will gain knowledge of switched LAN Emulation networks made up of Cisco™ equipment. The program is a focused coverage of Cisco™ router configuration procedures, which will be mapped to exam objectives and prepare you for Cisco Exam 640-802 or for Cisco Exam 640-822 and 640-816. This program will also provide students with the knowledge to implement security on network devices, design, implement, and troubleshoot Voice over Internet Protocol (VoIP) technologies, design, implement, manage, and troubleshoot wireless, as well as, design campus and enterprise network infrastructures. These courses will be mapped to the exam objectives for the CCNA: Security, CCNA: Voice, CCNA: Wireless, and CCDA certification exams.

Students in any program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward the completion of the program. Blue Ridge CTC requirements regarding academic standards and student conduct also apply.

**Culinary Arts Certificate**
Blue Ridge CTC Culinary Academy’s Programs are designed to provide students with the practical knowledge and skills necessary to ensure successful employment in an entry to mid-level position within the food service and hospitality and tourism industry through a certificate or degree program.

Students will learn classical culinary techniques which include a wide variety of regional cuisines, baking fundamentals from scaling ingredients to designing and constructing elaborate centerpieces, along with courses that build on immersing the student into all aspects of culinary foundations such as nutrition, safety and sanitation, origins of food, food history, food cost, product efficiency, molecular gastronomy, speed, attention to detail and culinary artistry. Practical lab experiences will help to complete the well rounded student for entry into the workforce. Students will be able to experience the flow of their product from creation to service in this degree program.

Students in the Culinary Art Programs are subject to the Community and Technical College’s requirements for admissions, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC Catalog requirements regarding academic standards, student conduct, and graduation procedures also apply.

Electric Distribution Engineering Technology Certificate

TheElectric Distribution Engineering Technology program was created through a partnership between Blue Ridge Community and Technical College and Allegheny Energy, providing educational opportunities for a field which has typically been limited to internal apprenticeship opportunities. Through this program, endorsed by the Utility Workers Union of American (UWUA) Local 102, students will learn the skills necessary to become linemen.

The Electric Line Worker program is designed to provide the technical skills required for new utility workers. Traditional academic instruction gives students an understanding of the technology fueling today’s electrical utilities, while hands-on laboratories, such as pole training areas and equipment labs, ensure that students are prepared for the job on day one.

Students in the Electric Distribution Engineering Technology program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward completion of the program. Blue Ridge CTC requirements regarding academic standards, student conduct, and graduation procedures also apply.

**EMT-Intermediate Certificate**

The EMT-Intermediate Certificate is designed to prepare students to be eligible to take the National Registry EMT-Intermediate exam. The course follows the US Department of Transportation’s National Standard Curriculum. This program is not intended as a substitute for the Paramedic degree and EMT-I program courses may not be substituted into the EMSP degree program. Permission from the EMS Coordinator is required to register for this program.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

**Entrepreneurship Certificate**

The Entrepreneurial Certificate Program is a prudent investment and is recommended for anyone considering starting, buying or growing their own business. The program is comprised of two certificate tracks. Courses promote entrepreneurial thinking among students and develop relevant skills for founding and growing a small business venture. Students will have the opportunity to apply these skills by managing and operating a retail facility. Students will learn how to apply for financing, practice inventory planning, discuss employee management, and learn current customer service practices through Red Carpet Customer Service. Each student will develop and implement their entrepreneurial concept.

Students in any program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward the completion of the program. Blue Ridge CTC requirements regarding academic standards and student conduct also apply.

Forensic Science Certificate
The Certificate in Forensic Science introduces students to the many intricacies involved in applying science and technology to investigate and establish facts relating to criminal law or civil matters. The key principles of criminal forensic science and the human body are the focus of the certificate program. Students are required to select classes within criminal justice and related disciplines that provide the tools to understanding the field of forensics. Students in the program focus on learning the criminal justice system, forensics fundamentals, and criminal investigations. The Forensic Science certificate provides a path for career growth and can assist students meet their academic goals.

**Homeland Security Certificate**

The Homeland Security Certificate will introduce students to the Department of Homeland Security, domestic and international terrorism issues, and strategies for countering terrorist threats. The key principles of emergency management and disaster
planning will be presented. Students are required to select electives within the Criminal Justice course offerings that complement career and academic goals.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Mechatronics Certificate

The Mechatronics program supplies local industries with maintenance technicians, who can install, service, repair and maintain a variety of industrial automation equipment. The program is designed to prepare those who may have experience or training in a related field of study, and want to enhance their knowledge base in preparation for a mechatronics career.
Students will gain understanding of the technology utilized in modern distribution and processing industries. Hands-on laboratories, in areas such as electricity and electronics, mechanics, fluid power, motor controls, and quality controls will ensure that students are prepared for the job on day one. Computer Aided Design and Networking are included. Internships are available. The AAS program also includes advanced courses in mechanics, fluid power, programmable logic controllers and flexible manufacturing systems.

Organizational Leadership Development Certificate

The Certificate in Organizational Leadership Development focuses on the study of leadership in organizations in which students develop an understanding of how an organization operates. Students will learn how leadership is important in every organization, how change impacts the individual and the organization, and how the role of a leader is a major function of management.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Pre-Hospital Care (Paramedicine) Certificate

The Pre-Hospital Care Program is designed for students who are interested in pursuing jobs in the pre-hospital setting. Within the core curriculum for the degree, all students are required to take the EMT-Basic course, which meets the U.S. Department of Transportation’s National Standard Curriculum for Emergency Medical Technician-Basic (EMT-B). Successful completion of this course qualifies the student to take the National Registry Examination for EMT-Basic. The clinical concentration within the EMS degree meets the U.S. Department of Transportation’s National Standard Curriculum for Emergency Medical Technician-Paramedic (EMT-P) training programs. Successful completion of the program qualifies the graduate to take the National Registry Examination for EMT-Paramedic. The clinical concentration of the EMS Program is designed to prepare the graduate for a volunteer or paid career as a certified EMT-Paramedic.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Professional Development Certificate

The Professional Development Certificate offered by the School of Liberal Arts and Transitional Studies provide an incentive for Blue Ridge students to enhance their experience by participating in a series of educational courses in a specialized area. Along with core courses for each specialized certificate is a balanced curriculum with coursework in communication and life skills, critical and analytical thinking, and social awareness. The coursework is essential to prepare students seeking to expand their management competencies.

The Professional Development Certificate verifies a student's successful completion of a variety of general education courses. The certificate is designed to be completed in one year of full-time enrollment at Blue Ridge CTC. Concentrations are offered in the following areas: Public Relations, Social Sciences, and General Education Core. The specific course requirements for each Professional Development Certificate concentration are outlined below.

Curriculum for a Certificate in Professional Development
General Education Core

Systems Networking Certificate

The Systems Networking certificate degree program is designed to address the needs of businesses and organizations within the local community. The field of Information Technology is growing regionally, and the need for certified technicians is advancing at a rapid rate. This course of study will provide the training required to install, configure, and operate simple routed LANs and WANs, and to obtain the Cisco™ Certified Network Associate (CCNA) certification. The program also provides the essential knowledge and skills required for employment in the Networking portion of the Information Technology field.

The student will gain knowledge of switched LAN Emulation networks made up of Cisco™ equipment. The program is a focused coverage of Cisco™ router configuration procedures, which will be mapped to exam objectives for Cisco Exam 640-802 or for Cisco Exams 640-822 and 640-816. This program will also provide students with the knowledge to troubleshoot and repair desktop personal computers, to install, maintain and manage Windows desktop operating systems, and manage, install, maintain, and troubleshoot Windows Server implementations. These additional courses will be mapped to the exam objectives for the CompTIA A+ and Microsoft® MCITP certifications.

Students in any program are subject to Blue Ridge Community and Technical College’s requirements for admission, basic skills testing, and appropriate course placement, including mandated developmental courses, which are not counted toward the completion of the program. Blue Ridge CTC requirements regarding academic standards and student conduct also apply.

Technical Studies Certificate

The Blue Ridge Community and Technical College can customize this certificate degree for employers. Associate degree programs requiring additional credits for completion are also available.

Goals of the Technical Studies Program include:

- To increase the abilities of employees to use technology effectively and responsibly.
- To increase abilities of employees to communicate information effectively through reading, writing, speaking, and listening.
- To develop employee’s abilities to solve problems through understanding, reasoning, research, and productive teamwork.
- To assist those employed in the workforce to understand that education is a life-long process.

Degree programs implemented under this degree designation will include instruction consistent with the following components and categories.

This program is only for individuals whose employer is working with Blue Ridge Community and Technical College to ensure completion of this degree.

Curriculum for a Certificate in Technical Studies

Component I – General Education Core 6

Component II – Technical Core 6

Component III – Occupational Specialty 9

Component IV – On-the-Job Training 9
Total Credit Hours Required

30

Component I – General Education Core

Communication and Life Skills

- ENGL 101 - Written English (3) OR
- ENGL 110 - Technical Writing & Communication (3)

Critical & Analytical Thinking

- MATH 100+ OR
- Restricted Electives (3)

Subtotal Credit Hours Required 6

Note:

Electives must be taken from the General Education core competency.

Component II – Technical Core

Each program of study must include a general technical core that meets the goal of developing skills that may be applied to a variety of occupations or that may be specific to an occupation (6)

Subtotal Credit Hours Required 6

Component III – Occupational Specialty

The component consists of technical specialty courses specific to an occupational area. Industry based education and training programs are to be converted to college credit at the ratio of 15:1 and at a rate consistent with the lab hour/credit ratio of the degree granting institution for laboratory credit. (9)

Subtotal Credit Hours Required 9

Component IV – On-the-Job Training

The component consists of a paid or unpaid OJT, internship, or practicum performed in a business or industry setting in the occupational area. The on-the-job training component is to be converted to credit hours at a ratio of 150:1 with the maximum of 2,080 contact hours allowable. A statement of the total number of contact hours experience through on-the-job training will be placed on the college record. (9)
Technology Systems Certificate

The Technology System Certificate combines traditional professional and business communication with information technology. Certification such as A+, CIW, and MCAS work well with the restricted electives in this program; therefore, enhancing the credential that a Technology System Certificate provides.

To be eligible to earn a Blue Ridge Community and Technical College Certificate the student must be a current degree-seeking student or complete the application and admissions process to the college. Eligibility to earn and receive a Blue Ridge Community and Technical College Certificate does not interfere with the degree-seeking status of the student.

Virtualization Certificate

Virtualization technology, which enables the sharing of hardware resources, is on the rise in business environments worldwide. The technology’s efficient use of resources, economic benefits, and security value position it as a smart solution to modern business needs.

Our certificate program provides you with the training necessary to install, configure, troubleshoot, deploy, and maintain virtual machines in a business environment. We provide hands-on training in the Cisco, VMware, and Microsoft technologies, and prepare you to obtain the VMware Certified Professional credential.

Being equipped with training in virtual design, maintenance, and infrastructure management, you will be prepared to pursue a career in networking or in the entry-level cloud computing sphere of the Information Technology field.

Course Descriptions

Accounting

ACCT 201 - Principles of Accounting (3)
A study of the fundamental theory and principles of accounting concepts for reporting financial information to business users. The course stresses the relationship between the rules by which financial statements are prepared and the use of financial statement information for decision making. This course covers accounting terms, organization of accounts, the accounting cycle, working papers, and financial statements. This study continues in ACCT 202.

ACCT 202 - Principles of Accounting II (3)
A continuation of ACCT 201. This course concludes the fundamental study of financial accounting and then introduces the study of theory and principles of managerial and cost accounting concepts. The course stresses the use of accounting information for decision making and role of managerial accounting in a business environment. This course covers budgeting, costs systems, accounting for corporations, and financial statement analysis.

Prerequisite(s): ACCT 201 - Principles of Accounting (3)

ACCT 230 - Intermediate Accounting I (3)
An in-depth study of the theory and principles, along with the application of accounting concepts for reporting financial information. The accounting conceptual framework, information systems and components of the financial statements will be emphasized. This study continues in ACCT 231.

Prerequisite(s): ACCT 202 - Principles of Accounting II (3)
ACCT 231 - Intermediate Accounting II (3)

A continuation of ACCT 230. An in-depth study of the theory and principles, along with the application of accounting concepts for reporting financial information. The accounting conceptual framework, information systems and components of the financial statements will be emphasized. Specifically, this course will cover accounting theory and practice for assets, liabilities and equity.

Prerequisite(s): ACCT 230 - Intermediate Accounting I (3)

ACCT 250 - Managerial Accounting (3)

A focus on the fundamental concepts of managerial accounting. Includes the analysis of internal accounting information with emphasis on use of such data for performance evaluation, control, cost analysis, capital budgeting, cash flows, and cost information.

ACCT 260 - Income Tax (3)

A study of the Internal Revenue Code and regulations for individuals, partnerships and corporations. An in depth study and application of the IRC for income, deductions, expenses and tax credits for individual and small business.

ACCT 280 - Computer Based Accounting (3)

Application of general purpose accounting software. This course allows the student to enter, process, generate reports and complete the accounting cycle for small business.

ACCT 292 - Accounting Internship (3)

Application of classroom study with supervised work experience. Emphasis is practical application of accounting theory and skills learned in an actual business environment. Internships last no longer than a semester. Interns are not employees of the sponsoring company.

Academic Foundations

Academic Foundations

ACFN 010 - Introduction to Critical Composition (3)
Students will be introduced to composition, which involves critical analysis of reading material, forming of hypothesis, and construction of intelligent, coherent, full-length essays. Mechanical issues such as grammar, punctuation, and spelling will be addressed primarily on an individual basis, as students are encouraged, with assistance, to recognize their own strengths and weaknesses. Several workshop sessions will be held.

Grading is pass/fail only.

**ACFN 019 - Special Topics (1-4)**

This course will serve as a “funnel” for students to transition into developmental studies. The following assessment will be used as a guideline for placement: ACT 14 or below. This special topics course will be used for Reading, Writing, and Math Transition and will institute a collaboration between Adult Based Education (ABE) and Blue Ridge Community and Technical College with instruction in the fundamental principles of reading, writing, and math and will prepare the student for ACFN developmental courses.

**ACFN 020 - Basic Drug Calculations (3)**

This course develops skills to solve typical computational problems encountering in nursing practice. Operations of arithmetic (addition, subtraction, multiplication, and division) including fractions and decimals, ratio, proportion, introduction to algebraic notation, and the metric system. Examines units in the household and apothecary systems; dosage conversion among these systems; intravenous calculations. Optional units include powders and crystals, solutions, and children’s dosages. Enrollment as audit is not permitted unless recommended by the appropriate Student Academic Support Services or nursing personnel.

**ACFN 050 - Consumer Mathematics (1)**

This course develops problem-solving skills to deal with consumer topics. Topics include interests and saving account computations, maturity values, commissions, markups, discounts, payroll deductions, tax forms, comparison-shopping, credit costs, income, and expenditures to budgets, and interpretations of tables and charts. Enrollment other than audit permitted only if advised by the appropriate Student Academic Support Services personnel.

Pre-requisite/Co-requisite(s): ACFN 060 or permission of instructor.

**ACFN 065 - Pre-Algebra (3)**

This is the first in a two-semester series in developmental mathematics. In addition to traditional classroom lectures and question/answer sessions, students are required to attend a weekly laboratory session. The laboratory session is the mechanism by which the students assess and address their course progress. This course requires approximately 3-4 additional hours per week using an online mathematics computer program to complete homework and tutorial programs. Students will learn how to perform operations on real numbers, the implications of exponents and the order of operations, and how to evaluate algebraic expressions. The concepts of percents and their applications, introductory geometry, statistics, and problem solving skills will all be incorporated. Students will solve equations in one variable, solve literal equations for a variable, and evaluate/graph inequalities. Students will translate and solve algebraic equations, and learn the skills required to solve application problems in one and two variables. Students will interpret and graph linear equations as well as solving and analyzing systems of equations. Students will also be introduced to operations on polynomials.
Prerequisite(s): Placement

ACFN 085 - Basic Algebra (3)

This is the second in a two-semester series in developmental mathematics. In addition to traditional classroom lectures and question/answer sessions, students are required to attend a weekly laboratory session. The laboratory session is the mechanism by which the students assess and address their course progress. This course requires approximately 3-4 additional hours per week using an online mathematics computer program to complete homework and tutorial programs. Students will perform operations on polynomials, rational and radical expressions. Students will use various methods to factor polynomials. Students will solve rational and radical expressions, and apply these skills to solving application problems. The concept of functions will be introduced as well as their operations. Linear inequalities will be revisited with interval notation and applications.

Prerequisite(s): ACFN 065 or placement.

ACFN 095 - Developing College Reading Skills (3)

College courses require that students are able to read and comprehend college-level textbooks and other types of college reading material. This reading course provides the opportunity to learn and adopt reading skills that will promote success in college. It emphasizes reading rate, vocabulary development, effective comprehension of main ideas and supporting details, paragraph organization, and textbook reading. It also covers effective reading habits and application of skills in content area reading material. The goal of this course is the development of effective college-level reading skills which will enable the student to be successful in reading academic and career goals.

Apprenticeship

Apprenticeship

APTR 101 - ACDS: Introductory Child Development (5)

This basic course is an overview of the “pieces” of development in young children, including emotional, social, mental, and physical development. The focus is on the relationship between stages of growth in separate areas of development and the activities, which promote development.

APTR 102 - ACDS: Planning for the Whole Child (5)

This course is a continuation of the study of child development, but in contrast to the first semester, will look at the child as a whole. The focus will be on the integration within the child of the different areas of development. Typical behavior exhibited as a child progresses through stages and the unique characteristics of individual children will be analyzed. Planning appropriate curriculum according to developmental levels will be emphasized. Health and safety issues that arise when children reach new levels of ability will be explored.
APTR 103 - ACDS: Facilitation of Learning (5)

This course emphasizes the role of the teacher in fostering optimum development through a.) positive interactions with children, b.) effective individual and group management techniques, c.) appropriate classroom design, and d.) curriculum planning. An understanding of discipline as the development of self-control will be emphasized.

APTR 104 - ACDS: Becoming Independent (5)

This course will assist the apprentice in managing and administering a quality environment for young children. Problem solving about concerns that arise in daily operation will be practiced.

APTR 105 - Apprenticeship in Child Development (12)

This course provides the apprentice with 4,000 hours of supervised on-the-job training in participating childcare programs. Formal instruction is integrated with direct experience in early education settings where apprentices reflect and critically analyze their experiences. A portfolio is used to document the apprentice’s learning/work throughout the apprenticeship program.

APTR 106 - Introduction, Best Practices for Direct Support Specialists (5)

The student will have orientation to the role of the Direct Support Professional: Co-worker, mentor, and supervisory relationships. The course includes an overview of specialized and technical knowledge unique to the work environment, developmental disabilities, behavioral health, child development/welfare, fragile elders, substance abuse, traumatic brain injury, and at-risk youth. Health and medical concerns unique to the work environment will be addressed. An introduction to roles of specialists/consultants supporting service participants is included as are recognition and correction of hazards in the workplace. Eliciting, respecting, and actively supporting participant choices and preferences is emphasized.

APTR 107 - Client Advocacy and Wellness (5)

This course promotes empowerment and self-confidence of service participants and defines common forms of abuse, neglect, and exploitation. A mastery of abuse prevention strategies is emphasized. Students are taught to recognize sign of abuse, neglect and exploitation. Medication Administration and supporting self-administration are included where appropriate. The course covers characteristics of a healthy life style and responses to individual health needs.

APTR 108 - Communications and Teaching/Supporting Others (5)

This course includes the following content: Basic team communication skills and facilitation structures; effective, efficient, and timely documentation; use of alternative communication devices; teaching strategies, principles of reinforcement, relationships, task analysis and prompting, positive feedback, and natural teaching times. The teaching skills are customized to the individuals in the support environment.
APTR 109 - Crisis Management (5)

Develop awareness of the individual needs of service participants. Familiarity with crises typical or common to the support environment. Familiarity with procedures for prevention and intervention in a typical crises. Standard operating procedures following a crises. Familiarity with statutes and regulations. Conflict resolution.

APTR 110 - Supervised Work Experience (12)

This course provides the apprentice with 4000 hours of supervised on-the-job training in participating direct care facilities. Formal instruction is integrated with direct experience in elder care or social work settings where apprentices reflect and critically analyze their experiences.

Art

ART 103 - Introduction to Visual Arts (3)

This is an introductory course designed to give insight into the nature of the visual arts and the relationship to the human condition. The course includes a study of the functions of various forms of art in which students are exposed to a variety of visual arts experiences to promote a deeper understanding of and appreciation for the role of the visual arts in contemporary society.

ART 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

ART 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Allied Health Science

Allied Health Science
CAHS 100 - The Human Body (3)

This will be a survey course of basic Human Anatomy. It is designed for students who need a rudimentary understanding of the human body and its organ systems but not in the detail that would be expected of a Health Care Professional. This course will not substitute for CAHS 120, CAHS 121, CAHS 122 or CAHS 123.

CAHS 101 - General Biological Science I (4)

This is semester one of a two-semester general biology course which, with CAHS 102, satisfies the Liberal Arts requirement. This is an integrated lecture and laboratory course dealing with both plants and animals, related to our environment from molecule to biosphere. This course focuses on molecular and cellular biology, patterns of inheritance and genetics, biotechnology, and mechanisms of evolution.

CAHS 102 - General Biological Science II (4)

This is semester two of a two-semester general biology course which, with CAHS 101, satisfies the Liberal Arts science requirement. This is an integrated lecture and laboratory course dealing with both plants and animals, related to our environment from molecule to biosphere. This course focuses on plant and animal structure and function, the dynamics of populations, communities and ecosystems, and human impact on the biosphere.

CAHS 103 - General Physical Science (4)

This is an introductory survey course which explores the major concepts in physics and chemistry. Topics covered will include motion, matter and energy, atomic models, nuclear structure, waves, and electricity. A combination of conceptual framework, practical applications, and problem solving will be utilized in the integrated laboratory and lecture course.

CAHS 104 - General Physical Science (4)

An introductory survey course which explores the major concepts in geology, astronomy, and meteorology. Topics covered will include rocks and minerals, weathering and erosion, surface and groundwater, geologic time, plate tectonics, earthquakes, volcanoes, and mountains; light and telescopes, the solar system, stars, nebulae, and galaxies; the origin of the universe; the basics of meteorology, and the effects of weather and climate. A combination of conceptual framework, practical applications, and problem solving will be utilized in the integrated laboratory and lecture course.

CAHS 120 - Anatomy and Physiology for Health Care Professionals I (3)

One course in a two-course sequence that provides a detailed review of the human organism, this course will provide a brief overview of the human body and the chemical basis for activities occurring within the body, a detailed review of the cell, tissues, the integumentary, skeletal, muscular, and nervous systems as well as an overview of the human senses.
Corerequisite(s): CAHS 121.

**CAHS 121 - Anatomy and Physiology for Health Care Professionals Lab I (1)**

A laboratory course in human anatomy and physiology to be taken concurrently with CAHS 120.

**CAHS 122 - Anatomy and Physiology for Health Care Professionals II (3)**

The second course in a two-course sequence that provides a detailed review of the human organism, this course provides a detailed review of cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

Prerequisite(s): CAHS 120 & CAHS 121.
Corequisite(s): CAHS 123.

**CAHS 123 - Anatomy and Physiology for Health Care Professionals Lab II (1)**

A laboratory course in human anatomy and physiology to be taken concurrently with CAHS 122.

**CAHS 125 - Introduction to College Chemistry (4)**

This course is for students with little or no prior background in chemistry, whose program (AS Nursing, for example) requires one semester of chemistry, or who require preparation for additional coursework in chemistry. Emphasis is on calculations and measurement, dimensional analysis, formulas, and equations, stoichiometry, atomic structure and molecular geometry, gas laws and solutions.

Prerequisite(s): Math placement or ACFN 065/ACFN 085 is a pre-requisite.

**CAHS 127 - General, Organic & Biochemistry I (4)**

This course will include an overview of the Metric System, Scientific Notation, Temperature Scales, Density, Atoms, Structure, Isotopes, Electrons, Periodic Table, Chemical Formulae, Types of Chemical Reactions, Quantification of Chemical Reactions, Mass, Moles, Energy, Kinetic, Potential, Law of Conservation of Energy, Thermochemistry, Matter, pH, Fission, Fusion, Functional Groups and Names, and General Organic Reactions to Form Functional Groups. This course is designed as the first in a one year sequence of courses intended for nursing or other allied health students who intend to transfer to a four year academic institution which requires a two semester sequence course in General, Organic and Biochemistry (GOB). This course sequence could also provide a 8 credit General Education Science sequence. The course consists of a lecture portion and a laboratory portion.

Prerequisite(s): The ability to take a 100 level math course is a required pre-requisite.
CAHS 128 - General, Organic & Biochemistry II (4)

This course will include an overview of Alcohols, Reactions, Aldehydes and Ketones, Organic Acids, Amines, Aromatic Compounds, Heterocyclic Compounds, DNA, Hyper-, Iso-, Hypotonic Solutions, Metabolic Disorders, Complex Carbohydrates, Proteins, Lipids, Nucleic Acids, Body Fluids, Blood, Clotting Chemistry, Respiratory Exchange, Metabolic and Respiratory Acidosis and Ketosis. This course is designed as the first in a one year sequence of courses intended for nursing or other allied health students who intend to transfer to a four year academic institution which requires a two semester sequence course in General, Organic and Biochemistry (GOB). This course sequence could also provide a 8 credit General Education Science sequence. The course consists of a lecture portion and a laboratory portion.

Prerequisite(s): Successful completion is CAHS 127 is a prerequisite.

CAHS 130 - Chemistry for Fire and Safety (4)

This course is designed for students majoring in Fire Science or Safety Technology. It introduces students to the basic concepts of chemistry in a one-semester format where laboratory topics are integrated with the lecture. This course covers the fundamental principles of chemistry with a particular emphasis on the chemistry of hazardous materials and fire chemistry.

CAHS 140 - Intro to Healthcare (3)

This course is a foundation course for selected allied health programs. The course introduces students to a variety of health occupations and assists students in acquiring the basic knowledge skills, and professional behaviors needed to work and interact with clients in a healthcare setting.

CAHS 141 - Intro to Pharmacology (3)

This course provides information on a variety of medications that are commonly administer in the healthcare setting. Major drug categories associated with body systems will be reviewed. Students will learn about drug pharmacokinetics, dosage, preparation, administration and interactions.

CAHS 142 - Pathophysiology of Disease (3)

Pathophysiology of diseases will build upon previously learned knowledge of normal anatomy and normal physiology. This course will discuss pathologies and abnormalities that are deviations from the norm. For all pathologies, we will discuss: causes, signs and symptoms, diagnosis, diagnostic tests, treatments, and prognosis. The pathologies will be organized according to body system, including: cardiovascular, respiratory, immune, gastrointestinal, urinary, reproductive, endocrine, nervous, musculoskeletal, and integumentary. Other topics will include infectious diseases, neoplasms, hereditary diseases, diseases of the blood, and mental/cognitive disorders.

CAHS 143 - Spanish for Healthcare (3)
Medical Spanish for HealthCare Providers has been designed for healthcare practitioners and all individuals who interact with Hispanic patients who have limited English communication skills. Emphasis will be placed on communication and phrases needed to complete a patient assessment, and explain medical procedures.

CAHS 150 - EKG Technician (1–12)

This comprehensive Certified EKG Technician Program prepares students to function as EKG/Cardiovascular Technicians and to take the American Society of Phlebotomy Technician (ASPT) - Electrocardiograph (EKG) Technician exam in addition to other National Certification Exams. This course will include important practice and background information on anatomy of the heart and physiology, medical disease processes, medical terminology, medical ethics, legal aspects of patient contact, laboratory assisting, respiratory therapy assisting, electro cardiology and echo cardiology. Additionally, students will practice with equipment and perform hands-on labs including introduction to the function and proper use of the EKG machine, the Holter monitor, the normal anatomy of the chest wall for proper lead placement, echo cardiology, 12-lead placement and other clinical practices. EKG Technicians also analyze printed readings of EKG test, measuring various “peaks and troughs” and determining normal vs. abnormal EKG. The EKG/Cardiovascular Technician Certification Program includes a graded final exam to help prepare students for the ASPT-EKG Technician Exam. This course is eligible for college credit after successful completion of the program.

CAHS 151 - Medical Coding/Billing (1–12)

This billing and coding course offers the skills needed to solve insurance billing problems, how to manually file claims (using the CPT and ICD-9 manual), complete common insurance forms, trace delinquent claims, appeal denied claims and use generic forms to streamline billing procedures. The course covers the following areas: CPT (introduction, guidelines, evaluation and management), specialty fields (surgery, radiology, and laboratory), ICD-9 (introduction and guidelines) and basic claims processes for medical insurance and third party reimbursement. Students will learn how to find the service and codes using coding manuals (CPT, ICD-9, and HCPCS). Students who complete this course could be qualified to sit for the American Academy of Professional Coders (AAPC) - Certifies Professional Coder Exam (CPC or CPC-H - Apprentice); the American Health Information Association (AHIMA) Certified Coding Associate (CCA) exam; and/or other National Certification Exams. This course is eligible for college credit after successful completion of the program.

CAHS 152 - Pharmacy Technician (1–12)

This comprehensive course will prepare students to enter the pharmacy field and to take the Pharmacy Technician Certification Board’s PTCB exam. Technicians work in hospitals, home infusion pharmacies, community pharmacies and other health care settings - working under the supervision of a registered pharmacist. Course content includes medical terminology specific to the pharmacy, reading and interpreting prescriptions and defining drugs by generic and brand names. Students will learn dosage calculations, I.V. flow rates, drug compounding, dose conversions, dispensing of prescriptions, inventory control billing and reimbursement. The pharmacy Technician Certification Program includes a graded final exam to help prepare students for the PTCB exam. This course is eligible for college credit after successful completion of the program.

CAHS 153 - Phlebotomy Technician (1–12)

The Phlebotomy Technician Certification Program prepares professionals to collect blood specimens from clients for the purpose of laboratory analysis. Students will become familiar with all aspects related to blood collection and develop comprehensive
skills to perform venipunctures completely and safely. Classroom work includes terminology, anatomy and physiology; blood collection procedures; specimen hands-on practice; and training in skills and techniques to perform puncture methods. The program also includes lab exercises, live blood draws, work with a training arm and other exercises intended to prepare students to function as an entry level Phlebotomy Technician. This course is eligible for college credit after successful completion of the program.

CAHS 154 - Dental Assisting (1–12)

The Dental Assisting program prepares students for entry level positions in a variety of health care settings including dentist offices, hospitals and other similar facilities, familiarizing the student with all areas of pre-clinical dental assisting and training in the professional skills required to function as an assistant in the dental practice. It covers the following key areas and topics - Administrative aspects: the history of dentistry and dental assisting; introduction to the dental office; the legal aspects of dentistry and dental assisting; policies and guidelines. Clinical aspects: introduction to oral anatomy; dental equipment, operation, and maintenance; introduction to tooth structure; primary and permanent teeth; the oral cavity and related structures; proper patient positioning; dental hand pieces; dental anesthesia; sterilization; maintaining sterility and asepsis. This program does not include a national or state certification objective which in most states require 1 to 2 years of training or education. This course is eligible for college credit after successful completion of the program.

CAHS 155 - ICD-10 Medical Coding Course (1-12)

This course is part of our CCI Fast-Track Allied Health coursework. This program will include a detailed review of both ICD-10 (diagnostic coding) and ICD-10-PCS (inpatient procedural coding system). Additional program elements include differences between ICD-9 and ICD-10; federal regulation / compliance; using the ICD-10 Manual; how and when to use the ICD-10-PCS; issues surrounding the implementation of ICD-10. Documentation challenges; analyzing electronic coding tools; coding from chart notes; coding from operative reports; and detailed hands on coding exercises and case studies using ICD-10. This course is ideal for experienced students interested in a career in medical coding and for current coding professionals looking for an update and review of the issues and challenges they will face with the upcoming ICD-10 adoption.

CAHS 170 - Allied Health Pharmacology (3)

This course focuses on the specific information required for nursing and other allied health professionals to safely administer medications in today’s complex health care environment. Specific medication information according to affected body systems will be presented. Additional information about legal requirements, clinical research trials, herbal and nutritional supplements and substance abuse will also be covered.

CAHS 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CAHS 200 - Nutrition (3)
A study of the functions, sources, and requirements of nutrients. Emphasis is placed on meeting the nutritional needs of individuals of all ages in a variety of situations.

**CAHS 210 - Human Growth & Development (3)**

A course for students in the health sciences that explores the basic principles of human growth & development throughout the life span. Prenatal development, as well as physical, emotional, mental, and social changes in children, adolescents, and adults will be reviewed. The multiple factors that influence development & shape personality will be considered.

**CAHS 220 - Microbiology (3)**

A course for students in the health and life sciences, to be taken concurrently with the 1-credit laboratory. The course will emphasize the impact of microorganisms on human health and disease, including identification and control pathogens, the mechanisms of pathogenicity and disease transmission, host resistance, and immunity. Other aspects of microbiology will also be considered, including basic microbial metabolic activities and their role in nutrient cycling and as experimental subjects; biotechnology and recombinant DNA will be introduced.

Prerequisite(s): one semester of a college-level biology or allied health science course, and one semester of a college-level chemistry course.

**CAHS 221 - Microbiology Lab (1)**

A laboratory course in microbiological identification and experimentation techniques, to be taken concurrently with CAHS 220.

**CAHS 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Banking**

**Banking**

**CAIB 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
CAIB 201 - Analysis Financial Statements (3)

A practical introduction to financial analysis from the viewpoint of the commercial loan officer, this course provides the skills needed to effectively assess a borrower’s ability to repay loans.

CAIB 202 - Customer Service in Banking (1)

Participants in this course use a variety of exercises and group activities to define basic customer service skills and examine how the use of those skills adds to the personal and professional productivity levels of the participants. Participants can use a worksheet to chart their own customer service skills.

CAIB 203 - Principles of Banking (3)

Long recognized as the standard introduction to the banking profession, this course touches on nearly every aspect of banking, from the fundamentals of negotiable instruments to contemporary issues and developments within the industry. It is the foundation for all AIB training.

CAIB 205 - Consumer Lending (3)

In this comprehensive overview of the consumer lending business, participants learn the essentials about closed-end loans, indirect loans and related credit products, and open-end credit procedures. They also trace the consumer lending process from developing and taking loan applications to collection and recovery. The course explores what is involved in a credit investigation, decision-making, loan pricing, and loan policy. Participants develop a greater understanding for relationship building, new lending technologies, and the importance of consumer regulations.

CAIB 206 - Supervision: Concepts and Skill Building (3)

This program helps new and potential supervisors to become better managers by emphasizing broad prospective and by combining fresh insights with the interpersonal relations required of today’s successful managers.

CAIB 207 - Banking Today and Cross Selling (1)

This course gives you an orientation to the essential principles, concepts, and operations of banking.

CAIB 208 - Consumer & Mortgage Lending (1)

This course provides participants with the basic knowledge about consumer credit. It covers terminology, basic categories of consumer credit, determining credit worthiness, the application process, and bank regulations.
CAIB 209 - Law and Banking Principles (3)

Every part of the banking process, from taking deposits and making loans to operating safe deposit boxes and offering trust services, is governed by laws for the purpose of protecting consumers to maintaining the safety and soundness of the bank. Knowing the basics of banking law will enable every banker to grasp the requirements of his or her job and perform it with more understanding. This course is a guide to legal and regulatory issues, with special emphasis on the Uniform Commercial Code.

CAIB 210 - Personal Tax. Financial Statements (1)

This course provides participants with the ability to extract key information from 1040 Federal Tax Returns to determine projected income. Participants will learn how to explain to customers why the loan was declined due to insufficient projected income and how the different schedules were analyzed.

CAIB 211 - Economics for Bankers (3)

This course introduces the fundamental principles of economics. Special emphasis is placed on macroeconomics and topics of importance to you as a banker.

CAIB 212 - Money & Banking (3)

This course presents a fundamental of how money functions in the US and world economies. Topics include the concept of money supply and the role your bank plays as a money creator and participant in the nation’s payment mechanism. This course also explains how the various types of financial institutions operate, the workings of monetary and fiscal policies, the functions and powers of the Federal Reserve and more.

CAIB 213 - Commercial Lending (3)

This course provides the knowledge and skills required to identify the credit needs of various types of small business customers and to sell a “total banking” relationship. It also prepares participants to assess the customer’s credit worthiness by examining income statements and balance sheets. This course covers both the technical side of small business lending and the interpersonal skills required to be a successful loan officer.

CAIB 214 - Financial Accounting (3)

This course teaches students the information needed to create financial statements including trial balances, t-accounts, balance sheets, and various other accounts and their respective functions. This course emphasizes current practices of accounting procedures and includes overage of the latest principles set forth by the Financial Accounting Standards board (FASB).
CAIB 215 - Law & Banking Applications (3)

This course is an introduction to check processing, bank collections, consumer lending, and secured transactions.

CAIB 216 - Marketing Financial Services (3)

This course examines what motivates customers to purchase financial services and teaches how to develop a successful marketing plan. Topics include: developing a marketing plan, promotion, delivery channels, sales and sales management, product development, research techniques, communications and public relations, and future trends. There is also a special focus on customer satisfaction and service quality, and on advancements in technology for new products, new delivery systems, and new advertising forms. The course also reviews the increasing importance of social responsibility, community support, and concern for the natural environment.

CAIB 217 - Mortgage Lending (3)

This course provides an introduction to construction lending and other areas of commercial real estate finance, with particular emphasis on managing credit risk. Real estate law, appraisal, and investment analysis are also covered. This course introduces principles of finances related to the following real estate categories: condominiums, multifamily rental properly, retail property, office, warehouse, and lodging property.

CAIB 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Business

BUSN 101 - Introduction to Business (3)

This course provides an overview of the complex building blocks of business including administration, management, finance, labor, marketing, law and ethics. These aspects are considered in reference to local and global markets, e-commerce, and evolving technology and trends. Students put newly acquired knowledge to work in the development of a business plan making the course a cornerstone for business majors and entrepreneurs alike.

BUSN 103 - Accounting I (3)
This course enables students to understand the basic functions of business accounting and the ethical communication of financial information. It examines the accounting process, transaction analysis, asset and equity accounting and financial statement preparation and analysis. The focus of the course is on the single proprietorship, but an overview of partnership and corporate accounting is also included.

Prerequisite(s): ACFN 065 or Placement.

**BUSN 105 - Business Communication (3)**

This course examines the process of communication and the challenges to and effective practices of communicating in a business environment. Topics include listening skills and verbal, nonverbal, and written communications. The dynamics of communicating in a group, global, and culturally diverse environment are also investigated. Students apply a systematic approach to plan and create effective letters, memos, reports, presentations, electronic and other forms of business communication.

Prerequisite(s): ACFN 010 or Placement.

**BUSN 110 - Principles of Sales (3)**

This course is an introduction to the principles of sales, the role of the professional salesperson in the marketing process, and sales management. The importance of relationship building and ethical behavior are stressed as students develop techniques for prospecting and qualifying buyers, identifying and overcoming objectives, and closing a sale. Characteristics of the local as well as the global market are discussed.

**BUSN 170 - Customer Service Management (3)**

This course goes beyond a discussion of service to an analysis of the strategies that enable a business to attract, satisfy, and retain customers profitably. Students discover the importance of management, communication, and training in meeting customers’ needs.

**BUSN 180 - Personal Finance (3)**

This course offers a study of personal financial management. Students are equipped with the tools to make informed decisions related to spending, saving, borrowing, and investing to achieve financial goals now and in the future.

Prerequisite(s): ACFN 065 or placement.

**BUSN 190 - Human Resources Management (3)**

This course covers the components of human resource management from organizational assessment to manpower planning including recruitment and selection, training and development, and evaluation and compensation. The impact of employment laws, ethical considerations, global competition, and rapid technological advances on small and large organizations is also considered.
BUSN 191 - Organizational Behavior (3)

This course examines the behavior of individuals and individuals in groups in organizations, and how the two affect the overall performance of an organization. Students consider the impact of individual attitude, motivation, job satisfaction, and communication on the organization. Group dynamics, leadership, organizational culture, and change are also addressed.

BUSN 199 - Special Topics (1-4)

Special topic courses may be offered from time to time dependent upon current trends, employer needs, and student interests. The course description, objectives, and credit hours for each will vary based upon the topic and schedule.

BUSN 200 - Business Ethics (3)

This course considers business actions and decisions in relation to moral principles and values. Beginning with an introduction to ethical theory and the personal credo, students apply a systematic approach to ethical decision making; that approach is then applied to business situations involving employee relations, consumer affairs, finance, government, and international competition. The role and expectations of business in society, both locally and globally, are discussed.

BUSN 209 - Consumer Behavior (3)

This course studies the complexity of buying decisions and how attitudes and perceptions, social class and family status, and technology and marketing influence those decisions. Consumers are considered as individuals and as members of groups to make decisions on sales, advertising, and new product development. Students learn to be more effective marketing managers as well as more savvy consumers.

BUSN 210 - Marketing (3)

This course provides an in-depth study of the four pillars of marketing: product, price, placement, and promotion. These aspects are considered in reference to local and global markets, e-commerce, and evolving technology and trends. Students put newly acquired knowledge to work in the development of a marketing plan.

BUSN 211 - Advertising (3)

This course addresses the basic theories, processes, and techniques of the most visible aspect of marketing communications. Local and global markets, e-commerce, and evolving technology and trends are considered as students plan and implement a successful advertising campaign using a variety of media vehicles.
BUSN 212 - Business Law (3)

This course is an introduction to the American legal system and its impact on the business environment. Topics considered include contracts, employment law, antitrust law, torts, consumer protection, and the business organization. This study prepares students to identify and limit risk in business dealings.

BUSN 215 - Human Relations & Management (3)

This course analyzes relationships in the business environment and their effects on the management function. Students apply principles of behavioral science in a business environment related to planning, change, diversity, leadership, decision making, and conflict resolution. The skills and attitudes necessary for professional advancement are also discussed.

BUSN 218 - Principles of Management (3)

This course examines the basic functions of management – planning, organizing, coordinating, and controlling - in a business organization. Students study management theory and practice in order to identify their own management style and appreciate the complex nature of management. The impact of social responsibility, corporate culture, and technological advances on management is also considered.

BUSN 230 - Business Etiquette & Image (3)

This course provides students a hands-on opportunity to develop the professional image needed to succeed in business. Topics include professional dress, conduct at work, managing technology, networking, interviewing, and resume development. This course is recommended for second year students.

BUSN 275 - Management & Leadership (3)

This course empowers students to assess their leadership potential by studying successful leaders of the past and present. With a focus on business, students consider the skills required to set goals for an organization and direct the actions of others to achieve them. Nontraditional texts are utilized to prepare students for lifelong learning after college.

Prerequisite(s): Student must have completed 26 credit hours in business or related courses or have approval of the instructor.

BUSN 278 - Teamwork & Managing Teams (3)

This course examines how managers create, develop, and maintain quality, high-performance teams in the workplace. Students work in teams throughout the semester to develop skills relevant to individual and team performance. Topics include creating the culture for teamwork, team dynamics, team problem solving, and managing teams.

Prerequisite(s): Student must have completed 26 credit hours in business or related courses or have approval of the instructor.
BUSN 292 - Business Internship (1-6)

This course serves as the capstone in experiential learning for Business majors. Students work a minimum of 150 hours in a professional business environment applying their academic learning while gaining real-world experience and career development.

BUSN 294 - Business Practicum (1-6)

For Business majors already working full-time in an approved professional business environment, this course serves as the capstone in experiential learning. Students apply their academic learning to a minimum of 150 hours of special projects or expanded responsibilities on the job acquiring new skills and expanding career development.

BUSN 299 - Special Topics (1-4)

Special topic courses may be offered from time to time dependent upon current trends, employer needs, and student interests. The course description, objectives, and credit hours for each will vary based upon the topic and schedule.

CBUS 103 - Basic Accounting Fundamentals (3)

Basic Accounting Fundamentals includes instruction in analyzing, journalizing, and posting business transactions, keeping financial records and the preparation of financial statements. The course also introduces other important aspects of accounting including: payroll, banking, petty cash, returns, allowances, discounts, and depreciation. While the single proprietorship form of business organization provides a basis for most of the discussion and work, an overview of partnership and corporate accounting is also included.

CBUS 105 - Business Communications (3)

The course examines all aspects of business communication. Students learn and exercise their abilities to communicate using memos, letters, reports, presentations, resumes, and electronic communication. Various techniques to develop and utilize listening, interviewing, interpersonal, and oral presentation skills are demonstrated and reinforced.

CBUS 110 - Principles of Sales (3)

As a hands-on introduction to selling and sales management, this course covers the role of personal selling and the study of ethical sales techniques as applied to the marketing process and employment in a variety of industries.

CBUS 150 - Introduction to Business (3)

An introductory course to acquaint students with administration, production, labor, entrepreneurship, marketing, distribution, law, and ethics.
CBUS 160 - First Time Supervisors (3)

This course is an exploration of the transition from individual contributor to manager. Throughout the semester, we’ll explore concepts and practical advice designed to help first time supervisors make a successful transition to a managerial role. You will learn about common myths of management, the nature of the transition process from individual to manager, ways to enhance your self-knowledge, build effective teams, and cope with the stresses and emotions that are often found in management.

CBUS 190 - Introduction to Human Resource Management (3)

A study of the components of human resource management including organizational assessment and human resource manpower planning; recruitment and selection, training and development, employee relations, employment laws, impact of global competition, and rapid technological advances.

CBUS 191 - Organizational Behavior (3)

A study of how the behavior of individuals at work in all kinds of organizations drives organizational performance. This course examines the structure of organizations, group dynamics, motivation, and the skills that managers need to increase organizational relationships and improve overall performance.

CBUS 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CBUS 200 - Business Ethics (3)

This course is a comprehensive overview of the major areas of ethical theories and issues, including employer-employee relations, consumer affairs, business and government, and international affairs. This course examines the role of ethics in the business world and ethical dilemmas encountered in all aspects of business from the employee to the top levels of management, including risk management, preferential hiring, corporate legitimacy, and moral accountability.

CBUS 208 - Consumer Economics (3)

This course is a study of the opportunities and responsibilities of the consumer in choosing goods and services for use in promoting individual, entrepreneurial, and/or family goals. Emphasis is placed on financial planning throughout the life span.

CBUS 209 - Consumer Behavior (3)
This course provides cognitive theories of persuasion, search heuristics, information retrieval, and performance modeling will be covered. Current research is covered on what makes people happy and fulfilled and the strategies people develop to attain these. Consumer behavior in the aftermath of 9/11 will be addressed. Implications for advertising, sales, and new products are discussed to determine consumers’ impact for marketing strategies.

**CBUS 210 - Marketing Concepts (3)**

Students are introduced to marketing concepts including promotion and integrated marketing communication. Students will learn the steps of the selling process, the advantages, and disadvantages of various advertising media including the Internet, the role of public relations, and the use of promotional tools.

**CBUS 211 - Advertising (3)**

This course will cover the basic principles of advertising, planning, and management with a localized marketing focus.

**CBUS 212 - Business Law (3)**

This course provides a broad introduction to contemporary law as it relates to the business environment including contract sales, employment law, antitrust law, torts, consumer protection, and business organization.

**CBUS 215 - Human Relations and Management (3)**

The class reviews how changes occurring in the business environment affect the management function. This class discusses the organizational function of human relations and management including staffing and diversity management. The planning process, decision-making, and control functions of the manager are explained. Various leadership styles and the differences between leaders and managers are summarized.

**CBUS 250 - Personal Wealth (3)**

This course investigates personality traits that act as barriers to wealth accumulation. Tactics to overcome obstacles to personal wealth are introduced through lecture, projects and outside speakers. Topics include financing, debt, retirement and savings, and personal wealth objectives. This course culminates with the creation of a personal portfolio including credit reports, account data, beneficiaries, and personal wealth goals.

**CBUS 275 - Management & Leadership (3)**

This course serves as a primer on leadership aimed at developing a person’s basic knowledge, skills, and abilities to realize their leadership potential. The course objective is to grow and develop effective leadership skills, to learn to direct the actions of others to attain the purposes and goals of the organization, and to acquire a comprehensive, fundamental understanding of leadership and its responsibilities and accountabilities.
Prerequisite(s): Student should have completed 24 credit hours in business or related courses or approval of instructor.

**CBUS 276 - Organizational Development and Change (3)**

This course focuses on the theory and application of organizational change. The overall course objective is to provide knowledge and skills to function as effective change agents in organizations by exposing students to a variety of real cases along with relevant existing theories.

**CBUS 278 - Teamwork and Managing Teams (3)**

This course is designed to provide an understanding of how managers start, develop, implement, and maintain quality, high performance teams in a workplace setting. Topics include: creating the culture for teamwork, team dynamics, team problems, and teams and business strategies.

**CBUS 292 - Business Internship (1–6)**

With practical experience in local & regional businesses, federal government, or non-profit organizations, students learn how to translate classroom theory and methods into professional skills and opportunities.

Prerequisite(s): Must have completed over half of the requirements for graduation with an associate degree and must have a 2.5 overall GPA.

**CBUS 293 - Business On-the-Job-Training (1–13)**

This course is designed to award credit to those persons who have been participating in a supervised on-the-job training program within a business organization. Credit is awarded upon receipt of a letter from the student’s supervisor stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore a student must work 1950 actual hours to receive 13 credit hours.)

**CBUS 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Communication**
Communication

COMM 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

COMM 202 - Fundamentals of Speech (3)

This course equips the student with the necessary tools to construct, deliver, and analyze public communication messages.

COMM 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Computer Aided Design

Computer Aided Design

CAD 101 - Intro to Engineering Graphics (2)

Introduction to Engineering Graphics will introduce communication practices commonly used in the engineering environment. This includes basic sketching, orthographic projection, working drawings, basic dimensioning, pictorial drawings, ANSI standards. Students will receive an introduction to CAD and its application to engineering problem solving.

CAD 102 - CAD Applications (4)

CAD Applications will be a continuation of CAD 101- Introduction to Engineering Graphics. This course will be a software based class that will prepare the student to produce accurate 2D and 3D drawings following ANSI standards. The class will focus on tools, editing, layers, dimensions and tolerances, and plotting to produce orthographic, section, auxiliary, isometric and oblique drawings.

Corequisite(s): CAD 101 - Intro to Engineering Graphics (2)
**CAD 106 - Intro to Civil CAD & Surveying (2)**

Introduction to Civil CAD and Surveying will introduce the student to the use of computer aided design in a variety of civil engineering applications including: property description, road layout, cut and fill calculations, and topography. Included will be an introduction to surveying, which will introduce the basics of accurately measuring distances, bearing and topography to describe a property.

**CAD 108 - Geographic Information Systems (2)**

Geographic Information Systems are a growing part of every aspect of technology and engineering. In this course the student will explore the building blocks of this complex worldwide system including elements of GIS, analysis of spatial information, real-world applications, map creation and analysis. Primary objective is to investigate interactive GIS application rather than develop expert users.

Corerequisite(s): CAD 101 - Intro to Engineering Graphics (2) and CAD 106 - Intro to Civil CAD & Surveying (2)

**CAD 199 - Special Topics (1-4)**

A special topics course (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**CAD 201 - 3D Modeling (2)**

In this course students will learn to use 3D modeling software to develop parametric design solutions for various engineering problems. Students will develop designs, learn and apply ANSI (American National Standards Institute) standards, explore finite element analysis, and develop working, assembly and presentation drawings.

Corerequisite(s): CAD 102 - CAD Applications (4)

**CAD 205 - Building Information Modeling (3)**

Building Information Modeling will introduce the student to the use of 3D modeling software to create architectural drawings and documentation. Students will develop residential models.

Corerequisite(s): CAD 102 - CAD Applications (4)

**CAD 292 - CAD Internship (3)**

The CAD internship is a working relationship between the student, an employer and the instructor, whereby the student will serve a predetermined number of hours working for a local firm as a CAD operator, surveying technician, GIS techniciam or other related career field.
Corerequisite(s): CAD 102 - CAD Applications (4) and CAD 106 - Intro to Civil CAD & Surveying (2)

**CAD 299 - Special Topics (1-4)**

A special topics course (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Computer Application Specialist**

**CAS 100 - Introduction to Keyboarding (2)**

Emphasis is placed on the development of speed and accuracy in the operation of the computer keyboard. Basic document production including letters, memos, reports, and tables are covered. This course is offered for those who seek to build basic keyboarding skills.

**CAS 101 - Documents Processing (3)**

This course is an intermediate keyboarding class emphasizing further development of typing speed and accuracy, as well as the proper formatting and editing of business documents.

Prerequisite(s): CAS 100 Keyboarding or successful completion of the Special Exam for Course Credit.

**CAS 110 - Understanding Computers (3)**

This basic course helps students become literate in the terminology and usage of computers. The course covers a description of the hardware and software of a computer system, a brief history of computers, and the following topics on the personal computer: Windows®, file management, word processing, electronic spreadsheet, and online learning.

**CAS 111 - Information Literacy (3)**

This course covers a variety of introductory computing knowledge including how personal computers work, hardware components, operating systems, and the most popular productivity applications including word processing, spreadsheets, and presentation software. Students will also be introduced to Internet and e-mail essentials, and will become familiar with networking basics. This course aligns with the Internet and Computing Core Certification (IC3) which demonstrates that a recipient has a clear understanding of the knowledge and application of computers and technology in the modern world.
CAS 192 - CAS Practicum (1)

This course will cover testing methodologies and study techniques to assist in preparing students for the Internet and Computing Core (IC3) certification exam.

CAS 199 - Special Topics (1-6)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CAS 210 - Outlook Complete (3)

This course uses a case method, problem solving approach to learning the full scope of the features of Microsoft Outlook. Skills covered include creating and managing message, scheduling appointments and events, creating and managing contacts, and sending and managing tasks and personal notes.

CAS 211 - Word Complete (3)

This course provides comprehensive training in the use of Microsoft® Office Word®. It is directly aligned with the Microsoft® Office Specialist certification exam which serves to validate an individual’s skills and knowledge of the Office software. Topics covered include creating and designing documents, incorporating table, charts, graphics, pictures and other media to enhance a document, and sharing, securing and printing documents.

CAS 212 - PowerPoint Complete (3)

This course provides comprehensive training in the use of Microsoft® Office PowerPoint®. It is directly aligned with the Microsoft® Office Specialist certification exam which serves to validate an individual’s skills and knowledge of the Office software. Topics covered include creating and designing presentations, using charts, graphics, sound, and other media to enhance a presentation and sharing and delivering presentations.

CAS 213 - Excel Complete (3)

This course provides comprehensive training in the use of Microsoft® Office Excel®. It is directly aligned with the Microsoft® Office Specialist certification exam which serves to validate an individual’s skills and knowledge of the Office software. Topics covered include creating and designing spreadsheets, using charts, graphics, formulas, protecting, sharing and delivering spreadsheet presentations.
CAS 214 - Access Complete (3)

This course provides comprehensive training in the use of Microsoft® Office Access®. It is directly aligned with the Microsoft® Office Specialist certification exam which serves to validate an individual’s skills and knowledge of the Office software. Topics covered include creating and designing databases, using charts, graphs, graphics as well as designing queries and modifying queries.

CAS 215 - Windows Complete (3)

This course provides comprehensive training in the use of Microsoft® Office Windows®. It is directly aligned with the Microsoft® Office Specialist certification exam which serves to validate an individual’s skills and knowledge of the Office software. Topics covered include organizing files and folders, personalizing the Windows workspace, searching for files and folders, managing system resources, using Windows and the Internet, and managing a networked environment.

CAS 216 - Visio Complete (3)

This lecture/lab course will provide the student with an in-depth knowledge and ability to work with the Microsoft® Visio® software. Through a combination of lectures and class projects, students will learn to visualize, explore and communicate complex information using Visio. Students will work with the wide range of templates including business process flowcharts, network diagrams, workflow diagrams, database models, and software diagrams used to streamline business processes, track projects and resources, chart organizations, map networks, diagram building sites, and optimize systems.

CAS 220 - Publications Design (3)

Students in this course discover the world of desktop publishing through a practical, hands-on approach using current design software to publish their own pamphlets, newsletters, letterheads, flyers, business cards, announcements, and advertisements. Basic publishing processes, design, and layout will be studied.

CAS 230 - Office Administration (3)

This course is designed to provide the student with concepts and procedures necessary to develop hands on skills for the digital office environment. Other areas of study include critical thinking, sound reasoning, ethical decision making, high productivity and efficient use of technical office tools.

CAS 240 - Computerized Accounting (3)

This course is an introduction to a computerized accounting in a business office. The student will develop and maintain accounting records for a small business using a current software program.

Prerequisite(s): BUSN 103.
CAS 292 - Internship (1-6)

This course provides practical experience in local and regional businesses, federal government, or non-profit organizations. Students learn how to translate classroom theory and methods into professional skills and opportunities.

Prerequisite(s): Must have completed 50 percent of the requirements for graduation with an associate degree and must have a minimum 2.0 overall GPA. See Academic Advisor.

CAS 299 - Special Topics (1-6)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Computer Network Engineering

CNET 101 - Intro to Networking & Telecomm (3)

This course is designed to provide a detailed overview of the foundational concepts involved within networking and telecommunications. The OSI model will be examined in detail and compared to the detailed TCP/IP model. Specific protocols and their operations will be examined. Methods of providing telecommunications and the technologies involved will be covered, as well as networking hardware, cabling, documentation, troubleshooting, implementations, planning, and repair of networks and telecommunications systems.

CNET 131 - Network Fundamentals (4)

This is the first course in a sequence that leads to the Cisco Certified Network Associate (CCNA) certification. The course covers network design based on the OSI Model as well as cable management, the functionality of networks, and the standards of network architecture. Students will engage in lab activities that emphasize use of network tools and experience with various applications. Course sequence mapped to CCNA certification: CNET 131, CNET 141, CNET 231, CNET 241.

CNET 141 - Routing Protocols and Concepts (4)

This is the second course in a sequence leading to the Cisco Certified Network Associate (CCNA) certification. This course covers local area network design and implementation; as well as, an advanced level of routing protocols. Students will engage in challenging hands-on lab activities including; skill building and troubleshooting practice. Course sequence mapped to CCNA certification: CNET 131, CNET 141, CNET 231, CNET 241.
CNET 192 - CNET Practicum (1)

This course will cover testing methodologies and study techniques to assist in preparing the student to successfully pass the CCNA certification exam.

Prerequisite(s): CNET 241

CNET 199 - Special Topics (1-6)

This course is being added due to needing the ability to provide special one-time course offerings as special topics courses. These may be courses offered as a test-case scenario to determine their viability of being created into a new course or as specific one-time offer courses needed for the needs of a business or organization.

CNET 231 - LAN Switching and Wireless (4)

This is the third course in a sequence leading to the Cisco Certified Network Associate (CCNA) certification. This course covers hierarchical switched network design and implementation, as well as wireless fundamentals. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice. Course sequence mapped to CCNA certification: CNET 131, CNET 141, CNET 231, CNET 241.

CNET 241 - Accessing the WAN (4)

This is the fourth course in a sequence leading to the Cisco Certified Network Associate (CCNA) certification. This course covers wide area network design and implementation, as well as security and network monitoring. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice. Course sequence mapped to CCNA certification: CNET 131, CNET 141, CNET 231, CNET 241.

CNET 242 - CCNA Certification Preparation (1)

Students will encounter the different types and forms of questioning employed on the certification exam, review core principal material from all 4 classes that are part of the objective listing for the certification, practice labs and configurations in order to prepare for the simulations that will appear on the certification. This course will prepare students for the topics and objectives that they will encounter on the certification exam. The material in this course will be mapped to the current CCNA certification exam objectives.

CNET 250 - CCNA Security (4)

This course is aligned with the Cisco Certified Network Associate (CCNA): Security certification. The course covers methodologies and techniques for hardening routers and switches; as well as, developing tunneling and end point security solutions. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice.
CNET 251 - CCNA: Wireless (4)

This course is aligned with the Cisco Certified Network Associate (CCNA): Wireless certification. This course covers a wide variety of wireless technology and how to configure, maintain, and troubleshoot it, as well as implementation methodologies for adding wireless to a wired local area network. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice.

CNET 252 - CCNA: Voice (4)

This course is aligned with the Cisco Certified Network Associate (CCNA): Voice certification. This course covers Voice over Internet Protocol (VoIP) technologies, their implementation, design, and operation, as well as successful optimization of network resources to allow VoIP to operate within the network model. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice.

CNET 255 - Cisco Certified Design Associate (4)

This course aligns with the Cisco Certified Design Associate (CCDA) certification. This course covers the research and design elements of network infrastructure, as well as, the methodologies of implementing differing design elements into a single network infrastructure design. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice.

CNET 265 - Advanced Routing (6)

This is the first course in a sequence leading to the Cisco Certified Network Professional (CCNP) certification. This course covers advanced routing protocols and configurations for use in the enterprise network, as well as, IPv6 transitioning strategies. Students will engage in challenging hands-on lab activities including; skill building and troubleshooting practice. Course sequence mapped to CCNP: CNET 265, CNET 266, CNET 267.

CNET 266 - Advanced Switching (4)

This is the second course in a sequence leading to the Cisco Certified Network Professional (CCNP) certification. This course covers layer three switching, advanced switching techniques, as well as, implementing wireless and voice into the switched network. Students will engage in challenging hands-on lab activities including; skill building and troubleshooting practice. Course sequence mapped to CCNP certification: CNET 265, CNET 266, CNET 267.

CNET 267 - Advanced Troubleshooting (4)

This is the third course in a sequence leading to the Cisco Certified Network Professional (CCNP) certification. This course covers a wide variety of troubleshooting techniques in order to maintain networks, as well as, methodologies for working with larger enterprise networks and their advanced configurations. Students will engage in challenging hands-on lab activities including skill building and troubleshooting practice. Course sequence mapped to CCNP certification: CNET 265, CNET 266, CNET 267.
CCNP: Optimizing Converged Networks is one of four courses leading to the Cisco Certified Network professional (CCNP) designation. CCNP: Optimizing Converged Networks introduces Cisco Networking Academy Program students to optimizing and providing effective QoS techniques in converged networks operating voice, wireless, and security applications. Topics include implementing a VOIP network, implementing QoS on converged networks, specific IP QoS mechanisms for implementing the DiffServ QoS model, AutoQoS, wireless security, and basic wireless management. This course maps to the 642-845 Optimizing Converged Networks Certification which is one of four certifications required to obtain the CCNP certification.

CNET 270 - Intro to Virtualization (4)

This hands-on course explores the installation, configuration, and management of VMware vSphere which consists of VMware ESXi and VMware vCenter Server. The course is based on the current versions of the software. This course also explores new features within VMware vCenter server and VMware ESXi with relation to the previous versions. This includes upgrading from the previous version to the current version. Completion of this course satisfies the prerequisite for taking the VMware Certified professional exam.

Prerequisite(s): IT 289 - Planning and Maintaining a MS Windows Server Infrastructure (3) and CNET 141 - Routing Protocols and Concepts (4)

CNET 292 - Internship Cmpr Ntwk Engineer (1-6)

This is a capstone course in experiential learning. A student participates in an intensive internship, externship, or cooperative with an appropriate agency, company or organization.

CNET 299 - Special Topics (1-6)

This course is being added due to needing the ability to provide special one-time course offerings as special topics courses. These may be courses offered as a test-case scenario to determine their viability of being created into a new course or as specific one-time offer courses needed for the needs of a business or organization.

Criminal Justice

Criminal Justice

CJST 120 - Defensive Driving and Firearms Safety (3)
Major roles of the law enforcement official are to operate a motor vehicle and handle firearms safely. This course will deliver in lecture format the cognitive knowledge necessary to accomplish this task and then culminate with a practical laboratory at professional driving and firearms range.

**CJST 121 - Assertive Driving and Marksmanship (3)**

This course provides instruction in how to use a motor vehicle as a tool to stop the flight of an offender or defense from an assailant. Additional instruction in the mastery of firearms will also be addressed.

Prerequisite(s): CJST 120.

**CJST 190 - Introduction to Computer Forensics (3)**

This course presents a basic introduction to the history of web-based criminal activity, laws surrounding computer forensic investigation, the techniques and principles used by computer forensic practitioners in the collection of digital evidence, the documentation of the procedures used during a computer-based investigation, and the preservation of computer/cyber evidence for use in legal procedures.

**CJST 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**CJST 200 - Introduction to the Criminal Justice System (3)**

Survey of law enforcement, the role, history, development, and constitutional aspects of law enforcement and public safety. A review of agencies involved in the process of the administration of criminal justice.

**CJST 210 - Introduction to Forensic Science (3)**

An introduction to the utilization of scientific methods and instrumentation in the analysis of physical evidence at crime scenes and in the laboratory, the course covers fingerprints, cast and mold development, blood and other body fluids, hair, fibers, tolls marks, paint, glass and plastic fragments, ballistics, and specialized instrumentation.

**CJST 211 - Examination of Questionable Documents (3)**

This course focuses on a specialty area of forensic science, that of the examination of questionable documents. Topics covered will be paper and ink analysis, forged documents, and handwriting comparisons.
CJST 212 - Intro to Serial Murder (3)

This course will introduce students to the phenomenon of serial murder including: the differences between serial, spree, and mass murderers; theories of serial murder; types of killers; psychology of killers; and individual case studies on specific killers.

CJST 215 - Introduction to Homeland Security (3)

This course is designed as an overview of the administrative, legislative, and operational elements of homeland security programs and processes including a review of homeland security history, policies, and programs.

CJST 220 - Criminal Investigation (3)

This course examines the fundamental principles and theories of criminal investigation, with concentration on the following subjects: report writing; sources of information: witnesses, complainants, victims, observation, physical description, identification, interviews, interrogation, modus operandi, informants, surveillance, undercover techniques, crime scene search, collection, preservation, and processing of physical evidence; raids, arrest, search, seizure, and case preparation.

CJST 225 - Terrorism (3)

This course acquaints the Criminal Justice student with the concept of terrorism at both the international and domestic levels. Topics include the history of terrorism, terrorism today and terrorism in the future. Response measures taken to terrorist threats will also be examined.

CJST 231 - Criminal Trial Law (3)

Introductory courses in the Criminal Justice program focus on the theory, legal basis, and process of the criminal justice system. This course is intended to take the knowledge gained in those foundation courses and provide an opportunity to apply the knowledge and skills using actual case studies as well as text materials. The class will examine each part of a criminal case with the focus of actually prosecuting or defending at trial. The class will examine: police investigations; initial charges; preliminary hearings; grand jury practice, arraignments and bond; pre-trial suppression and discovery hearings; witness preparation and examination; trial tactics; sentencing strategies; and appeals. A mock trial may be held at the end of the class.

Prerequisite(s): CJST 200 and CJST 230.

CJST 232 - Immigration Law (3)

This course will focus on a specialized area of the legal system that of immigration law and practices. The course covers various federal agencies that oversee and enforce United States Immigration law. Focus is upon visa application, process, consideration of non-immigrant and immigrant status, removal grounds and procedures, and forms of relief from removability. Various forms are introduced. Students will complete asylum applications and are given the opportunity to attend a removal procedure.
CJST 240 - Police Organization and Management (3)

This course examines the basic principles of organization and management. Federal, state, county, and municipal law enforcement agencies will be reviewed and compared with government and business administration. The important areas of leadership, planning, discipline, and contemporary police management problems will be analyzed.

CJST 241 - Criminal Profiling (3)

This course focuses on the criminal investigation specialty of criminal profiling. Specific case studies will be used in class to demonstrate the process by which a profile of serial criminals are developed and used.

CJST 243 - Critical Issues in Criminal Justice (3)

This course examines specific and controversial issues related to crime and the criminal justice system in a debate and discussion format. While the exact topics may change, some topics may include capital punishment, Megan’s law, sentencing, and domestic abuse.

CJST 245 - Bioterrorism and Weapons of Mass Destruction (3)

This course will center on Weapons of Mass Destruction and their potential use by terrorists. The student will explore the origins, development and weaponization of Chemical, Biological, Nuclear and Radiological Systems and Devices. The class will focus on the preparation and execution of plans and policies to counter this threat.

CJST 250 - Juvenile Justice System (3)

This course provides an overview of the juvenile justice system. Focus will be on the juvenile offender, the juvenile courts system, and the juvenile detention system.

CJST 253 - State Police Academy Basic Training (3)

This course is designed for law enforcement personnel who have completed the State Police Academy Basic Police Training Course. Upon presentation of the certificate of completion from the State Police Academy Basic Police Training Course, and having earned 15 credit hours at BRCTC, the student is eligible for 3.0 credit hours (without grade) in CJST 253 to be used as the Health Elective in the A.A.S. Criminal Justice degree. See the Criminal Justice Academic Advisor for more information.

CJST 260 - The Correctional System (3)
This course covers the court and jury system, probation and parole, and correctional institutions including jails and the non-institutional treatment of offenders. In addition, legal procedures, which affect the liberties of inmates, clients, and the correctional staff within the institutional and community settings, will be covered.

**CJST 280 - Criminal Investigation II with Lab (4)**

This course is designed to cover the more technical aspects of investigation and evidence collection. Topics will include interviewing, evidence gathering, pattern interpretation, classification of evidence, and packaging of evidence, submitting fingerprints, taking and lifting of fingerprints, analyzing evidence, and searching and filing procedures. Times will be devoted to laboratory work in the classroom.

Prerequisite(s): CJST 200, CJST 220.

**CJST 292 - Criminal Justice Internship (1–6)**

With practical experience in local & regional correctional facilities, courts systems, security & police facilities or other related organizations, students learn how to translate classroom theory and methods into professional skills and opportunities.

Prerequisite(s): Must have completed over half of the requirements for graduation with an associate degree and must have a 2.0 GPA.

**CJST 293 - Criminal Justice On-the-Job-Training (1–13)**

This course is designed to award credit to those persons who have participated in a supervised on-the-job training program in criminal justice. Credit is awarded upon receipt of a letter from the on-site supervisor stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore a student must work 1950 actual hours to receive 13 credit hours.)

**CJST 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Culinary Arts**

**Culinary Arts**
CART 100 - Introduction to Culinary Food Service (2)

A comprehensive overview of food service operational equipment, identification, and maintenance. An introduction to culinary terminology, theory and history as well as how food moves through an operation. This course will also familiarize the student with essential food handling, safety and storage guidelines encountered within the industry. This course also provides an overview of the professionalism in the culinary industry and career opportunities leading into a career pathway to the Food Service Industry.

Prerequisite(s): Required major in Culinary Arts, Food Service Retail Management, Baking and Pastry, or Entrepreneurship is required.

CART 115 - Safety and Sanitation in the Food Service Industry (2)

The Safety and Sanitation in the Food Service Industry course follows the format of the National Restaurant Association Educational Foundation ServSafe® Program. The course is designed as an industry-based program that prepares students for careers in the restaurant and foodservice industry. The emphasis of this program is to educate the students about the responsibilities of a foodservice manager and the food service worker have to the public in providing safe and sanitary food to the consumer.

Prerequisite(s): Required major in Culinary Arts, Food Service Retail Management, Baking and Pastry, or Entrepreneurship is required.

CART 116 - Servsafe Alcohol (1)

This course provides practical, yet comprehensive, knowledge that assists all front-of-the-house staff in learning what they need to know to serve alcohol responsibly. Lessons are reinforced with guides, charts, exercises and case studies to make concepts much more memorable.

CART 120 - Dining and Retail Service (1)

This course is designed to teach the practice and implementation of management principles as they relate specifically to front-of-the-house operations. The students will be assigned to production teams which will, in turn, rotate through a variety of jobs including: linen preparation, table preparation, dining room set-up and decor, buffet preparation, beverage preparation, and service.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 120L - Dining and Retail Service Lab (3)

CART 120L - Dining and Retail Service Lab (3)

This continues the development of Dining and Retail skills in a supervised laboratory setting. Specific skills are correlated to lecture content in CART 120.
CART 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CART 200 - International Cuisine & Language (1)

Explain the impact of Germany, Mexico, France, Italy, and China in the development of classical cooking principles and food preparation; interpret basic and advanced cooking principles in the preparation of classical food dishes; and identify the origin of menu items.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 200L - International Cuisine Lab (2)

CART 200L - International Cuisine Lab (2)

This continues the development of International Cuisine skills in a supervised laboratory setting. Specific skills are correlated to lecture content in CART 200.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 200 - International Cuisine & Language (1)

CART 201 - Stocks, Soups, and Sauces (3)

This course provides an introduction to the principles and techniques of basic stocks, sauces and soups. The student will prepare chicken, beef, fish and vegetable stock along with varied thickening agents. Student will prepare (Mother Sauces) such as Espagnole sauce, tomato sauce, velouté, béchamel sauce, and Hollandaise. The Student will be exposed to consommé, cream soups, puree soups and chowders. Emphasis is placed on preparation, sanitation, and the finished product.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

CART 207 - Survey of Food Services (3)

This course covers the organization and basic operation of various types of quality food services including fundamentals of preparation and meal planning, food production, and service standards and techniques are studied. Practice in evaluating food service installations.
CART 209 - Food Production Systems (3)

Recognition and achievement of quality in development of systematic relationships between items, time, labor, equipment, and costs in quantity food production, quality procurement policies for food, beverages, and related items are covered in this course.

CART 212 - Baking Skills and Development (4)

Fundamentals of baking including dough, quick breads, pies, cakes, cookies, tarts, and doughnuts. Instruction in flours, fillings, and ingredients. Topics include baking terminology, tool and equipment use, formula conversions, functions of ingredients, and the use of proper flours.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)

CART 231 - Garde Manger and Cold Presentations (4)

The cold station in any restaurant is one that encompasses a wide number of techniques. From butchering to garnishing and into charcuterie this course will cover all aspects of the responsibilities associated with the art of Garde Manger. Students will prepare marinades, cold sauces, forcemeats, mousses, hot and cold hors d’oeuvres, sandwiches, and cold dishes using tools and equipment commonly found in commercial kitchens. Techniques in proper cold buffet presentations will also be taught.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

CART 245 - Cooking Fundamentals I (3)

This course builds on CART 100 Introduction to Culinary Food Service by engaging the student in practical application of learned terminology and theories. Students will learn meat, produce and ingredient identification essential to the industry. We will introduce knife handling, food costing and purchasing, receiving and Inventory practices. Job shadowing days at restaurants and hotels with industry professionals will finish off the course with observation of facilities in operation.

Prerequisite(s): Required major in Culinary Arts, Food Service Retail Management, Baking and Pastry, or Entrepreneurship is required.

CART 246L - Cooking Fundamentals II Lab (2)

This continues the development of Cooking Fundamentals II skills in a supervised laboratory setting. Specific skills are correlated to lecture content in CART 246.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 246 - Cooking Fundamentals II (1)

CART 250 - Externship in Food Service (3)
This course applies the theoretical concepts gained in the classroom in a restaurant situation. Each student is assigned to a restaurant for a minimum of 200 hours. May be repeated once.

**CART 280 - Cake Design and Professional Decorating (4)**

A course in the basic and advanced techniques of wedding cake designs, assembly, and construction. The areas of study include stacked and tiered cakes, decorating with butter cream, fresh flowers, and rolled fondant. Advanced cake techniques and variations will be produced to enhance student’s base knowledge and offerings to potential consumers.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

**CART 296 - Ala Carte Service and Buffet Presentations (4)**

This course provides practice and theory in the art of ala carte, banquet and buffet food production as found in quality hotels and restaurants.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

**CART 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Cyber Security**

**CYBR 115 - Introduction to Physical and Technical Security (3)**

An Introduction to Physical & Technical Security provides students with a solid foundation in both the technological and operational aspects of security through comprehensive coverage that explores such principal topics as security electronics, communications systems, test equipment, video and optics, alarm systems, computers and security software, access control, and more. Students will obtain an industry-based perspective and a practitioner’s point of view on all phases of physical security, including what works and what does not, through a careful mix of theory and practical application.

**CYBR 125 - Principles of Incident Response and Disaster Recovery (3)**

This course presents methods of identifying vulnerabilities and taking appropriate measures to prevent and mitigate failure risks for an organization. The course presents a foundation in disaster recovery principles and planning, and emphasizes the
importance of incident response to minimize prolonged downtime that can potentially lead to irreparable loss. This course addresses the overall problem of contingency planning rather than focusing on specific tasks of incident response or disaster recovery.

**CYBR 190 - Security Assessment (3)**

This course will expose students to the process of creating a methodology and approach for conducting security assessments. Students will encounter a comprehensive step-by-step approach encompassing the entire security assessment process.

**CYBR 192 - Practicum (1)**

This course will over testing methodologies and study techniques to assist in preparing students for the Security+ certification exam.

**CYBR 199 - Special Topics (1-6)**

Special topic courses may be offered from time to time dependent upon current trends, employer needs, and student interests. The course description, objectives, and credit hours for each will vary based upon the topic and schedule.

**CYBR 200 - Cryptography (3)**

This course provides students and professionals with a foundation in basic information theory. Course content includes an introduction to information theory, threat agents and risk, information and the law, information security planning, cryptographic philosophy, mathematical principles of cryptography, symmetrical key cryptography, public key infrastructure, securing an information system, viruses, worms, and malicious software, and securing the digital marketplace.

Prerequisite(s): MATH 106.

**CYBR 210 - Intrusion Detection (3)**

This course provides an introduction to firewalls and other network security components that work together to create an in-depth defensive perimeter around a Local Area Network. The course maps to the Check Point Certified Security Administrator certification exam objectives, and examines firewalls in context with the other elements needed for effective perimeter security as well as security within a network. It incorporates examination of technologies such as packet filtering, authentication, proxy servers, encryption, bastion hosts, virtual private networks, log file maintenance, and intrusion detection systems. Course content includes firewall planning and design, developing a security policy, firewall configuration strategies, packet filtering, working with proxy servers and application-level firewalls, authenticating users, choosing a bastion host, setting up a virtual private network, building your own firewall, and ongoing administration.

Prerequisite(s): IT 200.
CYBR 220 - Wireless Security (3)

This course provides the information needed to protect a wireless network, and maps to the Certified Wireless Security Professional certification exam objectives. The course takes a comprehensive view of attacks and defenses of wireless networks and incorporates examination of technology that helps make wireless networks secure, as well as offers practical tools, tips, and techniques to protect a wireless Local Area Network. Course content includes foundations of wireless security, wireless LAN vulnerabilities, passive wireless discovery, active wireless attacks, wireless security models, enterprise wireless hardware security, designing a secure wireless network, secure wireless authentication, secure wireless transmissions, managing the wireless network, wireless security policy, and operational support and wireless convergence.

Prerequisite(s): IT 200.

CYBR 250 - Internet Security (3)

This course provides students and professionals with the ability to develop the security program necessary for protecting data and reacting to threats as they occur. This course maps to the Certified Internet Webmaster Security Professional certification exam objectives, and outlines various threats that exist in today’s IT environment, and demonstrates how to defend an environment against them by developing the necessary security policies and processes. Course content includes an introduction to information security, security processes, threats to IT assets, encryption, fundamentals of network security, network security threats, intrusion detection, fundamentals of system security, UNIX system security, Windows® system security, standards and compliance, and security testing.

Prerequisite(s): IT 200.

CYBR 280 - Network Defense and Countermeasures (3)

This course provides students and professionals with hands-on introductory experience installing firewalls and intrusion detection systems. This course maps to the Security Certified Network Professional certification exam objectives, and gives students a solid foundation in advanced network security fundamentals, incorporating examination of intrusion detection, network address translation, packet filtering, proxy servers, firewalls, and virtual private networks. Course content includes network defense fundamentals, risk analysis, security policy implementation, network traffic signatures, virtual private network concepts, VPN implementation, intrusion detection system concepts, incident response, choosing and designing firewalls, firewall topology, strengthening and managing firewalls, and strengthening defense through ongoing management.

Prerequisite(s): IT 141.

CYBR 281 - Ethical Hacking (3)

This course guides students and professionals toward becoming skilled security testers and maps to the Certified Ethical Hacker certification exam objectives. Course content includes an ethical hacking overview, TCP/IP concepts review, network and computer Attacks, footprinting and social engineering, port scanning, enumeration, programming for security professionals, Microsoft® operating system vulnerabilities, Linux operating system vulnerabilities, hacking web servers, hacking wireless networks, cryptography, and protecting networks with security devices.
CYBR 282 - Perimeter Defense (3)

This course provides students and professionals with a hands-on experience installing firewalls and intrusion detection systems. This course maps to the Security Certified Network Specialist certification exam objectives, and provides a solid foundation in advanced network security fundamentals. Essential security practices, such as TCP/IP addressing, routing, packet filtering, and installing proxy servers, firewalls, and virtual private networks are explained. Course content includes network defense fundamentals, advanced TCP/IP, router fundamentals, fundamentals of Cisco® router security, designing firewalls, configuring firewalls, managing firewalls to improve security, implementing IPSec and virtual private networks, designing virtual private networks, intrusion detection system concepts, configuring and using intrusion detection systems, wireless network fundamentals, and securing wireless networks.

CYBR 283 - Computer Forensics (3)

This course provides students and professionals with a solid foundation in computer forensics. The course is a guide toward becoming a skilled computer forensics investigator. Course content includes computer forensics and investigations as a profession, understanding computer investigations, an investigator’s office and laboratory, data acquisition, processing crime and incident scenes, working with Windows® and DOS systems, current computer forensic analysis tools, Macintosh® and Linux boot processes and file systems, file recovery, network forensics, e-mail investigations, mobile device forensics, report writing and expert testimony for high-tech investigations, and ethics for expert witnesses.

CYBR 292 - Internship (3-6)

This is a capstone course in experiential learning. A student participates in an intensive internship, externship, or cooperative with an appropriate agency, company or organization.

CYBR 299 - Special Topics (1-6)

Special topic courses may be offered from time to time dependent upon current trends, employer needs, and student interests. The course description, objectives, and credit hours for each will vary based upon the topic and schedule.

Culinary Arts

Culinary Arts

CART 110 - Molecular Gastronomy (3)

Trendy and cutting edge cuisine describes this course best; experience the new tools and theories on food. You’ll never think of food the same way when this class is over. In this course you will use all of your senses and explore the science of flavor with laboratory activities and demonstrations that are integrated into weekly lectures and labs.

Prerequisite(s): CART 212 - Baking Skills and Development (4)
CART 170 - Bread Fundamentals (1)

This course provides an introduction to the principles and techniques of the art and craft of bread making. Topics include formulas and techniques associated with naturally leavened loaves, hearth breads, focaccia, flat breads, rolls and other breads utilizing a variety of grains. Upon completion, students should be able to prepare classical and specialty breads that meet or exceed the expectations of restaurant and retail establishments.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 170L - Bread Fundamentals Lab (3)

CART 170L - Bread Fundamentals Lab (3)

This continues the development of Baking Fundamental skills in a supervised laboratory setting. Specific skills are correlated to lecture content in CART 170.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 170 - Bread Fundamentals (1)

CART 203 - Culinary Nutrition (3)

Teaches the principles of adapting recipes and menus to accommodate special dietary and nutritional needs.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)

CART 246 - Cooking Fundamentals II (1)

This course focuses on the expansion of cooking techniques and food costing skills learned in CART 245. This course will also introduce special techniques necessary for breakfast cookery. Special emphasis on portioning and presentation will be given. We will revisit CART 245 based cooking techniques and continue the practices of cooking various vegetables, starches such as potatoes, dumplings, pastas and grains always with emphasis on sanitation and safety.

Prerequisite(s): CART 115 - Safety and Sanitation in the Food Service Industry (2)
Corequisite(s): CART 246L - Cooking Fundamentals II Lab (2)

CART 292 - Culinary Arts Internship (1–6)

The purpose of the internship is to allow the student to demonstrate his or her skills in an occupational setting. The internship is considered a capstone course of the A.A.S. degree program. Completion of the internship indicates to the college that the student has achieved a satisfactory level of skills to be successful in their degree field.

Prerequisite(s): CART 212 - Baking Skills and Development (4)
CART 294 - International Pastries and Desserts (4)

A study of classical desserts, French and international pastries, hot and cold desserts, ice creams and ices, chocolate work, decorations, and plated dessert composition with emphasis on advanced techniques.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

CART 295 - Pastry Showpieces and Buffet Presentation (4)

In this class we will work with materials and products to learn advanced techniques tempering chocolate, and working with sugars, pulled and blown through demonstration and practice. We will create a presentation practical that will demonstrate student’s knowledge of the concentration based on this class and a combination of prior classes that will culminate in a final presentation to peers, faculty and industry leaders.

Prerequisite(s): CART 212 - Baking Skills and Development (4)

Economics

Economics

ECON 123 - Contemporary Economics (3)

This course serves as an introductory survey of modern economic issues. Economic theory is employed in the analysis of inflation, unemployment, pollution, regulation, market structure, and related topics. Economic institutions such as corporations, banking, and government are also studied.

ECON 205 - Principles of Macroeconomics (3)

This class serves as an introduction to fundamental economic concepts including production possibilities and economic growth, market supply and demand analysis, money, banking, and government and fiscal monetary policies. Emphasis is placed upon fluctuations in national income, employment, and price level.

ECON 206 - Principles of Microeconomics (3)

This course provides an introduction to microeconomic theory with a primary focus on the methodology of economics and the behaviors of individuals and firms. Fundamental concepts are covered including demand and supply analysis, marginal analysis, opportunity cost, market structure, pricing, labor markets, and government policy and regulation.
ECON 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Electric Distribution Engineering Technology

EDET 101 - Intro to Line Worker (2)

Intro to Line Worker is the first class in both the AAS and Certificate Line Worker Programs. It is intended to provide students with a basic awareness and function as gate keeper for those seeking entry into the program (and career.) Some major focus areas are: career awareness, wood pole climbing evaluation, claustrophobia evaluation and industry skills (Edison Cast) testing.

EDET 102 - Fundamentals of Electric Power Distribution (2)

Fundamentals of Electric Power Distribution provides students with an overview of how electric power is distributed from generation to industrial and residential customers. The class will also introduce students to industry terminology and materials.

Pre-requisite/Co-requisite(s): EDET 101

EDET 103 - Heavy Equipment Familiarization (2)

Heavy Equipment Familiarization is designed to introduce students to different types of heavy equipment vehicles used in utility work. Basic operation of the most commonly used equipment vehicles will be demonstrated and practiced by students.

Pre-requisite/Co-requisite(s): EDET 101

EDET 120 - Advance Pole Working (2)

Advance Pole Working is designed to teach practical skills and techniques used in constructing electric distribution systems while emphasizing the safe use of tools and equipment.

Pre-requisite/Co-requisite(s): EDET 102

EDET 121 - Safety for Electrical Line Workers (2)
Safety for Electrical Line Workers is designed to introduce students to the necessary skills to safely work on electric distribution systems. Some major areas of studies include: applying safe grounding practices, correctly using personal protective equipment, safely setting up traffic control work zone, pole top rescue, aerial lift rescue, and confined space rescue. Upon successful completion of this course a 10 hour OSHA card will be earned.

**EDET 130 - Underground Line Maintenance (2)**

Underground Line Maintenance teaches practical underground distribution maintenance techniques while emphasizing the safe use of tools and equipment. Focus areas include use of live line tools, installing and repairing underground cables and equipment.

Prerequisite(s): EDET 120 & EDET 121

**EDET 131 - Substation Basics (2)**

Substation Basics teaches the purpose and operations of a substation. Particular attention is spent on how to safely enter and perform various tasks at a substation.

Prerequisite(s): EDET 120 & EDET 121

**EDET 140 - Overhead Line Maintenance (2)**

Overhead Line Maintenance teaches practical distribution line maintenance techniques, emphasizing the safe use of tools and equipment. Focus areas include the use of live line tools, safe rigging practices, troubleshooting (including switching & testing voltages), and replacing/repairing electrical equipment.

Prerequisite(s): EDET 120 & EDET 121

**EDET 180 - Building Better Relationships (3)**

This class prepares participants to create better work relationships by becoming a “conscious communicator”. It includes taking a workplace personality identifier test. Participants will explore ways to enhance their self-knowledge, work effectively teams, and cope with the stresses and emotions that are often found in the work environment.

**EDET 181 - Conflict Resolution (2)**

Conflict resolution prepares participants to better deal with conflict in the workplace by helping them become a “conscious communicator”. It includes taking a conflict assessment/evaluation. Participants will explore ways and develop tools to enhance their abilities to deal with conflict and reduces stresses and emotions that are often found in the work environment.

**EDET 199 - Special Topics (1-4)**
A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**EDET 201 - Fundamentals of Electricity I (2)**

Fundamentals of Electricity I provide students with an introduction to ohms law and the principles behind how DC and AC electric circuits work.

Prerequisite(s): MATH 106 or MATH 107; EDET 102

**EDET 202 - Fundamentals of Electricity II (2)**

Fundamentals of Electricity II builds on the students learning in Fundamentals of Electricity I. Three phase circuits and transformers function are covered.

Prerequisite(s): EDET 201

**EDET 287 - Diagnostic & Repair Project (4)**

The Diagnostic and repair Project class provides students with unique opportunities (vary semester to semester) to practice and refine their skills in troubleshooting and repairing problems encountered in electric distribution systems.

Prerequisite(s): EDET 130 & EDET 140.

**EDET 293 - Practical Line Work Internship II (4)**

Practical Line Work Internship is a paid internship to expands student’s career awareness and further develops their practical hands on experience. Internships consist of over 160 hours of onsite work with a local utility company. Students will be required to travel to employer (off campus) work areas during normal work hours.

Prerequisite(s): EDET 130, EDET 131 and EDET 140

**EDET 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Emergency Medical Services**
Emergency Medical Services

EMSP 100 - Emergency Medical Responder (3)

This is an introductory course to emergency medical care for individuals that in the course of their normal duties are likely to be the first individual on scene of a medical emergency. The course will cover what should be done until the ambulance unit arrives and will include CPR, an overview of EMS systems, basic airway management, patient assessment, circulation and automatic defibrillation, illness, and injury prevention, childbirth and children and scene operations.

Corerequisite(s): EMSP 100L - EMR Lab (1)

EMSP 100L - EMR Lab (1)

This course affords the student the opportunity to apply and reinforce the skills learned in EMSP 100 in a laboratory setting. The student will participate in both scenario based training as well as skill specific review.

Corerequisite(s): EMSP 100 - Emergency Medical Responder (3)

EMSP 101 - Introduction to EMS (3)

This course is a survey course designed to acquaint the student with emergency medical services roles & responsibilities, well being of the EMS provider, illness and injury prevention, medical-legal issues, ethics, therapeutic communications, and life span development.

EMSP 102 - Emergency Medical Technician (6)

The primary focus of the Emergency Medical Technician is to provide basic emergency medical care and transportation for critical and emergent patients who access the emergency medical system. This individual possesses the basic knowledge and skills necessary to provide patient care and transportation. Emergency Medical Technicians function as part of a comprehensive EMS response, under medical oversight. Emergency Medical Technicians perform interventions with the basic equipment typically found on an ambulance. The Emergency Medical Technician is a link from the scene to the emergency health care system. This course was previously known as EMT-Basic until the incorporation of the new curriculum and scope of practices. This course or the EMT-Basic is a required prerequisite for admission into the Paramedic Program.

Corerequisite(s): EMSP 102L - Emergency Medical Technician Lab (2)

EMSP 102L - Emergency Medical Technician Lab (2)

This class is designed to follow the same chronological order as the Emergency Medical Technician (EMT) course. Items covered will be all of the hands on experiences necessary to reinforce the didactic instruction as the student completes the
classroom portion. This course will act as the second portion of the EMT course in order to meet both state and national standards and guidelines for an EMT.

Corerequisite(s): EMSP 102 - Emergency Medical Technician (6)

**EMSP 103 - EMS Operations (3)**

This course will include in-depth review of such topics as emergency vehicle operations, medical incident command, rescue awareness and operations, hazardous materials recognition & identification and crime scene awareness.

**EMSP 104 - EMS Practicum (1)**

This course provides the opportunity to observe and apply the skills learned in EMSP 102 in a supervised clinical setting including a local hospital emergency department, regional medical command center and on a field EMS unit. A minimum of fifty hours are required and will be scheduled by the student on an individual basis through the EMS Coordinator.

**EMSP 104L - EMS Lab I (1)**

This course affords the student the opportunity to apply and reinforce the skills learned in EMSP 102 in a laboratory setting. The student will participate in both scenario based training as well as skill specific review.

**EMSP 110 - Fundamentals of EMS Management (3)**

This is an entry-level course for students interested in the field of EMS management. The Focus of the course will be to provide a global overview of EMS System’s design and development, administration and finance of EMS Operations, risk management and quality improvement programs, and personnel development and management.

**EMSP 111 - EMS Management Internship I (2)**

In this course, the student will work as an apprentice in an EMS setting under the supervision of EMS management professionals. The focus of Internship I will be learning about EMS systems design and development at the local, regional, and state levels.

Prerequisite(s): EMSP 102 is a pre-requisite
Corerequisite(s): CAHS 120, CAHS 121, CAHS 122 & CAHS 123 (two semesters of Human Anatomy & Physiology with Labs) is Co-prerequisite to taking any EMS Program course in the 201-210 series.

**EMSP 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
EMSP 201 - Advanced Airway Management and Patient Assessment (3)

This course provides a comprehensive understanding of the respiratory system and respiratory emergencies. Covered is an advanced approach to managing simply as well as difficult airways. The course includes advanced patient assessment skills and techniques for the paramedic to use while establishing their appropriate treatment modalities.

Prerequisite(s): EMSP 104 - EMS Practicum (1)

EMSP 202 - Pathophysiology of Shock & Trauma Resuscitation (3)

This course provides a comprehensive understanding of the pathophysiology of shock, the different types of shock followed by appropriate treatment. The course also will give you an in depth look at all of the types of trauma and how our bodies react to absorbing energy. Our course will follow up with time management and treat modalities for trauma care.

Prerequisite(s): EMSP 204 - EMS Practicum II (2)

EMSP 203 - Pre-hospital Pharmacology (4)

This course provides topics to include pharmacokinetics, pharmacodynamics, drug calculations, and drug administration. This will be followed by an comprehensive look at over 90 different medications the paramedic will interact with. The course provides the cognitive understanding such skills as intravenous cannulation, intraosseous infussion, intramuscular injection, and subcutaneous injection to mention a few.

Prerequisite(s): EMSP 104 - EMS Practicum (1)

EMSP 204 - EMS Practicum II (2)

This course provides the opportunity to observe and apply the skills learned in EMSP 201, EMSP 202, and EMSP 203 in a supervised clinical setting including a local hospital emergency department, respiratory therapy department, and operating room and on a field EMS unit. A minimum of one hundred clinical hours are required and will be scheduled by the student on an individual basis through the EMS Coordinator.

Prerequisite(s): EMSP 104 - EMS Practicum (1)

EMSP 204L - EMS Lab II (1)

This course affords the student the opportunity to apply and reinforce the skills that they have learned in the EMS program to this point in a laboratory setting, concentrating on EMSP 201 and EMSP 203. The student will participate in both scenario based training as well as skill specific review.

Prerequisite(s): EMSP 104 - EMS Practicum (1)
**EMSP 205 - Medical Emergencies I (4)**

This course provides a comprehensive review of the pathophysiology of the cardiovascular system. This will include assessment and treat for cardiovascular emergencies. Within this course you will become fluent with Electro Cardio Grams (ECG) and there interpretations. The course will conclude with a complete 12 Lead understanding and interpretation.

Prerequisite(s): EMSP 204 - EMS Practicum II (2)

**EMSP 206 - EMS Practicum III (2)**

This course provides the opportunity to observe and apply the skills learned in EMSP 205 in a supervised clinical setting including a local hospital emergency department, respiratory therapy, cardiac service, and cardiac care unit and on a field EMS unit. A minimum of one hundred clinical hours are required and will be scheduled by the student on an individual basis through the EMS Coordinator.

Prerequisite(s): EMSP 204 - EMS Practicum II (2)

**EMSP 206L - EMS Lab III (1)**

This course affords the student the opportunity to apply and reinforce the skills that they have learned in the EMS program to this point in a laboratory setting, concentrating on EMSP 205 and EMSP 206. The student will participate in both scenario based training as well as skill specific review.

Prerequisite(s): EMSP 204 - EMS Practicum II (2)

**EMSP 207 - Medical Emergencies II (4)**

This course reviews pathophysiology, assessment and management of medical patients with neuralogical and endocrinological emergencies, allergies, and anaphylaxis, gastroenterological, urological, toxicological, hematological, and environmental emergencies, infectious and communicable diseases, behavioral, gynecological, and obstetrical emergencies.

Prerequisite(s): EMSP 206 - EMS Practicum III (2)

**EMSP 208 - Special Patients & Situations (3)**

This course takes an in depth look at the approach to patients with special needs such as neonatal, pediatric and geriatric patients, patients with mental or physical impairments, or patients with high technology medical devices in the out-of-hospital setting.

Prerequisite(s): EMSP 206 - EMS Practicum III (2)
EMSP 209 - EMS Practicum IV (2)

This course provides the opportunity to observe and apply the skills learned in EMSP 207 and EMSP 208 in a supervised clinical setting including a local hospital emergency department, pediatric unit, obstetrical unit, psychiatric unit and on a field EMS unit. A minimum of one hundred clinical hours are required and will be scheduled by the student on an individual basis through the EMS Coordinator.

Prerequisite(s): EMSP 206 - EMS Practicum III (2)

EMSP 209I - EMS Internship (1)

This course is an internship which takes place in the final weeks at the completion of the EMSP program. The student will be assigned an internship mentor and field unit with whom they will do a minimum of 48 hours, prior to graduation. This internship will give the student a chance to “put it all together” in real to life situations.

Prerequisite(s): EMSP 206 - EMS Practicum III (2)

EMSP 209L - EMS Lab IV (1)

This course affords the student the opportunity to apply and reinforce the skills that they have learned in the EMS program to this point, in a laboratory setting, concentrating on EMSP 207 and EMSP 208. The student will participate in both scenario based training as well as skill specific review.

EMSP 210 - Assessment Based Management (1)

This course serves as the cumulative review and remedial application of what the student has learned in EMSP 201-EMSP 209. The course will focus on providing summative evaluation of the student’s performance in simulated situations or scenarios. Successful completion of this course is required to obtain recommendation to sit for the National Registry Examination for EMT-Paramedic.

Prerequisite(s): EMSP 206 - EMS Practicum III (2)

EMSP 211 - Field Research and Evaluation (2)

This course encourages the student to analytically evaluate EMS operations and pre-hospital medical care and to become an advocate for change within the EMS System. A focus of this course is on conducting and evaluating a group and an independent field research project as well as presentation of research results in both written and oral formats.

EMSP 212 - EMS Budgets and Fiscal Policy (3)

This course focuses on budget development, oversight, and the management of fiscal resources in EMS organizations. The advantages and limitations of a variety of EMS funding mechanisms including subscription or membership programs, tax-based
systems and fee-for-service systems will be reviewed. Specific concentration will be provided on billing and collection procedures in fee-for-service EMS Systems. Fiscal policy and investment strategies for developing long-term fiscal stability will also be explored.

EMSP 213 - EMS Management Internship II (2)

In this course, the student will continue to work as an apprentice in an EMS Setting under the supervision of EMS management professionals. The focus of Internship II will be learning about EMS budget and fiscal operations in municipal, county, or regional based EMS organizations under fire-service, third service, and private EMS models.

EMSP 214 - EMS Resources Management (3)

This course explores the management of human and physical resources in an EMS organization. Human resource management will be reviewed from the paid and volunteer EMS system perspective, with a focus on the special considerations of human resources management in an organization with both paid and volunteer personnel. The physical resource management of this course will review fleet, facilities and inventory management strategies.

EMSP 215 - EMS Management Internship III (2)

In this course, the student will continue to work as an apprentice in an EMS setting under the supervision of EMS Management professionals. The focus of the Internship III will be learning about management of human and physical resources in municipal, county, or regional based EMS organizations under fire-service, third service, and private EMS models.

EMSP 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

English

English

ENGL 100 - ESL Transition (2)

This is a course designed to assist students whose first language is not ENGLISH. English grammar, usage, and mechanics are emphasized, as well as academic writing. ENGL 100 is designed to provide a foundation for ESL students as they transition into college level writing coursework. The course examines each student’s writing process, discusses knowledge and understanding of culture, and explores the rhetorical purpose of personal narrative and cultural response. Teaching strategies include individualized, conference-based instruction, peer tutorials, grammar and usage review, and academic and computer training.
ENGL 101 - Written English (3)

This course is an introduction to college writing. The class is designed to develop a student's ability to read a passage, analyze its meaning, and write an intelligent response which shows not only an understanding of the passage but also a working knowledge of the writing and rhetorical strategies.

ENGL 102 - Writing for Arts and Humanities (3)

The goals for Written English II are to develop students’ critical reading, thinking, and writing skills as they discuss and write about a variety of literary genres: fiction, poetry, and drama. The readings for this course include American and world literature selections that reflect a range of ethnic and cultural diversity, and a thematic approach may be utilized as long as characteristics of the genres and close reading skills and textural analysis are taught. To help achieve these goals, writing is approached as a process, requiring multiple drafts and revisions of each student paper. Students also receive instruction in research techniques and in writing the research paper. In addition, students become familiar with and cultivate an appreciation for stylistic characteristics of each genre and the timeless insights into the human condition provided through reading and study of literature.

Prerequisite(s): ENGL 101 - Written English (3)

ENGL 110 - Technical Writing & Communication (3)

Students explore techniques for improving the effectiveness of writing and communication common to the business world. Students in the courses have the opportunity to improve their ability to write and communicate through critical thinking, writing, revising, and editing.

ENGL 110L - Technical Writing & Communication Lab (1)

This course is designed as supplemental instruction to students who place into developmental education courses with “moderate” proficiencies in English and Writing.

Corequisite(s): ENGL 110 - Technical Writing & Communication (3)

ENGL 150 - Play Production (3)

This course will entail producing a play from the ground up, at a theatre, before live audiences. It will include the following activities: (1) reading a variety of plays, and from those readings, selecting the play we will do; (2) making arrangements with a local theatre for the terms and dates of production; (3) announcing and holding open auditions; (4) casting the play as well as assigning other functions to individuals or teams, e.g. stage manager(s), set designer(s), set construction (tear down), costume, props, make- up, publicity, lights, sounds, etc., each student in the class taking a role, on stage or behind the scenes, in the production; (5) rehearsing the play, which will entail lessons in acting and all other facets of play production; (6) performing the play; (7) discussing and critiquing the experience; and (8) writing an essay on some facet of the production.
ENGL 199 - Special Topics

Special Topics courses vary in content with each offering. When offered, a Special Topics course title includes a subtitle describing that course’s specific content. Courses offered have included ENGL 199–ST: Creative Writing.

ENGL 204 - Survey of American Literature (3)

This course is designed to familiarize students with the rich variety of literature produced in American—from the Colonial through the Modern periods. Students are exposed to a range of writers and traditions that constitute the diverse and multicultural American experience, through discussion and through critical thinking and writing about significant literary works. In addition to tests and quizzes, students are required to write and revise at least two formal, critical essays or equivalent writing (1,000-word computer drafted minimum); however, instructors are encouraged to assign significant amounts of writing beyond the required minimum in order to facilitate students’ continued acquisition of critical thinking, reading, and writing skills.

ENGL 208 - Survey of World Literature I (3)

This course is designed to familiarize students with great works of world literature—both Western and Eastern traditions—representing Classical, Medieval, and Renaissance periods or non-Western chronological equivalents. Students are exposed to diverse literary traditions through discussion and through critical thinking and writing about significant literary works. In addition to essay tests and quizzes, students are required to write at least one formal, critical essay (1,000-word computer drafted minimum); however, instructors are encouraged to assign significant amounts of writing beyond the required minimum in order to continue to develop students’ critical thinking, reading, and writing skills.

ENGL 210 - Creative Writing (3)

This course will entail both reading and writing in the four literary genres. Students will read text materials in the techniques in and the practice of creative writing and will build a portfolio of their own work, which will contain samples from each other four genres: poetry, fiction, drama, and literary non-fiction.

ENGL 299 - Special Topics (1-3)

Special Topics courses vary in content with each offering. When offered, a Special Topics course title includes a subtitle describing that course’s specific content. Courses offered have included ENGL 299–ST: Creative Writing.

Entrepreneurship

Entrepreneurship
**ENTR 100 - Intro to Entrepreneurship (3)**

This course is an overview of what is involved in developing a business venture opportunity into a viable business. This course includes how to organize, manage, market, and finance, plus the importance of planning.

**ENTR 110 - Funding Your Venture (1)**

This course examines methods of funding small business including loans, grants, angel and venture capital. Topics include loan packaging; grants: fact or fiction; Small Business Administration guaranteed loans, traditional bank loans, and micro-lending; credit, capital and collateral; and the advantages and disadvantages of each.

**ENTR 115 - Presenting Your Venture (2)**

This course will provide techniques and methods for presenting a business venture to a lender, partners, potential funders, and customers. Students will explore how to market ideas to all possible resource partners including branding your business image.

**ENTR 120 - Business Plan Development (4)**

This course will provide students with necessary skills to plan develop and expansion of a small business. This course will review business plan as a blueprint for business development and growth.

**ENTR 125 - Entrepreneurship Decisions (1)**

This course places special importance on decision making for the entrepreneurs. Students will examine methods and techniques of critical thinking, as unique to entrepreneurs.

**ENTR 130 - Opportunities Analysis (2)**

This course prepares students to critically and realistically analyze business ideas for successful implementation. Topics include business research, business planning and financial planning, market demand, cost benefit analysis, knowledge and experience vs business idea.

**ENTR 198 - Mentorship (1)**

This course provides students with a one-on-one nurturing and supportive relationship with a cooperating professional in an entrepreneurial-based setting for the purpose of developing specific competencies, insight, self-awareness, wisdom and skills in a way that is unique to needs, personality, learning styles, expectations, and experiences of the people involved. Emphasis will be on developing potential skills and competencies. Sites will vary dependent on emphasis chosen.
**ENTR 200 - Red Carpet Customer Service (3)**

This course is designed for anyone who wants to bring their business’s internal and external customer service to the level of star treatment. Based on the unique ways celebrities are treated, learn techniques you can use to treat your customers to a red-carpet experience, guaranteeing repeat business and stellar word of mouth.

**ENTR 292 - Entrepreneurship Capstone (3)**

This capstone course brings together all the student has learned into a functional retail operation where knowledge, skills, abilities, and behaviors are tested.

**Fire Science**

**FSCI 102 - Introduction to Fire Prevention (3)**

A survey of basic fire prevention practices including the history of fire prevention efforts, hazard recognition and abatement, legal aspects of code enforcement, public education program development, research and development of fire safety standards and administration of fire prevention efforts.

**FSCI 110 - Firefighter I (3)**

A introduction to basic firefighting skills and techniques. Equivalent to Firefighter Section 1 training requirements of the West Virginia State Fire Commission.

**FSCI 111 - Firefighter II (3)**

A continuation of FSCI 110 Introduction to Fire Service I, equivalent to Firefighter Section II training requirements of the West Virginia State Fire Commission.

**FSCI 112 - Hazardous Materials I & II (3)**

This course provides the basic skills required to properly identify hazardous materials and respond in a defensive fashion to contain or control releases of hazardous substances. This course satisfies the OSHA training requirements of 29 CFR 1910.120 for First Responder Awareness and Operations.
Prerequisite(s): FSCI 110 & FSCI 111.

**FSCI 113 - Hazardous Materials III (3)**

This course provides the basic skills required to properly contain and control releases of hazardous materials. This course satisfies the OSHA training requirements of 29 CFR 1910.120 for First Responder Operations.

Prerequisite(s): FSCI 112

**FSCI 114 - Fire Officer I (3)**

This course is designed to provide the first-line officer the basic administrative and emergency operation skills needed for effective management of day-to-day department operations. Topics include fire department structure, leadership, legal aspects, safety, labor relations, budgeting and information management. Equivalent to Officer I training requirements of the West Virginia State Fire Commission.

**FSCI 115 - Life Safety Code (3)**

This course is designed to familiarize students with life safety standards established for various types of buildings. Topics covered include building use and occupancy, calculating occupant load, means of egress requirements, construction type, interior finish materials, and fire protection system requirements.

**FSCI 116 - Fire Instructor I (3)**

Upon successful completion of this course, the student will be able to understand techniques related to teaching.

**FSCI 117 - Fire Instructor II (3)**

Upon successful completion of this course, the student will be able to develop performance objectives, lesson plans, instructional aides, evaluations systems, references and records, and reports.

**FSCI 118 - Fire Officer II (3)**

Upon successful completion of this course the student will be able to find ways to effectively manage human resources, community/public relations, fire department organization and administration including budgets, reports, and planning, fire inspection, investigation, and public education, emergency service delivery, and safety.
FSCI 119 - Rapid Intervention (3)
Upon successful completion of this course, the student will be able to breach walls, lift collapsed structural elements, perform hot SCBA changes, and perform valuable self rescue procedures.

FSCI 120 - Principles of Extrication (3)
Upon successful completion of this course, the student will be able to identity and safely use vehicle extrication tools on many different types of vehicles.

FSCI 121 - Driver Operator-Pumper (3)
Upon successful completion of this course the student will be able to determine how much water is flowing, give the nozzles in service the available pressure and available hose lines, and calculate pressures needed for a supply pumper, relay pumper, and attack pumper.

FSCI 160 - Blueprint Reading And Plans Review (3)
This course enables students to read and understand blueprints used for the design and construction of buildings and fire protection/safety systems in various industrial applications. Also covered are plans review techniques and procedures utilized for verifying compliance with various codes and standards.

FSCI 190 - Fireground Strategy And Tactics (3)
This course examines the various tactics and strategies utilized during fireground operations. Emphasis is placed on incident command and control, safety, personnel and resource utilization, accountability and communications.

FSCI 199 - Special Topics (1-4)
A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

FSCI 201 - Structural Design & Building Codes (3)
This course covers the fundamentals of structural design and the application of building code requirements to various types of buildings. Included is a review of building code requirements as related to occupancy type, construction type, height and area limitations, fire protection system requirements, and use of fire resistive materials.
FSCI 202 - Flammable and Explosive Materials (3)

A introduction to the properties of flammable and explosive materials with emphasis on proper storage, handling, and use. Also included are special considerations for mitigation of flammable and explosive material hazards under emergency conditions.

FSCI 203 - Emergency and Rescue Operations (3)

This course provides students a fundamental knowledge of operational procedures, personnel requirements, and specialized equipment and resources required for various emergency and rescue operations.

FSCI 204 - Fire Inspection/Code Enforcement (3)

A basic understanding of fire and life safety codes, principles and protocol for conducting fire inspections and reporting and abating identified deficiencies.

FSCI 212 - Toxic, Corrosive, Radioactive Material (3)

An introduction to the properties of toxic, corrosive, and radioactive materials with emphasis on proper storage, handling, and use. Also included are special considerations for mitigation of toxic, corrosive, and radioactive material hazards under emergency conditions.

FSCI 230 - Fire Investigation (3)

This course provides the basic skills needed to conduct fire investigations. Topics covered include fire behavior, fire cause determination, fire scene investigation procedures and techniques, evidence collection and legal aspects. Upon completion of the course, students will be able to identify the origin and cause of a fire by using current fire investigation techniques and conduct a fire investigation in accordance with applicable legal requirements.

FSCI 242 - Fire Department Administration (3)

This course is designed to provide a fundamental knowledge of fire department administrative practices. Topics covered include personnel and resource management, financial management, legal aspects, organizational analysis, supervisory practice and strategic planning.

FSCI 251 - Fire Service Occupational Safety & Health (3)

This course is designed to provide students with the skills necessary for development, implementation, and evaluation of a comprehensive fire department occupational safety and health program. Topics include program administration, safety training
and education, emergency operations safety, protective clothing and equipment, apparatus safety, medical and physical fitness requirements, and facility safety.

**FSCI 270 - Fireground Organization And Command (3)**

This course provides an in-depth study of the model incident command system utilized for management of large scale and complex emergency incidents. Included is a review of operations at natural and manmade disasters requiring interagency and/or interjurisdictional coordination. Emphasis is placed on the relationship between the operational function and preparedness, effective response, mitigation and recovery.

**FSCI 280 - Directed Study (1–6)**

This variable credit course allows students to pursue a Fire Science research project of particular interest. Students registering for this course must have prior approval from the Program Coordinator for Fire Science.

**FSCI 292 - Internship In Fire Science (3)**

This course involves practical experience in fire service organizations in which the student engages in on-the-site activities of a practical nature. Interns learn how to translate classroom theory and methods into professional skills. Activities are under the supervision of trained personnel. Application for the internship must be made to the fire science program advisor.

**FSCI 293 - Fire Science On-the-Job-Training (1–13)**

This course is designed to award credit to those persons who have participated in a supervised on-the-job training program in fire science. Credit is awarded upon receipt of a letter from the on-site supervisory stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore, a student must work 1950 actual hours to receive 13 credit hours.)

**FSCI 295 - Fire Science Degree Evaluation (2)**

This capstone course is designed to “put it all together” for the student who is about to graduate with an A.S. in Fire Science. This course will evaluate the student’s knowledge of the program, including but not limited to: chemistry, industrial fire protection, emergency management, basic fire suppression, strategies and tactics, fire investigation, and management practices.

**FSCI 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
French

FREN 101 - Elementary French (3)

This is a basic, culturally-oriented course in conversational French designed for beginning students who wish to develop skills in speaking, writing, and comprehending the French language. Emphasis is placed on oral communication through dialogue and guided compositions.

FREN 102 - Elementary French II (3)

A continuation of FREN 101, this course allows students to strengthen their comprehension and speaking proficiency in French by providing extensive practice in oral and written communication and self-expression and through discussions and oral presentations of readings in French and Canadian culture.

Prerequisite(s): FREN 101.

Gaming Careers Institute

GAME 100 - Introduction to Table Games (1)

This course covers the general responsibilities of the dealer and is a pre-requisite for other table games training courses. Emphasis is placed on correct chip handling techniques, identifying the value of each color chip, learning to read the total value of a bet, and pit procedures.

GAME 101 - Blackjack (2)

This course covers the fundamentals of dealing Blackjack. Emphasis is placed on card totaling, chip handling and cutting, card shuffling and card placement. Attention is given to game and accounting procedures, accuracy, and speed.

GAME 102 - Midi Baccarat (2)
This course is designed to train students in all aspects of dealing Midi Baccarat. Students will learn about the equipment used, the rules and object of the game, check handling and odds. Extensive hands on training is used to assist students in mastering all aspects of this exciting game.

GAME 103 - Poker (2)

This course covers the fundamentals of dealing Poker. Instruction is provided in the fundamentals of rake/antes/blind bets, game rules and regulations, dealer’s responsibilities and game security.

GAME 104 - Roulette (2)

This course covers the fundamentals of dealing Roulette. Emphasis is placed on chip handling, table layout, accurate and quick mental multiplication, and accuracy in clearing the table.

GAME 105 - Craps (4)

This course covers the fundamentals of dealing craps. Emphasis is placed on the knowledge of the procedures on a variety of bets, accurate and quick mental multiplication and chip handling. Special attention is given to game procedures, accounting procedures, accuracy and speed.

GAME 106 - Novelty (2)

Novelty Game training focus’ on a group of highly popular games including Let It Ride, Three Card Poker, Four Card Poker, Texas Hold Em Bonus, and the Big Six. Students will learn skills such as card delivery, rule sets, and payout structures for all five games.

GAME 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

GAME 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

General Education
General Education

CGEN 100 - First Year Experience (3)

This course will focus on crucial components for the first year of higher education: reading skills, study skills, critical thinking, and good habits for success. This course will provide the student with systematic exposure to successful study skills and will emphasize adaptation to individual learning styles. In addition, students will be required to apply critical reading and thinking skills to a variety of activities drawn from academic disciplines, contemporary issues, and individual life experiences.

CGEN 101 - Career Transition (3)

This course will provide a foundation of career development skills and exploration of life planning issues. Components will include self-assessment, academic exploration, study of career fields, and information interviewing. Job search areas of the course would include networking, resume and correspondence, writing interview preparation, job search etiquette, decision-making, work transition, and using the Internet in your search.

CGEN 110 - Portfolio Development I (2)

The Portfolio Development course is designed to assist adult students with the development of a comprehensive portfolio documenting knowledge acquired through life/work experiences and other formal or informal learning experiences. Students are guided through a series of group sessions on learning style, college level learning, skill identification, goal setting, adult development and career changes and the portfolio development process.

Prerequisite(s): Grade of C or better ENGL 101.
This is a Pass/Fail course and will not affect the GPA; however, two credit hours are earned upon passing this course.

CGEN 111 - Portfolio Development II (1)

This is the second half of a two-course series. In this course, the student is responsible for the development of a written portfolio, which provides the description, analysis, and documentation of learning experiences appropriate for his/her own educational program of study. There is a $300 Portfolio fee attached to this class.

Prerequisite(s): CGEN 100.
This is a Pass/Fall course and will not affect the GPA; however, one credit hour is earned upon passing this course.

CGEN 115 - Technology Orientation (1)

Technology Orientation will train students to easily identify and use online content, which has a high priority for higher education institutions today. The course will focus on technology-enhanced educational methodologies to provide students with
the skills they must develop to be successful in the academic environment. They will also develop familiarity with an online learning environment and online resources.

CGEN 116 - Developing Computer Fluency (3)

Developing Computer Fluency helps students develop skills necessary to work with computers at home, at school, and in the workplace. This course will introduce the student to computer terminology and help develop the skills necessary to succeed in the academic environment and workplace. Students will be introduced to word processing, spreadsheets, databases, and presentation software. It will train students to easily identify and use online content, which is a high priority for higher education institutions today. Students will also develop a familiarity with an online environment and online resources.

CGEN 120 - Student Government Association

This course provides students with hands-on experience on being a leader, working together, on a team, being responsible, serving as a liaison, and representing a large group of individuals and their views on specific issues. The student will also receive encouragement to grow personally and academically.

CGEN 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CGEN 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

CMTC 156 - Real Estate (6)

This class will include the major aspects of real estate from broad perspectives through “fine print” detail. Acquire a ready understanding of legal and technical concepts, documents, and successful procedures. This course includes and satisfies the state requirement of 90 mandatory hours classroom study in real estate.

CMTC 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
CMTC 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

General Physical Education

General Physical Education

GSPE 124 - Zumba (1)

Zumba combines Latin and International music with a fun and effective high energy workout. Come Join the Party! Sneakers required and bring water.

GSPE 129 - Beginning Tap Dancing (1)

This course will introduce the student to basic beginner level terminology and tap exercises. This course will be primarily a physical education/activity based course with some written supplementary activities to augment understanding of terminology and performance. It is mandatory for each student to have tap shoes.

GSPE 147 - Women’s Self-Defense (1–2)

This class is a beginner-level women’s self defense class that is tailored to suit the needs of the students. Students will use exercise activities to gain awareness of their surroundings, increase self-confidence, identify danger areas, develop poise, and achieve a positive state-of-mind. The skills gained in this class can be applied to everyday life. Principles of self defense will be learned in a controlled simulated environment with cool down exercises to relieve stress through partner stretching. Loose fitting clothing is recommended.

GSPE 197 - Beginning Yoga (1–2)

This class is a beginner-level hatha yoga class is based on teachings by B.K.S. Iyengar that uses yoga to unite the movement of the body with the rhythm of the breath through continuous exploration of pranayama/mantras, sun salutations, standing and balancing postures, back and forward bends, twists, hip openers, inversions, and meditation. A yoga mat and yoga block are required. A yoga strap and wool blanket are recommended.

GSPE 198 - Intermediate Yoga (1–2)
This class is an intermediate hatha yoga class based on teachings by B.K.S. Iyengar that uses yoga to unite the movement of the body with the rhythm of the breath through continuous exploration of pranayama/mantras, sun salutations, standing and balancing postures, back and forward bends, twists, hip openers, inversions, and meditation. A yoga mat and yoga block are required. A yoga strap and wool blanket are recommended.

**GSPE 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**GSPE 210 - Fitness for Life (2)**

This course is designed to assist participants in developing a healthier lifestyle through appropriate exercise programs and behaviors that contribute to optimal health and wellness.

**History**

**HIST 101 - World History to 1500: Early Man Through the Renaissance (3)**

This course is a survey of World History covering the development of ancient civilizations and cultures to the year 1500, beginning with prehistoric humans and the rise of the first civilizations, including Ancient Mesopotamia, Egypt, the Indus River Valley, and Early China. Continuing with the Classical Era, the survey encompasses the Greek and Roman, Indian, Japanese, and Saharan African Civilizations. The course then examines World Civilizations in the Middle Ages, including the Middle East, Europe, Asia, the Americans, and Africa, before concluding with the European Renaissance. The course compares the development and philosophical foundations of all the major world religions including Judaism, Hinduism, Buddhism, Christianity, and Islam, as well as the major political, economic, social, and cultural systems to the year 1500.

**HIST 102 - World History Since 1500: The Renaissance Through the Present (3)**

This course is a survey of World History from the European Renaissance to the present. At the beginning of the course, developments in the Western World between 1500 and 1800 received special attention, including the Renaissance, Reformation, Scientific Revolutions, Age of Exploration, Enlightenment, colonization of the Americans, and the transition from mercantilism to capitalism. Having identified the dramatic transition taking place in the West, the course then looks at the impact of those changes around the globe through the trans-Atlantic Slave Trade, political revolutions in the Americans, and Europe, industrialization, 19th century imperialism, world wars I and II, communist revolutions, the rise of fascism, the Cold War, and the 19th and 20th century decolonization efforts in India, Africa, Southeast Asia, and the Middle East. The course closes with a review of economic and political globalization since the 1970s. Thematically, the course explores the nature of political, economic, and technological power and the relationship of that power to issues or race, class, gender, religion, and environment.
HIST 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

HIST 210 - WV and Appalachian History (3)

This course studies diverse elements of the history of West Virginia including economic, cultural, geographic, and political factors that have impacted the development of the state since the colonial period. Emphasis will be placed on patterns of colonial settlement, the statehood movement, industrialization and exploitation, and current conditions in the state and Appalachian region. A survey of West Virginia will be conducted in relation to the Appalachian region, the nation, and the world.

Industrial Maintenance

Industrial Maintenance

INDM 120 - General Industrial Maintenance/ Mechanics (3)

This course is a comprehensive introduction to fundamentals of industrial mechanical concepts, principles, and equipment. The class covers topics such as rigging and lifting, ladders and scaffolds, hydraulics and pneumatics, lubrication, bearing, flexible belts, and mechanical drives, vibration, and alignment. Classroom lectures and hands-on labs will enable the student to gain familiarity and experience.

INDM 140 - National Electrical Code (3)

The primary objective of the NEC course is terminology and familiarization with NEC, which is written in semi-legal terms.

INDM 160 - Welding Technology (3)

This course provides basic understanding and entry-level skills. It covers safety and use of basic Shielded metal arc welding and Oxy-fuel flame cutting. Classroom demonstrations and hands-on labs will augment lectures to enable the student to gain familiarity and experience.

Information Technology
Information Technology

CTIS 150 - Forensic Computer Examiner (1–13)

The online Forensic Computer Examiner program prepares individuals for a career as a forensic computer examiner. Student will learn to retrieve evidence and prepare reports, based on that evidence, which will stand up in a court of law. This program is an authorized Certified Computer Examiner (CCE) training course and thoroughly prepares students to take the CCE exam.

CTIS 151 - Help Desk Specialist (1–13)

The Help Desk Specialist online program will prepare students for a challenging technical support role. Upon completing the Help Desk Specialist course work, students will be qualified to assist customers, troubleshoot hardware and software problems, and document solutions. The Help Desk Specialist training class will facilitate a higher level of understanding of the vital communication skills necessary for conflict management and effective user training as well as provide students with strong technical foundations.

CTIS 152 - Web Database Developer (1–13)

The Web Database Developer online program will provide students with intermediate and advanced knowledge and skills utilizing and leveraging databases on the Internet. Students will be able to incorporate database design, development, and deployment into e-commerce sites, dynamic web sites, and business-to-business data collections.

CTIS 153 - Web Master (1–13)

This online Webmaster program begins by teaching simple web page development and progresses by introducing new concepts by involving you in active web page implementation using HTML and Dynamic HTML.

CTIS 154 - Certified Database Administrator (MCDBA) (1–13)

The online MCDBA program will prepare students for Microsoft’s national MCDBA certification exam. Being a certified MCDBA in internationally recognized and is the designation awarded to professionals who design, implement, and administer Microsoft SQL Server databases.

CTIS 155 - 3ds max Program (1–13)

This online program will teach students how to use both 3ds max and Character Studio to design, develop, and animate 3d video game characters. This program includes an internship opportunity for an additional fee. Internships are either three or six months and are performed remotely from your current location.
CTIS 156 - Cisco CCNA (10)

This online program is comprised of two sections. The first section “Introduction to Network Engineering,” is an ideal first step into the world of network engineering. Students learn the fundamentals of data network theory and the technologies that make the network tick. Students apply this knowledge by performing hands-on networking engineering work on Cisco network devices in a simulated network environment. The second session, “Practical Network Engineering” covers some of the most powerful networking technologies and prepares students to achieve Cisco CCNA certification. This program involves extensive hands-on work on Cisco routers, switches, and firewalls in a simulated network environment.

CTIS 157 - AutoCAD (10)

The course takes a step by step approach to learning AutoCAD, starting with a few basic tools to let students create and edit a simple drawing, and then gradually introducing tools that are more advanced. Examples and practice exercises are taken from a variety of fields where AutoCAD is used. This program begins by focusing on 2D drawing and editing tools, objects on layers, text, and basic dimensions. After mastering the basic skill, students will move on to explore efficiency tools, complex objects, using external references/image files, advanced plotting, enhancing productivity with simple customization to express basic ideas. Non-verbal and pantomime use in language emphasized.

CTIS 158 - Linux + I (13)

The course measures vendor-neutral Linux+ knowledge and skills for an individual with at least six month practical experience (Network+ or A+ background). Students taking this program will learn the fundamentals of the Linux operating system including how to configure Linux system services, how to manage a Linux system in a networked environment, and finally how to manage the servers a Linux system provides.

CTIS 159 - Linux+ II (12)

This is the second half of the Linux+ course of study. Students taking this program will learn the fundamentals of the Linux operating system including how to configure Linux system services, how to manage a Linux system in a networked environment, and finally how to manage the servers a Linux system provides.

CTIS 160 - Video Game Design (13)

In this online program, students will learn the core programming and mathematics skill necessary for game developers and receive an introduction to 3D graphics pipeline programming. This program will fully prepare the students for more advanced training in the game technology field. No assumptions about prior game or graphics programming experiences are made although a reasonable familiarity with computers and background in high school level mathematics are required.

CTIS 161 - Video Game Development (13)
This is the second half of the Video Game Design and Development Program. In this online program, students will learn the core programming and mathematics skill necessary for game developers and receive an introduction to 3D graphics pipeline programming. This program will fully prepare the students for more advanced training in the game technology field. No assumptions about prior game or graphics programming experiences are made although a reasonable familiarity with computers and background in high school level mathematics are required.

**IT 105 - Computer Ethics (3)**

This course is designed to educate existing and future Information Technology professionals on the tremendous impact ethical issues have on the use of information technology in the modern business world. The topics covered include; an overview of Ethics, Ethics for IT professionals and IT users, Computer Internet and Crime, Privacy, Freedom of Expression, Intellectual Property, Software Development, Employer/Employee Issues, and individual case examinations to more closely represent real-life examples of each of these topics.

**IT 153 - Desktop Support Technician I (3)**

This course provides students with the knowledge and skills to troubleshoot and escalate or repair problems with Windows desktop operating systems by reacting to incident requests from end users. This course will provide the basic knowledge of system architecture and security needed to provide the students with the requisite skills required to support end users and adhere to ITIL/ MOF foundational operations.

**IT 154 - Desktop Support Technician II (3)**

This course provides content on troubleshooting and escalating or repairing problems with Windows desktop operating systems by reacting to incident requests from end users. Students will be able to resolve operating system issues by telephone, by connecting to an end user’s system remotely, or by visiting an end user’s desktop. The student will have a working knowledge of operating in a workgroup or Active Directory domain environment and how end users are affected by each environment.

**IT 180 - A+ Essentials (4)**

This hands-on course is designed to show students how to upgrade and troubleshoot PCs on their own. Topics include setting up motherboards and hard drives; identifying and installing memory; modifying CMOS settings; configuring sound cards and modems; troubleshooting; and installing basic operating systems. Students will also learn to install, configure and troubleshoot PC Operating Systems. Students will receive experience working with a wide variety of operating systems.

**IT 185 - Introduction to Linux (3)**

This course will prepare students to work with the Linux operating and help them prepare for the Linux+ CompTIA certification exams. Students will install three different Linux operating systems and complete many hands-on lab exercises.
**IT 188 - Introduction to Programming Logic (3)**

This course introduces the basic concepts of programming logic. Students will examine the basic constructs of selection, sequence, and repetition, abstract data structures of records, arrays, and linked lists, and file access methods.

**IT 190 - Introduction to Programming in C++ (3)**

This course covers the fundamentals of the Microsoft® Foundation Class (MFC) libraries. This course will familiarize programmers with the Microsoft Developer Studio™ visual development system and teach them how to create single document interface (SDI) applications using MFC and the Visual C++ development system.

**IT 191 - Practicum (1)**

This course will cover testing methodologies and study techniques to assist in preparing students for the A+ certification exam.

**IT 192 - Introduction to Programming in Visual Basic (3)**

This course familiarizes the student with the Visual Studio environment using Visual Basic. Students will use Foundation Class libraries to develop simple applications.

**IT 194 - Introduction to Programming Java (3)**

This course is an introduction to programming in Java covering the use of pre-written Java classes and methods and the development of new classes and methods. The class emphasizes program structure and documentation along with algorithm development. This course is part of the WV Statewide IT Program. An additional fee of $150 is attached to this class.

**IT 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**IT 200 - Network+ (3)**

This custom-designed course begins with a brief review of hardware, operating systems, and other principles helpful to networking students. It then moves on to comprehensive networking skill sets, all of which prepare the IT 200 student to complete their CompTIA Network + exam. Throughout the course, students are introduced to invaluable study techniques and industry resources, all of which are geared toward laying the foundation for efficient adult IT learning.
IT 204 - Windows Fundamentals (3)

This course will introduce students to the fundamentals of Windows desktop operating systems in a networked environment. Students will learn about system imaging, windows deployment, unattended installations, TCP/IP from the Microsoft® perspective, fundamental networking skills, file and folder permissions, file and print services, hyper-v, and VMware® virtualization. This course will prepare students to enter the Microsoft® networking courses leading towards the MCITP certification.

IT 205 - Developing & Implementing Web Applications w/MS Visual Basic .NET & Visual Studio .NET (4)

This instructor-led course teaches Microsoft Visual Basic® programmers and beginning web developers the fundamentals of web application site implementation by using Microsoft ASP.NET and Microsoft Visual Basic .NET. This course focuses on using the Microsoft Visual Studio® .NET environment and the Microsoft .NET platform to create an ASP.NET web application that delivers dynamic content to a website.

IT 208 - Administering SQL Server (3)

This course provides students with the knowledge and skills required to install, configure, administer, and troubleshoot the client-server database management system of Microsoft® SQL Server.

IT 209 - Designing and Implementing Databases with SQL Server (3)

This course provides students with the technical skills required to program a database solution by using Microsoft® SQL Server.

Prerequisite(s): IT 208.

IT 240 - Home Technology Integration (3)

This course is to prepare students for the CompTIA HTI+ certification. It is based on a set of standards designed to measure the mastery of core competencies regarding the installation, integration, and trouble shooting of the following automated home sub-systems: Home Security, Audio/Video, Computer Networks, Electrical Wiring, HVAC (Heating/Air Conditioning Systems), Cable/ Satellite, Broadband, Telecommunications and Structured Wiring.

IT 252 - Distributed Applications with Visual C++ (3)

This course teaches developers who use the Microsoft® Visual C++® development system how to create component object model (COM) objects using Visual C++ and the Active Template Library (ATL).

Prerequisite(s): IT 253.
IT 253 - Desktop Applications with Visual C++ (3)

This course teaches C++ programmers how to develop applications by using Microsoft® Foundation Class (MFC) Library and the Microsoft Visual C++® 6 development environment.

Prerequisite(s): IT 190.

IT 254 - Distributed Applications with Visual Basic (3)

Students apply the Microsoft Solution Framework to a multi-tier environment, creating a user interface, COM DLLs, and Active X data objects using Visual Basic.

Prerequisite(s): IT 255.

IT 255 - Desktop Applications with Visual Basic (3)

This course introduces user interface design, including control arrays, menu basics and data validation. Students use VB classes to model business objects. COM objects and Active X basics are introduced.

Prerequisite(s): IT 192 and IT 251.

IT 260 - Introduction to Oracle (3)

This course offers students an extensive introduction to data server technology. The class covers the concepts of relational databases and the powerful SQL and PL/SQL programming languages. Students are taught to create and maintain database objects and to store, retrieve, and manipulate data. In addition, students learn to create PL/SQL blocks of application code that can be shared by multiple forms, reports, and data management applications. Demonstrations and hands-on practice reinforce the fundamental concepts.

IT 261 - Oracle Forms I (3)

In this course, participants build and test interactive applications consisting of one or more Oracle forms modules. Working in a graphical user interface (GUI) development environment, participants will build a complete forms application. In the process, participants learn how to customize forms with graphical user input items, such as check boxes, list items, and radio groups. They also learn how to modify data access by creating event-related triggers.

Prerequisite(s): IT 263.

IT 262 - Oracle Reports (3)

In this course, participants learn to develop a variety of standard and custom reports using Oracle Reports in a client/server environment. Class exercises guide participants in retrieving, displaying, and formatting data in numerous reporting styles such
as tabular, break, master/detail, matrix, and form letter reports. Participants will also customize their reports by combining text and graphics with quantitative data to meet specific business requirements.

Prerequisite(s): IT 264.

**IT 263 - Oracle Program Units (2)**

This course enables participants to learn how to write PL/SQL procedures, functions, and packages. Working in both the Procedure Builder and the SQL*Plus environments, participants will learn how to create and manage PL/SQL program units and database triggers. Participants will also learn how to use some of the Oracle-supplied packages.

Prerequisite(s): IT 260.

**IT 264 - Oracle Forms II (2)**

This course instructs technical professionals on how to broaden their skills with Oracle Forms. The course makes extensive use of complex Oracle Forms concepts.

Prerequisite(s): IT 261.

**IT 269 - Project Management (3)**

This comprehensive course examines the various models used to develop and control the Work Breakdown Structure (WBS), Schedule, and Cost. Additionally, the class will perform analysis on the time, cost models, and evaluate the outcome. There will be case problems and labs utilizing MS Project as the project management process tool.

**IT 270 - Installing, Configuring, & Administering Windows Desktop Operating Systems (3)**

This course will prepare students to install, configure, and administer Windows Vista. The student will possess the knowledge and skills to configure Windows Vista for optimal performance on the desktop, including installing, managing, and configuring the new security, network, and application features in Windows Vista.

Prerequisite(s): IT 204

**IT 276 - Security+ (3)**

This course is designed to provide students with the fundamentals of security, and to help prepare for the CompTIA Security+ exam. It covers material related to general security concepts, communications security, infrastructure security, basics of cryptography, and operational/organizational security.
IT 289 - Planning and Maintaining a MS Windows Server Infrastructure (3)

The goal of this course is to provide students with the knowledge and skills necessary to plan and maintain a Windows® Server network infrastructure.

IT 290 - Managing & Maintaining a Microsoft Windows Server (3)

This course provides students with the knowledge and skills that are required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data in a Microsoft Windows Server™ environment.

IT 291 - Implementing, Managing, and Maintaining a MS Windows Server Network Infrastructure (3)

This course provides students with the knowledge and skills to implement, manage, and maintain a Microsoft Windows Server™ network infrastructure. The course is intended for systems administrator and systems engineer candidates who are responsible for implementing, managing, and maintaining server networking technologies.

IT 292 - Internship in Information Technology (3)

This is a capstone course. A student participates in an intensive internship, externship, or cooperative with an appropriate agency, company, or organization. Students will also develop resume building skills, portfolio development skills, job interview skills, job search skills, and certification preparation. Students are required to participate in mandatory love meetings that are announced prior to the start of the semester.

IT 294 - Planning, Implementing, & Maintaining a MS Windows Server Active Directory Infrastructure (3)

This course includes self-paced and instructor-facilitated components. It provides students with the knowledge and skills to successfully plan, implement, and troubleshoot a Microsoft Windows Server™ Active Directory® directory service infrastructure. The course focuses on a Windows Server service environment, including forest and domain structure, Domain Name System (DNS), site typology and replication, organization unit structure and delegation of administration, Group Policy, and user, group, and computer account strategies.

IT 298 - Designing Security for a MS Windows Server Network (3)

This course provides the student with the knowledge and skills to design a secure network infrastructure. Topics include assembling the design team, modeling threats, and analyzing security risks in order to meet business requirements for securing computers in a networked environment. The course encourages decision-making skills through an interactive tool that stimulates real-life scenarios that the target audience may encounter. The student is given the task of collecting the information and sorting through the details to resolve the given security requirement. The goal of this course is to provide students with the knowledge and skills necessary to plan and maintain a Windows® Server network infrastructure. (Moved from IT 299)
IT 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Language

CLAN 101 - Sign Language I (3)

In this course, students develop communicative capabilities utilizing American Sign Language (ASL). In addition to learning about Deaf culture, students will acquire functional sign phonology, vocabulary, and grammatical skills adequate to receive and convey information and ideas in professional and social situations.

CLAN 102 - Sign Language II (3)

Continued sign vocabulary growth, with introduction to idiomatic phrases. Emphasis on use of classifiers, expression, body postures, and the signing space.

CLAN 103 - Elementary Japanese I (3)

Elementary Japanese I is the first step in the series of Japanese courses. The elementary course introduces students to everyday Japanese through the four major language learning skills: listening, speaking, reading, and writing. This learning chain of skills will be followed specifically in the previously described order to produce a realistic, natural approach to successful language learning.

CLAN 104 - Elementary Japanese II (3)

Elementary Japanese II is the second in the series of Japanese courses. The elementary course introduces students to everyday Japanese through the four major language learning skills: listening, speaking, reading, and writing. This learning chain of skills will be followed specifically in the previously described order to produce a realistic, natural approach to successful language learning.

CLAN 105 - American Sign Language (3)
American Sign Language is a course designed to focus on the development of beginning expressive and receptive sign language. Students will increase their signed vocabulary and continue ‘fine tuning’ their basic vocabulary and finger spelling; focusing on speed, clarity, and smoothness. Class time will include practice.

CLAN 108 - Deaf Culture & History (3)

This course gives students an understanding of the Deaf Community and Culture and reviews the history of Deaf education in the United States as well as how technology has impacted the Deaf community. The course discusses various important topics like languages, communication methods, laws concerning the Deaf, professions within the Deaf community, and education. Deaf history explores the foundation of the first deaf school and universities for the Deaf and technology impacts on Deaf community development. Deaf culture studies include understanding the unique culture of the Deaf community, attitudes from and towards the Deaf, family values, social, political, humor, performing arts, jokes, organizations, clubs, organizations, educational issues, and the diversity of memberships.

CLAN 109 - Sign Language III (3)

This course is a continuation of Sign Language II. The course emphasized grammar, vocabulary development and the deaf culture. Students will expand dialogues, short story, narratives, short conversations that include both receptive and expressive skills. Emphasis will be placed on signing techniques as well as signing speed and accuracy.

CLAN 120 - Russian Language & Culture (3)

This class lays the foundations for learning the Russian language, with emphasis on proficiency in communication. Students study Russian pronunciation, communication, and basic grammar. Students will also learn to read and write the Cyrillic alphabet. This course will add to the students’ expertise in the work world, or travel, and for further study.

CLAN 199 - Special Topics

Special Topics courses vary in content with each offering. When offered, a Special Topics course title includes a subtitle describing that course’s specific content. Courses offered have included CLAN 199–ST: Sign Language III.

CLAN 201 - Intermediate Japanese I (3)

Elementary Japanese III is the second step in the series of Japanese courses offered. The elementary courses introduce students to everyday Japanese through the four major language learning skills: listening, speaking, reading, and writing. This learning chain of skills will be followed specifically in the previously described order to produce a realistic, natural approach to successful language learning.

CLAN 202 - Intermediate Japanese II (3)
Elementary Japanese II is the last half of the second step in the series of Japanese courses offered. The elementary courses introduce students to everyday Japanese through the four major language learning skills: listening, speaking, reading, and writing. This learning chain of skills will be followed specifically in the previously described order to produce a realistic, natural approach to successful language learning.

**CLAN 203 - Advance Japanese I (3)**

Advanced Japanese I is the third step in the series of Japanese courses offered. It is highly recommended that only students who have taken both elementary and intermediate Japanese courses or those who have had at least two years of previous Japanese experience take this course. The advanced course continues to push students through both formal and informal Japanese thorough the four major language learning skills: listening, speaking, reading, and writing. This leaning chain of skills will be followed specifically in the previously prescribed order to produce a realistic, natural approach to successful language learning. Third and fourth year Japanese students are expected to perform a great deal of outside preparation in order to be ready for this class.

**CLAN 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Leadership Development**

**LEAD 101 - Understanding Leadership (1-2)**

This course will clarify why and how to use the Mission, Vision, and Values of the company in focused leadership development. Each participant's role in Leadership Development will be clarified.

**LEAD 102 - Leading by Communication (1-2)**

This courses teach leaders how to get results through people. A personality assessment tool will assist participants to improve work productivity, teamwork, and communication by discovering and respecting behavioral styles.

**LEAD 103 - Improving Personal Productivity (1-2)**

This course is a part of the Leadership Development Training program used by Economic and Workforce Development for training in business and industry and is being considered as part of the Organizational Leadership Development certificate.
LEAD 104 - Project Management (3)

This course will help leaders learn how to set measurable project objectives and create a practical plan to achieve them.

LEAD 105 - Performance Management (1-2)

In this course students will learn that performance management is an ongoing, continuous process of communicating and clarifying job responsibilities, priorities, and performance expectations in order to ensure mutual understanding between a supervisor and employee.

LEAD 106 - Customer Service (1-2)

Exceptional customer service is pertinent to an organization’s success. Supervisors must understand their role in creating and sustaining standards of excellent customer service in their business operation. To effectively influence customers, supervisors must develop and provide effective ways of developing and motivating employees, and measuring service levels.

LEAD 107 - Coaching & Retaining Talent (1-2)

This course helps leaders create an environment in which people feel valued and satisfied in their jobs. Leaders will gain an understanding of their critical role in retaining organizational talent.

LEAD 108 - Building & Leading Teams (1-2)

Build a high performance team by understanding team dynamics, evaluating your team's performance, and develop an action plan for continued team success.

LEAD 109 - Leading & Sustaining Change (1-2)

Key leaders will learn about and practice the skills that will enable them to deal with change more effectively. This course will help individuals, teams, and organizations understand, accept and successfully transition through change in turbulent times.

LEAD 110 - Problem Solving, Brainstorming, & Critical Thinking (1-2)

Utilizing training and practice, develop teams that solve problems through brainstorming and critical thinking.

LEAD 111 - Managing Conflict & Difficult Situations (1-2)
Learn strategies of conflict management to develop professional skills needed to manage disputes and disagreements positively and proactively.

**LEAD 112 - Leading Multi-Generational Workforce (1)**

Managing age diversity within the workplace is an essential skill for all those who supervise others. There are four generations working within most organizations. As each group ages thru its lifecycle, its members will evolve in their attitudes, values and expectations. Learning to managing in a cross-generational environment requires perspective, patience, and a set of skills that enable nurturing the best from each age group and fostering collaboration at the same time.

**LEAD 113 - Effective Presentation Skills (2)**

Plan, prepare, practice and present more effective presentations. Participants apply what they have learned, practice their skills, and gather feedback from an audience of peers and supervisors.

**LEAD 114 - Preventing Harassment & Diversity Awareness (1)**

A diverse workforce provides a larger pool of ideas and experiences. Organizations can draw from that pool to meet business strategy needs and meet the needs of customers and employees more effectively. Individuals must be treated with respect and dignity in any work environment.

Legal Assisting

**LGST 101 - Legal Research & Writing I (3)**

Legal Research and Writing 1 examines basic legal research, sources, and methods, as well as techniques of legal analysis with emphasis on specific cases and issues. An introduction to legal writing, use of law library, and legal terminology is also covered.

**LGST 102 - Legal Research & Writing II (3)**

Legal Research and Writing 2 will examine advanced research methods and analysis, and writing methods including computerized research, writing briefs and memoranda, use of state and federal codes, and legal correspondence and documents other than pleadings.

Prerequisite(s): LGST 101.
LGST 110 - Legal Assisting (3)

Legal Assisting provides an overview of various roles of the paralegal including interviewing and investigation, courts and legislatures, the legal profession, career options, and ethics.

LGST 200 - Legal Ethics (3)

Legal Ethics provides an examination of contemporary ethical issues and conduct relevant to the legal profession. This course will discuss ethics from a variety of viewpoints including law enforcement, corrections, and courtroom personnel.

LGST 210 - Laws of Domestic Relations (3)

This course examines domestic relations law including case preparation and the rules and procedures of the family court system. Topics covered include child custody, divorce procedures, and dispute resolution options such as mediation and arbitration.

LGST 220 - Civil Litigation (3)

This course provides an overview of the civil litigation process from initial interview through trial procedures including the preparation of pleadings and trial documents. Topics covered include civil procedure, discovery, and statutes relevant to the civil litigation process.

LGST 230 - Criminal Law and Procedure (3)

This course provides an overview of criminal law beginning with the arrest and investigation through the trial process. Case studies and historical cases in criminal law will be reviewed and analyzed. Other topics covered include legal terminology, rights of criminal defendants, and courtroom activities.

LGST 240 - Administrative Law (3)

This course introduces the body of law created by administrative agencies to implement their power and duties. Procedures and application of administrative rules, regulations, orders, and decisions will be examined.

LGST 272 - Real Estate & Property Law (3)

This course introduces students to the role of the paralegal in real estate and property law. Topics covered include basic concepts concerning titles to property, rights that attach to real property, care with respect to property, real estate closings, and rental property procedures.
LGST 275 - Wills, Trusts, & Estates (3)

This course introduces students to the role of legal assistants in estate and planning practice. Topics covered include the rules governing control and disposition of property, forms of property ownership, wills, trusts, estate succession, and federal gift and estate taxes.

LGST 292 - Internship (1-6)

Cooperative education allows students to acquire essential, practical skills by being exposed to the reality of the work environment beyond the boundaries of campus. Students will be required to complete a minimum of 100 hours working in the field, and a required 1 credit hour live course. The live course component will prepare all paralegal students to complete the Certified Legal Assistant Exam. Minimum 2.0 GPA required. See Academic Advisor.

Manufacturing Technology

MTEC 101 - Master Planning of Resources (2)

This course explains the principles and processes of master planning of resources; describes the techniques and methods of demand management, sales and operations planning, and master scheduling; examines the development of operations plans in differing operational environments; and explains the process for developing, validating, and evaluating performance at all levels of master planning of resources.

MTEC 102 - Basic Supply Chain Management (2)

This course will define the role, objectives and responsibilities of materials management. The course will describe and compare basic forecasting techniques; explain the materials requirements planning (MRP) process; describe the objectives of capacity management and its relation to priority planning; review the function of inventories and the objectives of inventory management; identify the costs of quality; explain the importance of purchasing, its objectives, and the steps in the purchasing process; define JIT; and show how TQM can reduce lead-times, lot size, and work in process.

MTEC 103 - Execution & Control of Operations (2)

This course explains how to schedule production and process manufacturing plans relative to authorizing, releasing, prioritizing, and sequencing work; identifies the interfaces and data exchanges required to execute a plan; demonstrates how various facility layouts influence scheduling and workflow; explains bottleneck resource management and lead time control techniques; identifies reporting activities and collection techniques; identifies appropriate requirements for storage, location, and
transportation; explains how to execute quality initiatives; and describes process capabilities, quantity audits and ways to assess supplier performance.

**MTEC 104 - Just-in-Time/Total Quality Management (2)**

This course defines the concept of JIT including implementation and principles and discusses the concept of TQM. Topics covered include continuous improvement methodologies and techniques; root cause analysis; the importance of using statistical methods for control processes (SPC); how to perform a process capability analysis; layout and workplace organization; and the importance of involvement and empowerment of employees for JIT and TQM to be successful.

**MTEC 105 - Detailed Scheduling/Planning (2)**

This course is designed to identify types of inventory and how they are assessed; describe order review methodologies and how to apply them in different types of inventory strategies; identify lot sizing techniques and the effects of order quantity constraints and modifiers; describe safety stock processes; explain how to calculate inventory performance; review MRP; define capacity measurement tools and how to use capacity data for decision making; and explain why and how to develop relationships with suppliers.

**MTEC 106 - Strategic Management of Resources (2)**

This course teaches students how to recognize the need for integration of the manufacturing process with the company strategy. Students learn how to identify strategy components; understand the alignment of resources with strategic marketing objectives; review JIT and TQM; learn how forecast accuracy is measured; identify the elements of customer service; learn the concepts of supply chain management; identify the phases of project management; understand performance measurement systems; and learn the roles and responsibilities of change management.

**MTEC 110 - Brain Smart Management (2)**

This course is designed to teach specific behaviors to alter one’s own behavior as the first and most important factor in influencing the behavior of others. The focus of the course is to change oneself in order to change corporate culture.

**MTEC 111 - Quality of Leadership (2)**

This course introduces the student to the concepts of leadership including influence, characteristics, and dimensions of leadership. The course reviews the situational leadership model and promotes exemplary leadership practices. The student learns the methods to challenge the process, inspire a shared vision, enable others to act, provide feedback, model the way for success, and encourage the heart. The student will leave the course with a personal action plan for further implementation.

**MTEC 199 - Special Topics (1-4)**
A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**MTEC 292 - Manufacturing Occupational Internship (1-6)**

Students learn how to translate classroom theory and methods into professional skills and opportunities.

**MTEC 293 - Manufacturing On-the-Job Training (1-13)**

This course is designed to award credit to those employees who have participating in a supervised on-the-job training program within the manufacturing facility. Credit is awarded upon receipt of a letter from the director of human resources stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore a student must work 1,950 actual hours to receive 13 credit hours.)

**Mathematics**

**Mathematics**

**MATH 101 - Introduction to Mathematics (3)**

During this course topics to be covered are sets, mathematical logic, mathematical system, systematic counting, and probability. History of mathematics, critical thinking skills, problem solving, and use of technology will be incorporate throughout the course.

Prerequisite(s): ACFN 085 - Basic Algebra (3) or required placement scores.

**MATH 105 - Algebra (3)**

Topics explored in this course include properties of the real numbers, radicals and rational exponents, operations on polynomials and rational expressions, solutions of linear and quadratic equations and inequalities, systems of linear equations and inequalities, functions including graphs and composite functions: properties of linear functions, polynomial and rational functions, exponential and logarithmic functions. Other topics included if time permitting concern conic sections, sequences, and counting/probability theory.

Prerequisite(s): ACFN 085 - Basic Algebra (3) or required placement scores.

**MATH 106 - Trigonometry (3)**
A study of the trigonometric functions and identities, multiple angle formulas, inverse trigonometric functions, deMoivre’s theorem and complex numbers, applications.

Prerequisite(s): MATH 105 - Algebra (3) or satisfactory placement score.

**MATH 107 - Applied Algebra and Trigonometry (3)**

Computational fluency and applied problem solving with the following topics will be stressed: Whole Numbers; Rational Numbers; Ratio, Percent, & Proportion; Estimation; Exponents & Roots; Scientific Notation; the Metric System; Length; Area; Volume; Mass; Electrical Formulas & Laws; Power; Basic Trigonometry; and Vectors.

Prerequisite(s): ACFN 085 or placement.

**MATH 108 - Pre-Calculus (4)**

This course is a one-semester preparation for calculus which includes algebra and trigonometry topics such as complex numbers, graphs of linear/nonlinear functions and relations, conic sections, graphical and algebraic solutions of nonlinear equations, solutions of exponential, logarithmic and trigonometric equations, analytic geometry/trigonometry, sequences, series, summations, and mathematical induction. Applications will be incorporated throughout the course. Time permitting, introductory calculus topics such as limits, derivatives, and integrals may also be discussed.

Prerequisite(s): MATH 105 - Algebra (3), MATH 106 - Trigonometry (3), or appropriate placement test scores (SAT 550+, ACT Math 24+ or ACCUPLACER College Level Math Test 86+)

**MATH 114 - Elementary Probability and Statistics (3)**

This course introduces the fundamental concepts of probability and statistics. Topics include descriptive statistics, random sampling methods, frequency distributions, measures of central tendency and variability, set theory, probability, permutations and combinations, random variables, probability and sampling distributions, expectation, central limit theorem, confidence intervals and hypothesis testing for means and proportions (one and two sample) and simple linear regression and correlation. Time permitting, one-way ANOVA and non-parametric techniques may be discussed. Appropriate application software will be utilized, and applications from a variety of disciplines will be presented.

Prerequisite(s): ACFN 085 - Basic Algebra (3) or placement into MATH 100+

**MATH 154 - Finite Mathematics (3)**

This course introduces students to selected topics from finite mathematics. Mathematical models for the analysis of decision-making problems are examined. Topics include the echelon method for solving linear equations, matrix manipulations, optimization by linear programming including the simplex method, risk decisions using probability, expected value, and statistics. Additional topics may be chosen from network models or game theory and students will explore the uses of mathematics.

Prerequisite(s): ACFN 085 - Basic Algebra (3) or satisfactory placement score.
MATH 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Mechatronics

MECH 101 - Introduction to Mechatronics (3)

Introduction to Mechatronics is an overview course that introduces students to the field of Mechatronics. Students will rotate through modules that will give them insight into the skills, concepts, equipment, and challenges they will encounter as a mechatronics technician. Modules will include design process, basic tool use, laboratory safety, engineering journaling, precision measurement, fluid power, robotics, and programmable logic controllers. Included will be basic professional preparation topics such as resume writing, job readiness, interviewing and portfolio development.

MECH 102 - Technical Physics (4)

Technical Physics emphasizes physical concepts as applied to technical fields. The five major areas on concentration include mechanics, matter and heat, wave motion and sound, electricity and magnetism, and light. Lab activities will provide hands on discovery of the concepts covered in the course.

MECH 105 - Electricity & Commercial Wiring (2)

Electricity and Commercial Wiring is an introduction to AC electrical applications and commercial wiring practices. This course is paired with MECH 106 - Electricity & Electronics (2) to form a complete electricity/electronic experience for the mechatronics technician. This course introduces the fundamental concepts of and computations related to AC electricity. Emphasis is placed on AC circuits, components, operation of test equipment; and other related topics. Devices such as transformers, AC motors and solenoids are covered. Commercial wiring tools, and practices are introduced to prepare the student for the NEC exam.

MECH 106 - Electricity & Electronics (2)

Electricity Electronics is an introduction to AC electrical applications and commercial wiring practices. This course is paired with MECH 105 - Electricity & Commercial Wiring (2) to form a complete electricity/electronic experience for the mechatronics technician. This course introduces the fundamental concepts of and computations related to AC electricity. Emphasis is placed on AC circuits, components, operation of test equipment; and other related topics. Devices such as transformers, AC motors and solenoids are covered. Commercial wiring tools, and practices are introduced to prepare the student for the NEC exam.
MECH 110 - Mechanical Systems I (2)

Mechanics I is a comprehensive introduction to fundamentals of industrial mechanical concepts, principles, and equipment. The course covers safety, lubrication, bearing installation and removal, proper installation and adjustment of belt and chain drives, as well as coupling and shaft alignment.

MECH 120 - Fluid Power (2)

Fluid Power course is designed to provide students with a basic understanding of the concepts and applications of fluid power technology including hydraulics and pneumatics. The course is an overview of fluid power technology applications; the general concept of fluid power systems; an introduction to energy input, energy output, energy control, and systems auxiliary components; as well as the design and function of components.

MECH 180 - Introduction to PLC (Programmable Logic Controllers) (1)

This online based class will introduce the concept of PLCs and how they are used to control automation equipment in the industrial setting. Practical labs will be included to help students assess their knowledge.

MECH 199 - Special Topics (1-4)

A special topics course (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

MECH 210 - Mechanical Systems II (3)

Mechanics 2 is a continuation of Mechanics 1. A further investigation industrial mechanical concepts, principles, and equipment. The course covers advanced topics including PLC's, laser alignment, and vibration analysis.

MECH 220 - Advanced Fluid Power with PLC (2)

The Advanced Fluid Power course is a continuation of MECH 120 introducing advanced concepts and applications of fluid power technology including hydraulics and pneumatics. The course will introduce the application of PLC's to energy input, energy output, energy control, and systems auxiliary components; as well as the design and function of components.

MECH 230 - Industrial Controls (2)
Industrial Controls introduces the students to the basics of AC motor applications and control. This course teaches electric relay control of AC electric motors found in industrial, commercial, and residential applications. Students learn industry-relevant skills including how to operate, install, design, and troubleshoot AC electric motor control circuits for various applications.

**MECH 250 - Intro to PLC (Programmable Logic Controllers) (3)**

The PLC course will prepare students to install, maintain and program Programmable Logic Controllers. Students will learn about both Allen-Bradley and Seimens PLC systems and be eligible for certification as a Seimens Mechatronics/PLC Technician.

**MECH 260 - Process Control & Instrumentation (2)**

Process Controls cover a wide range of topics such as measurement methods, pressure measurement devices, temperature measurement devices, flow measurement devices, level measurement devices, pilot valves, pneumatic controls, electronic controls, and process controls. Students will learn to install, maintain, monitor and troubleshoot process control equipment.

**MECH 270 - Quality Assurance & Control (2)**

Quality Assurance and Control explores the principles and techniques of quality engineering for the management, design engineering economics, production, and assurance of quality. Emphasizes fundamentals of total quality assurance for product and process control. Lab activities include applying precision measurement, dimensional guaging, and geometric, location and orientation tolerancing and statistical process control.

**MECH 280 - Integrated Manufacturing Systems II (3)**

Integrated Manufacturing Systems is a capstone course where students will apply the sum of their knowledge to set up, program, operate, maintain and troubleshoot a scaled manufacturing system. Students will be expected to learn all parts of the system as well as design systematic improvements.

**MECH 292 - Internship (1-4)**

A paid internship that expands the students career awareness and further develops their practical hands on experience. Number of credits will be based on the numbers of hours of employment.

**MECH 299 - Special Topics (1-4)**

A special topics course (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
MDIA 101 - Introduction to Media Studies (3)

This course introduces students to the concepts and theories of media and society and surveys their systems and roles in society. Emphasis is placed on media in the United States, including historic development and technological innovation of conventional print and electronic media.

MDIA 102 - Intro to Adobe Photoshop (3)

This course will introduce students to working with photographs and drawings focusing on web site graphics. Basics of the digital image, photo collage, banner graphics and simple animation for web sites will also be covered. Topics to be covered include: file formats, scanning, digital retouching, image selections and masking, layering, vector graphics, creating symbols, working with a time line and creating an interactive file.

MDIA 103 - Advanced Photoshop & Flash (3)

This project-based course will begin with a review of Photoshop basics and quickly move into intermediate and advanced concepts of layering, masks and channels. Students will move from basic photo correction techniques into enhanced tools and working with color correction across color spaces of RGB, CMYK, HSB and LAB. Students will work with the animation component of Photoshop® as well as Flash®. Team and Independent projects at both mid-term and finals will replace a traditional written exam.

MDIA 104 - Web Page Design (3)

This is the foundation course for CIW (Certified Internet Webmaster) certification. Students learn how to code Web pages from scratch using HTML, XHTML, and XML incorporating Java Scripting. Students will explore basic and advanced tags by creating web pages utilizing tables, frames, audio, video, and java scripting.

MDIA 105 - Internet Foundation (4)

This is the foundation course for CIW (Certified Internet Webmaster) certification. Students learn how to use key Internet technologies, such as Web browsers, e-mail, newsgroups, File Transfer Protocol (FTP), Telnet and search engines. Students will learn how to create simple Web pages containing text, graphics, hyperlinks, tables, forms and frames. Students also learn fundamental networking concepts and practices, including network architecture and standards, networking protocols, TPC/IP, Internet servers, server-side scripting and database connectivity, and security.
MDIA 106 - Site Designer (3)

The course focuses on theory, design, and web construction; along with information architecture concepts, web site management, scenario development and performance evaluations. Students learn how to create and manage Web sites with GUI editor based software programs. Students will learn and implement the latest strategies to develop web sites, evaluate design tools, discuss future technology standards, and explore the incompatibility issues surrounding current browsers.

MDIA 121 - Intro to Digital Photography (3)

This course is an introduction to the use of digital photography techniques. This course will emphasize visualization, composition, and the aesthetics of digital photography. This course will also introduce the basic operations of the camera and electronic imaging as well as software applications to produce quality digital images.

MDIA 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

MDIA 202 - Video Production (3)

Introduction to analog and digital video production and editing theories, effects, and techniques. Students will develop video products using analog and digital recording methods and computerized video editing systems and digital video effects programs and hardware and software issues relating to 3-dimensional graphics manipulation, video compression, and recording.

MDIA 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Medical Assisting

Medical Assisting

MAST 101 - Introduction to Medical Assisting (3)
This course is a foundation course for all medical assisting programs (clinical and/or administrative). Topics include medical assisting and other allied health disciplines as a profession, health care settings, the history of medicine, communication skills, coping skills, topics in psychology, and medical law and ethics. Emphasis is also placed on professionalism topics including personal traits of the health care professional, work place dynamics and career planning and employment.

**MAST 102 - Medical Terminology (3)**

This course is an integral component in understanding the language of medicine. It is designed to give the student a foundation in the basic structure of medical terms, word building and definitions as well as the applications of medical terminology. A human body systems approach is utilized and topics covered in each system include anatomy and physiology overview, medical terms, symptoms and signs, diseases and disorders, treatments, procedures and devices.

**MAST 105 - Insurance Billing & Coding (3)**

The focus of this course is on the process of using source documents to apply diagnostic and procedural codes to patient records for the purpose of filing insurance claims. Topics covered include health insurance specialist as a career, introduction to health insurance, managed health care, life cycle of an insurance claim, legal and regulatory issues, ICD-9-CM coding, CPT coding, HCPCS coding, CMS reimbursement methodologies, coding for medical necessity and the essentials of CMS-1500 claim instructions. Also, insurance carriers such as Blue Cross and Blue Shield, Medicare, Medicaid and others are covered.

**MAST 106 - Medical Office Management (2)**

This course is a foundational course in administrative medical assisting. Topics include: the facility environment, computers in the ambulatory care setting, telecommunications, patient scheduling, medical records management, written communications, daily financial practices, introduction to medical coding, insurance, billing and collections, accounting practices, and facility and equipment management are covered. In addition, more advanced topics are covered: management styles, risk management, importance of teamwork, supervising personnel, procedure manual, HIPAA implications, marketing functions, records and financial management, liability coverage, human resource management such as recruiting and hiring office personnel, dismissing employees, and complying with personnel laws are covered. Good record keeping principles are stressed in this course. Emphasis is placed on applications of electronic technology and fundamental writing skills as well as basic medical assisting clerical and operational functions.

Corequisite(s): MAST 106L - Medical Office Management Lab (1)

**MAST 106L - Medical Office Management Lab (1)**

This course is taken in conjunction with MAST 106 Medical Office Management. It emphasizes hands-on demographic data entry, billing and coding, insurance filing, reporting, as well as other electronic data functions of medical information management systems.

Corequisite(s): MAST 106 - Medical Office Management (2)
MAST 202 - Clinical Medical Assistant I (2)

This course offers the medical assistant student the opportunity to learn basic clinical theory that is utilized within medical practices. Areas covered include emergency/first aid procedures, infection control, and medical asepsis, sterilization, taking a medical history, patient charts and documentation, vital signs and measurements, physical examination and specialty examinations. In addition, signs and symptoms of respiratory conditions and disorders, diagnostic tests, Spirometry, peak flow meters, pulse oximetry, anatomy of the heart, electrical conduction system of the heart, the cardiac cycle and the EKG cycle, types of electrocardiographs, lead coding, sensor placement, standardization and adjustment of the electrocardiograph, 12 lead EKG, mounting EKG tracings, interference and artifacts, cardiac dysrhythmias and Holter monitors are covered.

Corerequisite(s): MAST 202L - Clinical Medical Assistant I Lab (1)

MAST 202L - Clinical Medical Assistant I Lab (1)

This course is taken in conjunction with MAST 202 Clinical Medical Assistant I. Emphasis is placed on hands-on listening and observational skills, patient care and instruction, as well as sound fundamental diagnostic and treatment modalities.

Corerequisite(s): MAST 202 - Clinical Medical Assistant I (2)

MAST 203 - Pharmacology for the MA (3)

Basics of pharmacology and administration of medications are the focus of this course. Included topics are medical uses of drugs, drug names, history and sources of drugs, drug regulations and legal classifications of drugs, drug reference and standards, classification of drugs, principal actions of drugs, drug routes, forms of drugs, storage and handling of medications, emergency drug supplies and drug abuse. Also, covered are legal and ethical implications, drug dosage, medication labels, calculation of drug dosages, medications measured in units, calculation of age specific drug dosages, administration of medication by various routes including parenteral, oral and inhalation, administration of allergenic extracts, and principles of IV therapy. Emphasis is placed on the “rights” of medication administration.

MAST 206 - Clinical Medical Assistant II (2)

This course builds on topics covered in MAST 202 - Clinical Medical Assistant I (2). Examinations and procedures of various body systems such as the urinary system and urinary catheterization and the digestive system and fecal occult blood testing are covered. In addition, assisting with office/ambulatory surgery, diagnostic imaging, rehabilitation and therapeutic modalities and nutrition in health and disease, safety and regulatory guidelines, introduction to the medical laboratory, hematology tests, urinalysis, basic microbiology testing, and several CLIA waved tests such as blood glucose and cholesterol testing are covered.

Prerequisite(s): MAST 202 - Clinical Medical Assistant I (2).
Corerequisite(s): MAST 206L - Clinical Medical Assistant II Lab (1)

MAST 206L - Clinical Medical Assistant II Lab (1)

This course is taken in conjunction with MAST 206 Clinical Medical Assistant II. Emphasis is placed on hands-on skills cover in MAST 206.
MAST 214 - MA Review and Certification Prep (2)

This course provides the student with a review of all of the major administrative, clinical and general competencies covered in the medical assistant programs. Upon successful completion of this course and all other program requirements, the medical assistant certificate and degree students are eligible to sit for national certification as a Registered Medical Assistant (RMA) through American Medical Technologists.

Prerequisite(s): MAST 206 - Clinical Medical Assistant II (2)

MAST 216 - Clinical & Administrative Externship (4)

This course provides the student with hands-on clinical and administrative experience in a medical office setting. The student will work for a total of one hundred sixty (160) uncompensated hours in a medical office. Clinical and administrative competencies will be evaluated by a medical office preceptor(s) and under the direction of a medical assistant instructor. The student needs to contact the medical assistant programs department upon registering for this course. Early registration is encouraged to allow time to make arrangements with a medical office site. Students must have received a grade of “C” or better in ALL MAST and PLB courses prior to registering for this course. In addition, students must provide proof of valid/current BLS for Healthcare Providers and First Aid certification to the medical assistant department prior to the start of the externship.

Prerequisite(s): MAST 206 - Clinical Medical Assistant II (2)

Music

Music

MUSC 111 - Introduction to Music (3)

This course provides training and experiences which will enable the student to acquire a historical-social-aesthetic perspective, to comprehend musical concepts, to discriminate quality levels, to select satisfying and stimulating musical experiences, and to empathize with the creators and performers of music.

MUSC 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
MUSC 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Nursing

Nursing

NURS 101 - Foundations of Nursing Practice (4)

This is the initial course in nursing upon which all other nursing courses build and expand. It is designed to develop in the student a holistic awareness of persons. The student also begins to recognize health problems. The nursing process, critical thinking, therapeutic nursing interventions, communication, and service are introduced and emphasized throughout the course.

Prerequisite(s): CAHS 120/CAHS 121, CAHS 122/CAHS 123 and ENGL 101.
Co-requisite(s): NURS 103 Pre-requisite/Co-requisite(s): CAHS 125, CAHS 125L, COMM 202.

NURS 103C - Clinical Nursing (2)

This course assists the student in developing patient care skills in supervised clinical agencies.

NURS 103L - Clinical Nursing Laboratory (2)

This course assists the student in developing patient care skills in a supervised laboratory setting.

NURS 105 - Introduction to Professional Nursing (3)

This course is designed as an introduction to the concepts of professional nursing practice. Concepts of professional nursing practice including the nursing process, code of ethics, role of nurses, and the health care team and other topics required for entry into the nursing program are presented. Students will be exposed to the use of select electronics databases as information sources, as well as in the techniques of professional writing.

Pre-requisite/Co-requisite(s): NURS 105 Hours Clock hours 9 hours/week.

NURS 108 - Basic Nursing Skills (3)
The focus of this skill lab course is the development and acquisition of the technical/psychomotor skills required for nursing practice. Students will apply new and previously learned scientific principles to procedures required for the delivery of nursing care.

**NURS 110 - Adult Health Nursing I (3)**

This course focuses on the practice of holistic nursing with persons experiencing common medical/surgical problems. Persons with diabetes, gastrointestinal disorders, integumentary problems, immunologic and infectious diseases, sensory deprivation, and cancer are examined. In addition, the students explore the art of self-care as it relates to caring for others.

Prerequisite(s): NURS 101, 103.
Pre-requisite/Co-requisite(s): CAHS 210, PSYC 203.

**NURS 112C - Adult Health Nurse I Clinical (2)**

This continues the development of nursing care skills in a variety of clinical agencies. Patient situations are correlated to lecture content in NURS 110.

**NURS 112L - Adult Health Nurse I Lab (1)**

This continues the development of nursing care skills in a supervised laboratory setting. Specific skills are correlated to lecture content in NURS 110.

**NURS 114 - Family Health Nursing I (2)**

This course focuses on the care of families during the reproductive years utilizing the nursing process with emphasis on health promotion and maintenance.

Prerequisite(s): NURS 101, 103.
Corequisite(s): NURS 116 . Pre-requisite/Co-requisite(s): CAHS 210, PSYC 203 .

**NURS 116 - Family Health Nursing Clinical I (2)**

This course provides students with the opportunity to care for antepartal, intrapartal, and postpartal families in acute care and community settings.

Corequisite(s): NURS 114.

**NURS 118 - Health & Wellness (2)**
This course will focus on concepts of health screening, patient education, complementary therapies and environmental safety needs in a variety of client settings and among a variety of age groups.

Pre-requisite/Co-requisite(s): CAHS 120, CAHS 121, CAHS 122, CAHS 123

**NURS 124 - Medical Management II (3)**

This theory course will include pathophysiology, system specific assessments, diagnostic and lab values, complications of diagnostic tests, therapeutic procedures, potential and actual complications of procedures, unexpected results of procedures, and emergency situations related to: Urinary and renal: urinary diversions, renal failure, UTI, calculi, nephritis, enuresis Immune and HIV: autoimmune diseases, LE, allergy and anaphylaxis, hives Hematological: anemia, sickle cell, ITP, hemophilia, splenic disease and injury Cancer including leukemia & radiation therapy.

**NURS 150 - Health Assessment (3)**

This course provides theory and practice in comprehensive health assessment. Health history taking methods, physical examination skills, health promotion techniques, clinical assessment tools, and the use of age related data instruments will be the content foci for lectures and clinical experiences. This course has a lab component.

Prerequisite(s): NURS 105 and NURS 108.
Hours 2 hours classroom, 3 hours clinical practice/week.

**NURS 155 - Family Health Nursing (3)**

This course provides theory related to nursing care, health, and illness needs of the clients throughout the life span. Issues related to family structure and wellbeing are incorporated into the content.

Prerequisite(s): NURS 105, NURS 118.
Corerequisite(s): NURS 108

**NURS 160 - Clinical Nursing I (2)**

This clinical course will provide opportunities for direct nursing care to clients in a variety of settings, including long term care, acute care, and community agencies where students may apply content from all theory courses to date and specifically Health Assessment and Family Health Nursing.

Prerequisite(s): NURS 105, NURS 108
Corerequisite(s): NURS 150, NURS 155 Hours Clock hours: 6 hours/week.

**NURS 165 - Pharmacology & Pathophysiology for Nurses (4)**
This course combines two related science fields essential to nursing. Basic principles of pharmacology including pharmakinetics, pharmaceutics and pharmacodynamics are presented; as well as emphasis on selected disease processes including inflammation, immunity, vascular control mechanisms and basic genomics.

Prerequisite(s): CAHS 220, CAHS 221, NURS 105, NURS 108
Corerequisite(s): NURS 150

**NURS 180 - LPN-to-RN Role Transition (5)**

For LPN to RN articulation students only. This course will assist the student who has met the eligibility requirements for the LPN-to-RN articulation to make the transition from the LPN role to the Registered Professional Nurse role. An emphasis will be placed on advancing into professional nursing practice through a combination of lecture seminar and clinical experiences. Successful completion of this course allows the student to be exempt from NURS 101 and NURS 103 and receive three additional credits for degree.

Prerequisite(s): ENGL 101, CAHS 120/CAHS 121, CAHS 122/CAHS 123.
Pre-requisite/Co-requisite(s): CAHS 125/125L, COMM 202.

**NURS 201 - Mental Health Nursing (2)**

This course focuses on the practice of nursing with persons experiencing mental disorders. Neurobiological, psychological, and sociological theories are explored. Emphasis is placed on the continued development of therapeutic communication skills.

Prerequisite(s): NURS 110, 112, NURS 114, NURS 116.
Corerequisite(s): NURS 202, NURS 203, 204. Pre-requisite/Co-requisite(s): CAHS 220/CAHS 221, SOCI 203.

**NURS 202 - Adult Health Nursing II (3)**

This course focuses on utilizing the nursing process in providing holistic care for persons that are experiencing complex health disorders. Emphasis is placed on individuals experiencing disorders of the cardiovascular, respiratory, endocrine, and musculoskeletal systems.

Prerequisite(s): NURS 110, 112, NURS 114, NURS 116.
Corerequisite(s): NURS 201, NURS 203, 204. Pre-requisite/Co-requisite(s): CAHS 220/CAHS 221, SOCI 203.

**NURS 203 - Mental Health Clinical Nursing (2)**

This course assists students in establishing, maintaining, and terminating effective interactions with individuals and groups of people exhibiting psychosocial problems across the continuum of care.

Corerequisite(s): NURS 201.
NURS 204C - Adult Health Nurse II Clinical (2)

This continues the development of nursing care skills in a variety of clinical agencies. Patient situations are correlated to lecture content in NURS 202.

NURS 204L - Adult Health Nurse II Lab (1)

This continues the development of nursing care skills in a supervised laboratory setting. Specific skills are correlated to lecture content in NURS 202.

NURS 205 - Adult Nursing Care I (5)

This course focuses on the knowledge, skills and values necessary for the delivery of comprehensive nursing care of the patient in the acute care setting. An integrated biological, psychological, socio-cultural, environmental and spiritual approach to the care of the patient and his family will be employed. A systems approach is used to organize content.

Prerequisite(s): All nursing courses to this point.
Corequisite(s): NURS 210, NURS 214

NURS 206 - Adult Health Nursing III (3)

This course continues to focus on the practice of holistic nursing with persons experiencing common medical surgical problems. Emphasis is placed on individuals with alterations in genitourinary, hematological, neurological function and with burn injuries. In addition, the student explores the relationship of environment to health.

Prerequisite(s): NURS 201, NURS 202, NURS 203, 204
Corequisite(s): NURS 208, NURS 222.

NURS 208C - Adult Health Nurse III Clinical (2)

This continues the development of nursing care skills in a variety of clinical agencies. Patient situations are correlated to lecture content in NURS 208.

NURS 208L - Adult Health Nurse III Lab (1)

This continues the development of nursing care skills in a supervised laboratory setting. Specific skills are correlated to lecture content in NURS 206.

NURS 210 - Mental Health Nursing (3)
This course provides theory of nursing care of clients with mental health needs. Using an integrative approach, course content is based on the biological, psychological, and socio-cultural aspects of behavioral disorders.

Prerequisite(s): NURS 105, NURS 108, NURS 150, NURS 160, NURS 165

**NURS 211 - Family Health Nursing II (2)**

This course focuses on families with children emphasizing normal growth and development, health promotion, and maintenance through anticipatory guidance and continues developing the use of the nursing process. Select deviations from normal and restorative measures are discussed.

Prerequisite(s): NURS 110, 112, NURS 114, NURS 116, NURS 201, NURS 202, NURS 203, 204. 
Corerequisite(s): NURS 213.

**NURS 213 - Family Health Nursing Clinical II (2)**

This course provides the student with the opportunity to care for children and families in a variety of settings.

Corerequisite(s): NURS 211.

**NURS 214 - Clinical Nursing II (4)**

This clinical course will provide opportunity for the student to provide direct patient care to a variety of clients and in a variety of clinical agencies. Specific clinical foci will include inpatient and outpatient care of the adult patient with physical and mental health problems. Content and skills gained in previous nursing courses will be integrated in this course.

Corerequisite(s): NURS 205, 214 Hours Clock hours 12 hours/week.

**NURS 222 - Contemporary Nursing (3)**

This course assists the student in examining a variety of issues involved in the practice of nursing within a changing society and health care environment. Topics explored include ethics, legal aspects, professional behaviors, lifelong learning, and patterns of health care delivery. This course must be taken in the students’ final semester.

Prerequisite(s): NURS 201, NURS 202, NURS 203, 204. 
Corerequisite(s): NURS 206, 208, NURS 211, NURS 213.

**NURS 235 - Adult Nursing Care II (5)**

This course continues the content from Adult Nursing Care I. A systems approach is used to organize content, but the complexity of the patient problems is greater.
Prerequisite(s): All nursing courses to this point.
Corerequisite(s): NURS 236, NURS 238

**NURS 236 - Clinical Nursing III (5)**

This clinical course incorporates all theory and skills accumulated from previous nursing courses and enable the student to provide nursing care to multiple patients and/or complex patients in a primarily acute inpatient setting. A one on one preceptorship with an RN in a selected clinical area is included in this clinical.

Corerequisite(s): NURS 235, NURS 238 Hours Clock hours 15 hours/week.

**NURS 238 - Transition to Professional Nursing (2)**

This course is intended to be taken during the final semester of the program.

Prerequisite(s): All nursing courses to this point.

**NURS 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Orientation**

**ORIE 101 - Orientation to College (3)**

A course designed to help the student bridge the transition to the college environment.

**ORIE 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Paralegal Studies**
Paralegal Studies

PARA 120 - General Law (3)

This course discusses various kinds of law: constitutional, civil, criminal, administrative, trends in legal practice, including specializations, hot topics and explores views of representing individuals who may be accused of certain types of crime, i.e., murder, rape, child molestation/abuse.

PARA 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

PARA 235 - Torts/Causes of Action (3)

This course defines what a tort is and examines elements, proof, identification of different causes of action and remedies.

PARA 270 - Real Estate/Wills and Estates (3)

This course examines real estate laws and drafting deeds, leases, contracts of sale, closing documents, and title searches. It serves as an overview of laws of probate, will drafting, and probate of estates.

Prerequisite(s): PARA 101 and PARA 102.

PARA 293 - Paralegal On-the-Job-Training (1–13)

This course is designed to award credit to those persons who have participated in a supervised on-the-job training program in criminal justice. Credit is awarded upon receipt of a letter from the on-site supervisor stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore a student must work 1950 actual hours to receive 13 credit hours.)

PARA 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
Philosophy

PHIL 101 - Introduction to Philosophy (3)

This course introduces students to the major fields, problems, theories, and personalities of philosophy through the biographies and writing of leading thinkers.

Phlebotomy

PLBT 101 - Phlebotomy (3)

This course prepares students with the fundamentals of phlebotomy. Both theory and hands-on experience are provided. Course content includes the history of phlebotomy, basic anatomy and physiology, infection control, specimen collection, various venipuncture techniques, dermal punctures, venipuncture complications, point-of-care testing, legal issues, and special non-blood specimen collection techniques.

Prerequisite(s): CAHS 100 and MAST 202.
Corerequisite(s): MAST 206.

PLBT 102 - Phlebotomy Clinical Externship (3)

This course allows students to work in a CLIA approved laboratory setting and function under direct supervision of a phlebotomist. The externship is one hundred (100) uncompensated hours in length. Students are expected to perform a minimum of 100 successful blood collection procedures including venipunctures and dermal punctures. Phlebotomy competencies will be evaluated by a phlebotomy preceptor(s) and under the direction of a medical assistant instructor. The student needs to contact the medical assisting program department upon registering for this course. Early registration is encouraged to allow time to make arrangements for the externship experience. The student is expected to follow all policies and procedures of their designated externship site.

Prerequisite(s): PLBT 101 or CAHS 153.

Physical Therapy Assistant
Physical Therapy Assistant

PTA 101 - Intro to Physical Therapy (2)

History of the physical therapy profession and survey of general physical therapy services. Legal and ethical requirements for the physical therapist assistant are introduced. The Americans with Disabilities Act and architectural barriers are studied.

PTA 102 - Patient & Professional Relationship (2)

Recognition of the reactions of the health care worker, patient, and family to illness and disability is discussed. The influence of race, class, age, ethnic origin, and gender on the physical therapist assistant and patient relationship is explored. The stages of adjustment to disability and death and dying are described. Communication skills between PTA, patient, family and other health care providers are developed.

PTA 103 - Intro to Patient Care (3)

An introduction to basic patient care procedures such as positioning, transferring, ambulating, dressing, fitting ambulation aids, and taking vital signs. Universal Precautions, isolation, and aseptic principles will be presented. Skills in basic note writing will be developed.

PTA 104 - Physical Agents (4)

This course includes the lecture and lab study of thermal agents, compression, and massage. Skills in surface anatomy and goniometry are developed. Topics include electrical stimulation, traction, and manual muscle testing. Upon completion, students are able to correctly and safely apply these techniques in a laboratory setting while assessing the physiologic response and observing indications and contraindications. Also, students can write appropriate progress notes, and demonstrate knowledge of the physiological principles involved.

PTA 105 - Kinesiology (3)

This course provides a study of human movement and related mechanical principles. Topics include detailed musculoskeletal anatomy and physiology. Upon completion, student will be able to analyze a functional task and identify component joint motions and muscle actions.

PTA 106 - Clinical Education I (1)

Initial clinical experience for students. Forty hours spaced throughout the semester introduces the various settings of a physical therapy practice - acute care, transitional care, out-patient clinic, home health, skilled nursing facility, rehabilitation unit, and the
school system. The student may participate in the clinic’s activities only if their skills have been checked-off in the course laboratory setting.

**PTA 107 - Clinical Education II (3)**

A concentrated fifteen day, 120 hour clinical experience dedicated to modality application and the study of goniometry and manual muscle testing. The student will be assigned to a clinical setting that utilizes the modalities studied. The student will begin to assess patient response to treatment and be prepared to adjust the therapeutic intervention accordingly.

**PTA 109 - Physics for PTA (1)**

This is an introductory physics course for students wishing to enter the PTA certification program. Students will be introduced to the following concepts: Newton’s Laws of Motion, Linear Motion, Circular Motion, Gravity, Work and Energy, Momentum, Vectors, Rotational Motion, Energy, Waves and Sound, Heat, and Heat Transfer.

**PTA 199 - Special Topics (1-4)**

A special topics course will have a different course description for each course offered under this special topics code. The division will keep a record of every special topics course offered with this subject code, including course description.

**PTA 201 - Therapeutic Exercise (4)**

The principles and techniques of therapeutic exercise will be introduced. Topics also include gait analysis, posture assessment, and chest physical therapy. Upon completion the student will plan, implement, and assess the response to an exercise plan in a laboratory setting.

**PTA 202 - Orthopedics (4)**

The dysfunctions caused by and intervention strategies for musculoskeletal disorders, amputations, wounds, and burns will be examined. Upon completion, the student will be able to combine previously and newly learned procedures and strategies to carry out an orthopedic care plan in a laboratory setting.

**PTA 203 - Neurology (4)**

The dysfunctions caused by and intervention strategies for peripheral and nervous system disorders will be examined. Upon completion the student will be able to combine previously and newly learned procedures and strategies to carry out a neurologic care plan in a laboratory setting.
PTA 204 - Clinical Education III (5)

This rotation consists of two hundred hours over a five week period that will allow the student to begin the process of working within the physical therapy Plan of Care. The emphasis will be to implement, develop, and progress a therapeutic exercise program for the patient to address the impairments of decreased range of motion, decreased strength, decreased endurance, or motor control deficit.

PTA 205 - Capstone Seminar (1)

This intense five week seminar examines the expectations for an entry level physical therapist assistant and focuses on preparation for clinical rotations and entry into the profession. Previously learned and new material relating to safety, plan of care, communication, professional behavior, and knowledge are tied to the role of the PTA.

PTA 206 - Clinical Education IV (5)

This five week, 200 hour clinical assignment allows the student to apply all previously learned theory and skills to patient care in a clinical setting. Each student is assigned to a clinical center to perform physical therapy modalities and procedures on a variety of patients.

PTA 299 - Special Topics (1-4)

A special topics course will have a different course description for each course offered under this special topics code. The division will keep a record of every special topics course offered with this subject code, including course description.

Political Science

PSCI 100 - Introduction to Political Ideology (3)

This course provides an overview of major political ideologies that shaped the historical political landscape of the world and the United States and will shape the 21st century. An examination of democracy, liberalism, conservatism, socialism, and fascism (along with many other ‘isms’) provide the student with a sense of history and structure.

PSCI 101 - American Federal Government (3)

This course involves the study of the functions and administration of government in the United States.
PSCI 102 - State & Local Government (3)

This survey course covers the history and operations of state and local government. Some of the topics include state & local politics, state constitutions, state legislation, state governors, the justice system, and financing of state and local government.

PSCI 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

PSCI 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Print Technology

Print Technology

PRNT 101 - Introduction to Print (2)

This course introduces students to a variety of printing and binding processes used in the graphic communications industry. Emphasis will be placed on those processes used in the areas of web offset, sheet-fed, gravure, and flexography printing. Topics will be covered by professionals working in the field and will be supported by tours of facilities utilizing the process.

PRNT 103 - Optimizing Workflow (3)

This two-day seminar is presented by GATF instructors. The main topic of this session is how to successfully create color on press consistently in order to satisfy customers and eliminate the cost of remakes. Students will learn how to critically analyze the production operation they are using to isolate the problem areas and then begin a plan to correct.

PRNT 104 - Introduction to Desktop Publication (3)

Basic Mac skills and intro levels to Adobe Photoshop 6.0, Adobe Illustrator 9.0, QuarkXPress 4.04, and Adobe Acrobat will be taught. Students will receive 12 hours of lab time to complete lessons in all instructed applications. An emphasis will be placed on skills needed to open and process third party files following standardized manufacturing techniques.
PRNT 105 - Certified Printing Service Specialist (3)

Students will work as a study group in preparation for a national certification exam administered by the Society for Service Professionals in Printing. During the 13 weeks of class, students will be responsible for reading a two-volume handbook covering all aspects of the graphic communications industry. Weekly “mini-exams” are administered to further prepare the class for the exam at the conclusion of the class. Students will travel within 5 counties of WV, VA and MD to tour printing facilities supporting classroom instruction. If successful in passing the certification test - the student will become a Certified Printing Service Specialist.

PRNT 107 - Leading and Facilitating Process Improvement Teams (1)

This two-day course provides team leaders and facilitators with a fundamental understanding of how to effectively guide their teams to goal achievement. Topics to be covered: the role of team members, team development, launching a team, facilitating and evaluating the team’s experience.

PRNT 108 - Managing Your Department (1)

Topics to be explored: effectively managing a meeting, using participatory decision making and problem solving styles, communicating for positive results, running your department like an entrepreneurial enterprise. The class is designed to be participatory and will incorporate actual work situations. The attendees will leave the course with a plan for implementing workshop suggestions into their own environment.

PRNT 109 - Introduction to Color Theory and Measurement (1)

The basics of color theory will be covered in this course. Students will gain an understanding of the additive and subtractive primary colors and how this theory applies to the graphic arts industry. Additionally, students will be exposed to the tools of color measurement: spectrophotometer, densitometer, and colorimeters. An objective for the class will be to gain understanding about what is realistic and possible when attempting to satisfy a customers’ color expectations.

PRNT 110 - Introduction to QuarkXPress (1)

Students will be exposed to and work in a variety of page creation features such as type, type flows, runaround, creating master templates, creating new documents, picture usage and print styles. Class projects will support instructor lecture.

PRNT 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
PRNT 201 - Inter/Advance Photoshop (3)

Intermediate and advanced levels of Photoshop 6.0 will be taught. Students will receive 45 hours of lab and class time to complete lessons. A quick review of the basics and understanding the work area will precede working with: layers, paint and editing, masks and channels, photo retouching, pen tools techniques, creating special effects, combining Illustrator graphics, Photoshop Images and producing and printing consistent color.

PRNT 202 - Advanced QuarkXPress (1)

Students will receive instruction and lab instruction to work with building pages, master pages, type and typography, copy flow printing and color management.

PRNT 203 - Advanced Photoshop (1)

In a condensed 2-day course, students will cover: working with layers, paint and editing, masks and channels, photo re-touching, pen tool techniques, creating special effects, and combining Illustrator graphics.

PRNT 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Psychology

PSYC 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

PSYC 203 - Introduction to Psychology (3)

This survey course introduces the core areas of psychology, including neuropsychology, learning and memory, intelligence, developmental psychology, stress and health, personality, abnormal psychology, psychotherapy, and social psychology.
PSYC 205 - Abnormal Psychology (3)

This course introduces students to both the science and the personal aspects of abnormal psychology through developing an understanding that abnormal psychology is about understanding individual in society. This course will emphasize the use of case studies to present the most cutting edge information on abnormal psychology by covering methods and treatment in context. Material presented will integrate the biological, psychological, and social perspectives associated with abnormal psychological study.

PSYC 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Safety Technology

SAFT 113 - General Physical Science for Safety Technology (3)

A fundamental survey of physics and chemistry with special emphasis on practical application in fire prevention, fire hazards, and fire suppression.

SAFT 151 - Fundamentals of OSHA (3)

This course provides a detailed review of various Occupational Safety and Health Administration (OSHA) regulations including: Hazard Communication, Confined Space, Lockout/Tagout, Personal Protective Equipment, Hazardous Waste Operations and Emergency Response, Emergency Action and Fire Prevention Plans and Respiratory Protection.

SAFT 180 - Hospital Security Management (3)

An introduction to hospital security management practices, this course covers program development, implementation and management, budgeting, personnel staffing, identification of security vulnerabilities, investigation techniques, and information management practices applicable to healthcare facility security.

SAFT 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.
SAFT 205 - Building Code and Inspection (3)

This course gives the student an understanding of blueprint reading, plans review, code enforcement and compliance and understanding of various building codes and how they related to today’s society.

SAFT 209 - Industrial Hygiene (3)

This course examines the principles of industrial hygiene applicable to various industries. Topics covered include the recognition of chemical, physical, biological, and environmental hazards, methods of hazard control and mitigation and use of various environmental testing and monitoring equipment.

SAFT 210 - Introduction to Emergency Management (3)

This course gives the basic principles of emergency management. This course discusses prevention, mitigation, response and recovery to human environmental, natural, and radiological hazards. This course is designed to give a starting point in developing a hazard vulnerability analysis, which will prioritize hazards and attempt to reduce the impact of the hazard through preparation.

SAFT 211 - Introduction to Environmental Management (3)

This course provides the basics in understanding environmental laws, and regulation in relation to the workplace and will give the safety professional a starting point to evaluate environmental issues in the workplace and strategies how to deal with those issues.

SAFT 220 - Safety Management I (3)

Students learn to analyze hazard problems, to evaluate alternative solutions, and to design the required hardware, devices, and methods needed to eliminate hazards in a variety of industrial applications. Industrial and accident prevention laws pertaining to industrial safety and health, including workers’ compensation laws, OSHA regulations, and industrial property protection laws, are examined.

SAFT 221 - Safety Management II (3)

A continuation of SAFT 220 Safety Management I, this course introduces the more advanced techniques and principles of safety program management. Using real-life scenarios as study models, the course overviews the elements or a viable safety program.

Prerequisite(s): SAFT 220.

SAFT 232 - Hospital Safety I (3)
An introduction to hospital safety management practices, this course covers program development, implementation and management, job safety analysis, hazard recognition, safety inspections, safety committees, fire safety and industrial hygiene practices applicable to healthcare facilities.

**SAFT 233 - Hospital Safety II (3)**

A continuation of SAFT 232, this course provides an in-depth review of safety and environmental compliance issues applicable to healthcare facilities. Topics include blood borne pathogens, radiation safety, laser safety, biological, and hazardous waste management.

**SAFT 234 - Security Management (3)**

This course looks at personnel, loss control, electronic and other various means of facility security. This course will look at the management of resources, purchasing of equipment of the cost/benefit in investing in various security practices and systems.

**SAFT 235 - Construction Safety (3)**

This course is designed to give the student an understanding and basics of construction safety. This course will review CFR 1926 standards and how they apply to construction. The course is for the safety manager who works with construction on-site or managing safety for a construction company or contractor.

**SAFT 240 - Industrial Fire Protection (3)**

This course emphasizes principles of industrial fire protection systems, including alarms, detection, and sprinkler protection. The course also provides information on employee response to emergencies in the work setting, following CFR 1910.38, CFR 1910.156, and NFPA 600 standards.

**SAFT 241 - Accident Investigation (3)**

This course assists the safety manager to conduct thorough and complete investigations for incidents or events in a systematic approach. This benefits the safety manager by giving proper information and procedure needed to complete accurate incident reports.

**SAFT 242 - Loss Control and Recovery (3)**

This course evaluates eliminating and reducing losses to the business environment through evaluation of injuries, near-misses, and property damage. This course evaluates environmental controls, personal protective equipment, and elimination/substation to work with a variety of workplace hazards. This course also looks at injury reports, workers compensation statistics and other loss contributors to the workplace.
SAFT 280 - Directed Study Safety Technology (1–6)

This variable credit course allows students to pursue a Safety Technology research project of particular interest. Students registering for this course must have prior approval from the Program Coordinator for Safety Technology.

SAFT 292 - Internship In Safety Technology (3)

This course involves practical experience in fire service organizations in which the student engages in on-the-site activities of a practical nature. Interns learn how to translate classroom theory and methods into professional skills. Activities are under the supervision of trained personnel. Application for the internship must be made to the fire science program advisor.

SAFT 293 - Safety On-the-Job-Training (1–13)

This course is designed to award credit to those persons who have participated in a supervised on-the-job training program in safety technology. Credit is awarded upon receipt of a letter from the on-site supervisory stating successful completion of on-the-job training assignments and the total number of actual hours involved in the training.

Hours (Credit hours earned for On-the-Job Training are calculated as 1 credit hour = 150 actual hours. Therefore, a student must work 1950 actual hours to receive 13 credit hours.)

SAFT 295 - Safety Degree Evaluation (2)

This capstone course is designed to “put it all together” for the student who is about to graduate with an A.S. in Safety Technology. This course evaluates the student's knowledge of the program, including but not limited to chemistry, industrial fire protection, emergency management, basic fire suppression, strategies and tactics, fire investigation, and management practices.

SAFT 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Sociology

Sociology

SOCI 199 - Special Topics (1-4)
A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**SOCI 203 - General Sociology (3)**

This course introduces the student to the concepts and theories that pertain to social relationships and social organization. The course covers topics that range from micro interpersonal relationship to macro social structures.

**SOCI 220 - Sociology of Diverse Groups (3)**

Sociology of diverse groups offers special topics in the sociology of diversity for in-depth study. This course explores multiculturalism, the presence of multiple diverse groups in society, and the varied social identities found among communities and groups. The course includes an overview of key concepts in discussions of diversity.

**SOCI 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Spanish**

**Spanish**

**SPAN 101 - Spanish I (3)**

Spanish 101 is an introductory course designed to expose beginning students to basic language skills. In this course, students develop the fundamentals of communication, listening, and comprehension, speaking and reading Spanish. Elementary knowledge of Hispanic culture will be implemented in this course as well as composition writing.

**SPAN 102 - Spanish II (3)**

Spanish 102 builds upon the basic grammatical structures introduced in Spanish 101 and continues to develop skills such as pronunciation practice, listening comprehension, and “guided” composition. Correct speaking is emphasized. An elementary knowledge of Hispanic countries continues to be implemented in the class.

**SPAN 199 - Special Topics (1-4)**
A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**SPAN 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Tri-County Education Workshops**

**EDTR 199 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**EDTR 299 - Special Topics (1-4)**

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

**Workforce Development**

**WORK 101 - Workplace Readiness (1–4)**

This workforce-based course enhances employees’ outcomes and duties at their current positions.

**WORK 102 - Microsoft Office (1–4)**

This workforce-based course enhances employees’ computer efficiency in the workplace.
WORK 199 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

WORK 299 - Special Topics (1-4)

A special topic (ST) has a different course description for each course offered under the ST code. The division will keep a record of every special topics course offered with this subject code, including the course description.

Faculty

Dr. Peter G. Checkovich (1987)
President
Professor of Education
B.A. University of Virginia (1971)

Business and Information Technologies

Dr. R. Craig Miller (2005)
Vice President of Business and Information Technology
Associate Professor
B.S. Shepherd College (1998)

Jason Allen (2012)
Social Science Lecturer
Grant Specialist
Ed.D. West Virginia University (2009)
M.A. West Virginia University (2002)
