The Dirt on Your Dirt

July 15, 2020

1pm - 2pm

No-Cost Community Workshop

We all know a good garden or crop field starts from the ground up. Soil is the foundation to all things living, but it can be a little complicated to understand what makes it healthy. Learn more about soil properties, soil testing, and even how to better understand what's in your backyard in this crash course on soil science.

Emily Morrow is the Agriculture & Natural Resources Agent in Jefferson County. She holds a Bachelor's Degree in Agribusiness Management and a Master's Degree in Agriculture, both from WVU. Her love of soil started as a young child, when it was a snack. These days, she prefers to enjoy it through touch and not taste. When she's not at work, she enjoys spending time outside with her husband and daughter on the family farm.
