## **BASIC SEARCH with SEARCH ASSIST**

Basic Search offers a straightforward way to search featuring a single search box. Search Assist will help suggest keyword phrases to efficiently find information. This search is ideal when keywords and phrases are too specific to be found in the Browse Categories and Topics. The system will look for a Topic page that matches your search criteria –

Popular topics will be in a **Bold Italicized** print; if the system is unable to find an exact or a near-match with a popular topic, the system will perform a keyword search of the resource and display a standard results list. If no results can be found, you will get a message asking you to revise your search.
